Realist Social Theory Margaret S. Archer, 1995-10-19 Building on her seminal contribution to social theory in Culture and agency Margaret Archer develops here her morphogenetic approach applying it to the problem of structure and agency Since structure and agency constitute different levels of stratified social reality each possesses distinctive emergent properties which are real and causally efficacious but irreducible to one another. The problem therefore is shown to be how to link the two rather than conflate them as has been common practice whether in upwards conflation by the aggregation of individual acts downwards conflation through the structural orchestration of agents or more recently in central conflation which holds the two to be mutually constitutive and thus precludes any examination of their interplay by eliding them Realist social theory the morphogenetic approach thus not only rejects methodological individualism and collectivism but argues that the debate between them has been replaced by a new one between elisionary theorizing such as Giddens structuration theory and the emergentist theories based on a realist ontology of the social world. The morphogenetic approach is the sociological complement of transcendental realism and together they provide a basis for non conflationary theorizing which is also of direct utility to the practising social analyst **Rethinking Social Theory** Roger Sibeon, 2004-03-27 Identifies and explores unresolved controversies and ambiguities in present day sociological theorizing Structure, Culture and Agency Tom Brock, Mark Carrigan, Graham Scambler, 2016-11-10 Professor Margaret Archer is a leading critical realist and major contemporary social theorist This edited collection seeks to celebrate the scope and accomplishments of her work distilling her theoretical and empirical contributions into four sections which capture the essence and trajectory of her research over almost four decades Long fascinated with the problem of structure and agency Archer's work has constituted a decade long engagement with this perennial issue of social thought However in spite of the deep interconnections that unify her body of work it is rarely treated as a coherent whole This is doubtless in part due to the unforgiving rigour of her arguments and prose but also a byproduct of sociology s ongoing compartmentalisation. This edited collection seeks to address this relative neglect by collating a selection of papers spanning Archer's career which collectively elucidate both the development of her thought and the value that can be found in it as a systematic whole This book illustrates the empirical origins of her social ontology in her early work on the sociology of education as well as foregrounding the diverse range of influences that have conditioned her intellectual trajectory the systems theory of Walter Buckley the neo Weberian analysis of Lockwood the critical realist philosophy of Roy Bhaskar and more recently her engagement with American pragmatism and the Italian school of relational sociology What emerges is a series of important contributions to our understanding of the relationship between structure culture and agency Acting to introduce and guide readers through these contributions this book carries the potential to inform exciting and innovative sociological research Classical Sociological Theory George Ritzer, Jeffrey Stepnisky, MR Jeffrey N Stepnisky, 2020-03-27 The authors are proud sponsors of the 2020 SAGE Keith Roberts Teaching

Innovations Award enabling graduate students and early career faculty to attend the annual ASA pre conference teaching and learning workshop Classical Sociological Theory Eighth Edition provides a comprehensive overview of the major theorists and schools of sociological thought from the Enlightenment roots of theory through the early 20th century The integration of key theories with biographical sketches of theorists and the requisite historical and intellectual context helps students to better understand the original works of classical authors as well as to compare and contrast classical theories

Deep Change and Emergent Structures in Global Society Andrea M. Maccarini, 2019-03-01 This book addresses the problem of the transition to new forms of social order in the global world As a haunting sense of historical discontinuity pervades Western societies it offers a fresh perspective on the issue focusing on two basic coordinates to pinpoint the developmental path of rapidly changing societies one is the mechanism of unfettered social morphogenesis and the other is the specific kind of societal unification brought about by globalization with the related closure of the world The book draws on the theoretical work produced in the five volumes of the Springer series Social Morphogenesis and applies it in a sustained and concerted approach to the empirical examination of macro social change The first part of the book presents the social ontology of the morphogenetic approach and discusses its capacity to interpret macrosocial transitions. The second part then draws a prospective outline of the social formation known as the morphogenic society showing how unbound morphogenesis in a globalized world shapes such crucial phenomena as social norms war and violence openness and closure as adaptive responses from social organizations Lastly the third part examines the anthropological consequences of these societal trends focusing on self and character as well as on human fulfillment and the good life and Critical Realism Anthony Thorpe, Jean Pierre Elonga Mboyo, 2025-09-18 Adopting a critical realist approach to educational leadership this book shows how applied theory can contribute to the development of mechanisms allowing for the effective leadership of organisations Through an examination of pertinent theories and debates in educational leadership and critical realist thought it moves to offer demonstrations of practical uses of critical realism that include the transformation of reflective practice the development and practice of leadership and the formulation as well as the enactment of policy Considering the role that realist thought can play in the resolution of educational crises in sub Saharan Africa and bridging the gap between research and practice the authors argue that change is possible and that it can be initiated from within the field of educational leadership Centred on a vision of social justice for human flourishing instead of operating within narrow and mechanistic pre occupations Educational Leadership and Critical Realism will appeal to scholars across the social sciences as well as to practitioners and policymakers in the field of education Individualism, Holism and the Central <u>Dilemma of Sociological Theory</u> Jiří Šubrt, 2019-05-13 This book examines individualism and holism the two interpretive perspectives that have divided sociological theory into two camps examines attempts to overcome this antinomy and sets out a new approach to resolving this dilemma via critical reconfigurationism What Is a Person? Christian Smith, 2010 The

task of understanding human beings what we ourselves are our constitution and condition is a perennial problem in philosophy and related disciplines Smith argues here that our understanding of human persons is threatened by technological development and capricious academic theories alike seeking to deny or relativize the personhood of humanity Smith s book puts a stake in the ground in defense of a view of the human that is genuinely humanistic in the traditional sense and capable of sustaining with intellectual coherence things like modern human rights and universal benevolence
