Nyholm, 2020-03-09 Can robots perform actions make decisions collaborate with humans be our friends perhaps fall in love or potentially harm us Even before these things truly happen ethical and philosophical questions already arise The reason is that we humans have a tendency to spontaneously attribute minds and agency to anything even remotely humanlike

Moreover some people already say that robots should be our companions and have rights Others say that robots should be slaves This book tackles emerging ethical issues about human beings robots and agency head on It explores the ethics of creating robots that are or appear to be decision making agents From military robots to self driving cars to care robots or even sex robots equipped with artificial intelligence how should we interpret the apparent agency of such robots This book argues that we need to explore how human beings can best coordinate and collaborate with robots in responsible ways It investigates ethically important differences between human agency and robot agency to work towards an ethics of responsible human robot interaction
