Why Knowledge Matters in Curriculum Leesa Wheelahan,2012 What should we teach in our schools and vocational education and higher education institutions Is theoretical knowledge still important This book argues that providing students with access to knowledge should be the raison d tre of education Its premise is that access to knowledge is an issue of social justice because society uses it to conduct its debates and controversies Theoretical knowledge is increasingly marginalised in curriculum in all sectors of education particularly in competency based training which is the dominant curriculum model in vocational education in many countries This book uses competency based training to explore the negative consequences that arise when knowledge is displaced in curriculum in favour of a focus on workplace relevance The book takes a unique approach by using the sociology of Basil Bernstein and the philosophy of critical realism as complementary modes of theorising to extend and develop social realist arguments about the role of knowledge in curriculum Both approaches are increasingly influential in education and the social sciences and the book will be helpful for those seeking an accessible introduction to these complex subjects *Why Knowledge Matters in Curriculum* is a key reading for those interested in the sociology of education curriculum studies work based learning vocational education higher education adult and community education tertiary education policy and lifelong learning more broadly

Becoming A Researcher: A Research Companion For The Social Sciences Dunne, Mairead, Pryor, John, Yates, Paul, 2005-07-01 This innovative book combines what most books separate research as practical activity and research as intellectual engagement It clarifies and makes explicit the methodological issues that underlie the journey from initial research idea to the finished report and beyond The text moves the researcher logically through the research process and provides insights into methodology through an in depth discussion of methods It presents the research process as an engagement with text This theme moves through the construction of text in the form of data and the deconstruction of text in analysis Finally the focus moves to the reconstruction of text through the re presentation of the research in the report Following through each of these stages in turn the chapters consider either a practical issue or a group of methods and interrogate the associated methodological concerns In addition the book also addresses the rarely explored issues of the researcher as writer and researcher identity as core elements of the research process The book provides a range of insights and original perspectives These successfully combine practical guidance with the invitation to consider the problematic nature of research as social practice It is an ideal reference for those embarking on research for the first time and provides a new methodological agenda for established researchers
