Glatston, 2021-10-28 Red Panda Biology and Conservation of the First Panda Second Edition provides the most up to date research data and conservation solutions for the red pandas *Ailurus* species Since the publication of the previous edition in 2010 the International Union for Conservation of Nature IUCN updated the threat level of red pandas and they are now considered to be endangered This latest edition is updated to provide an in depth look at the scientific and conservation based issues urgently facing the red panda today Led by one of the world s leading authorities and advocates for red panda conservation this new edition includes data from the Population and Habitat Viability PHVA workshops conducted in three of the species range states Nepal China and India these workshops utilized firsthand information on the decrease of red panda populations due to factors including deforestation illegal pet trade human population growth and climate change This book also includes updated information from the first edition on reproduction anatomy veterinary care zoo management and fossil history Discusses the evidence for two species of red panda and how this might impact conservation efforts Reports on status in the wild looks at conservation issues and considers the future of this unique species Written by long standing red panda experts as well as those specializing in fields involving cutting edge red panda research Includes new chapters on topic including the impact of climate change how bamboo influences distribution and conservation in Bhutan and Myanmar Giant Pandas Don Lindburg, Karen Baragona, 2004-08-23 The much loved giant panda a secretive denizen of the dense bamboo forests of western China has become an icon worldwide of progress in conservation and research This volume written by an

international team of scientists and conservationists including Chinese researchers whose work has not been available in English tells the promising story of how the giant panda returned from the brink of extinction The most important sourcebook on giant pandas to date it is the first book since 1985 to present current panda research and the first to place the species in its biological ecological and political contexts More than a progress report on a highly endangered species Giant Pandas Biology and Conservation details the combination of scientific understanding local commitment and government involvement that has been brought into play and asks what more needs to be done to ensure the panda s survival The book is divided into four parts Evolutionary History of the Giant Panda Studies of Giant Panda Biology Pandas and Their Habitats and Giant Panda Conservation It combines the latest findings from the field and the laboratory together with panel and workshop summaries from a recent international conference Taken together the chapters highlight how international cooperation has led to better management in the wild and in captivity The volume also shows how concepts such as buffer zones links between forest fragments multiple use areas and cooperation with local people who have a stake in the resources highly relevant concepts for conservation problems around the world have been key to the panda s survival **Panda Nation** E. Elena Songster,2018 A logo on products ranging from chopsticks and toilet paper to cell phones and automobiles the panda is one of the most ubiquitous images in China and throughout the world Yet the panda holds little notable historical significance in China Although it has existed in the territory of present day China since the Pliocene epoch its widespread popularity there is not only recent but almost sudden In Panda Nation E Elena Songster links the emergence of the giant panda as a national symbol to the development of nature protection in the People s Republic of China The panda s transformation into a national treasure exemplifies China s efforts in the mid twentieth century to distinguish itself as a nation through government directed science and popular nationalism The story of the panda s iconic rise offers a striking reflection of China s recent and dramatic ascent as a nation in global status The Last Panda George B. Schaller,1994-09-14 Dependent on a shrinking supply of bamboo hunted mercilessly for its pelt and hostage to profiteering schemes once in captivity the panda is on the brink of extinction Here acclaimed naturalist George Schaller uses his great evocative powers and the insight gained by four and a half years in the forests of the Wolong and Tangjiahe panda reserves to document the plight of these mysterious creatures and to awaken the human compassion urgently needed to save them No scientist is better at letting the rest of us in on just how the natural world works no poet sees the world with greater clarity or writes about it with more grace Anyone who genuinely cares for wildlife cannot help being grateful to Schaller both for his efforts to understand the panda and for the candor with which he reports what has gone so badly wrong in the struggle to save it from extinction Geoffrey C Ward New York Times Book Review Schaller s book is a unique mix of natural history and the politics of conservation and it makes for compelling reading Having been in giant panda country myself I found some of the descriptions of the animals and habitats breathtaking Schaller describes the daily routines and personalities of the giant

pandas he studied as well as their fates thereafter as though they were his blood relatives Schaller's brilliant presentation of the complexities of conservation makes his book a milestone for the conservation movement Devra G Kleiman Washington Post Book World George Schaller's most soulful work written in journal style with many asides about a creature who evolved only two to three million years ago about the same time as humans Here conservation biology confronts an evil that grinds against hope and shatters the planet's diversity Written with hope Whole Earth Catalog A nicely crafted blend of wildlife observation and political cultural analysis The Last Panda is a sad chronicle of our failure so far to stem the decline of the animal that may be the most beloved on the planet Donald Dale Jackson Smithsonian *Zookeeping* Mark D. Irwin, John B. Stoner, Aaron M. Cobaugh, 2013-12-09 As species extinction environmental protection animal rights and workplace safety issues come to the fore zoos and aquariums need keepers who have the technical expertise and scientific knowledge to keep animals healthy educate the public and create regional national and global conservation and management communities This textbook offers a comprehensive and practical overview of the profession geared toward new animal keepers and anyone who needs a foundational account of the topics most important to the day to day care of zoo and aquarium animals The three editors all experienced in zoo animal care and management have put together a cohesive and broad ranging book that tackles each of its subjects carefully and thoroughly The contributions cover professional zookeeping evolution of zoos workplace safety animal management taxon specific animal husbandry animal behavior veterinary care public education and outreach and conservation science Using the newest techniques and research gathered from around the world *Zookeeping* is a progressive textbook that seeks to promote consistency and the highest standards within global zoo and aquarium operations Pandas Heather Angel, 1998 Federal Register, 1995-03-28 *A Visual Celebration of Giant Pandas* Fanny Lai, Bjorn Olesen, 2013-01-24 The result of five years of meticulous research and stunning photography A Visual Celebration of Giant Pandas is a delightful volume that follows in the footsteps of the shy and enigmatic giant panda and captures both adults and cubs on camera in close up situations Beautifully photographed in rarely seen settings the authors explain what makes the panda such a lovable icon and why the public cannot have enough of this symbol of quiet hope for survival in a fast changing planet It also provides readers with fascinating and detailed information about Giant Panda's and the other species that share its habitat such as the red panda and snow leopard The issue of pandaplomacy is also addressed with the arrival of pandas in Singapore in 2012 and their likely arrival in Malaysia in 2013 Finally the book assesses the chances of survival for the giant panda and the efforts being made to preserve its habitat **Transactions at Play** Cindy Dell Clark, 2009-05-16 When players play there is a transactional process at work whether for children on a teeter totter or pandas playing with peers In this edited volume nine experts on play show how play transactions are an important dynamic of play across cultures age groups even species A rich array of play contexts is evident across the nine chapters encompassing varied continents age groups and sorts of players The play processes of giant pandas of home visiting therapists of Polynesian women and of

autistic kids are included here The healthy interchange of ideas about play one of the hallmarks of the Association for the Study of Play is a process that is cultivated in this new volume

Panda Facts Brook Clearwater,AI,2025-02-18 Panda Facts explores the captivating world of giant pandas focusing on their biology conservation and behavior This book addresses the central question of how a creature with a carnivore s digestive system thrives almost exclusively on bamboo Discover how evolutionary pressures led to this unique adaptation impacting their ecological niche and vulnerability to habitat loss and how genetic and physiological adaptations allow pandas to survive on such a nutrient poor diet The book also examines the conservation status of pandas detailing the history of conservation efforts in China and the challenges of protecting them from habitat destruction and other threats By integrating perspectives from genetics ecology and environmental science Panda Facts offers a comprehensive understanding of panda conservation moving from their dietary habits to the complexities of wildlife management and the effectiveness of strategies such as habitat restoration and captive breeding programs The book presents information in a clear fact based manner making it a valuable resource for anyone interested in wildlife conservation biology or the intricacies of nature

Around the World in 80 Species Jill Atkins,Barry Atkins,2018-11-08 The world is currently experiencing a sixth period of mass species extinction and extinction of flora and fauna is caused by a variety of factors arising from industrial activity and increasing human population such as global warming climate change habitat loss pollution and use of pesticides Most causes of extinction are linked to corporate activity either directly or indirectly Around the World in 80 Species Exploring the Business of Extinction responds to the ongoing mass extinction crisis engulfing our planet by exploring the ways in which accounting business and finance can be used to prevent species extinctions From Africa to the Far East and from Europe to the Americas the authors explore species loss and how businesses can stop mass extinctions through greater transparency and through closer engagement with their investors and wildlife organisations The book concludes that global capitalism has led us to this extinction crisis and that therefore the mechanisms of capitalism namely accounting finance investment can help to pull us out Businesses must urgently address extinction before it is too late for all species including ourselves As the first book to explore corporate accounting and accountability in relation to species on the brink of extinction this book will be of great interest to both professionals and a wider audience interested in the causes and prevention of extinction

Chemical Signals in Vertebrates 10 R.T. Mason,Michael P. Lemaster,Dietland Müller-Schwarze,2006-11-09 The editors and contributors to this volume should be justifiably proud of their participation in the tenth triennial meeting of the Chemical Signals in Vertebrates International Symposium This meeting was held 27 years after the initial gathering of participants in Saratoga Springs New York from June 6 to 9 1976 Subsequent meetings have been held every three years in Syracuse New York Sarasota Florida Laramie Wyoming Oxford England Philadelphia Pennsylvania Tübingen Germany Ithaca New York and Krakow Poland This tenth anniversary symposium was held from July 29 through August 1 in Corvallis Oregon and was hosted by the Zoology

Department and Biology Programs of Oregon State University This book also represents the tenth in a series of books on chemical communication chemical ecology olfactory and vomeronasal research in vertebrate species The species covered in the chapters herein range from fish to mammals including humans By taxonomic breakdown the mammals are the most represented in number of species and chapter contributions However the hosts of the meeting endeavored to have some representative contributions covering all of the major vertebrate taxa As in past years the meeting was well represented with just over 100 participants from 13 different nations Plenary talks focused on some of the non mammalian groups that have tended to be less represented in these symposia Thus we had a very nice overview of comparisons and contrasts of invertebrate chemical communication to vertebrate systems

One Medicine O.A. Ryder, M.L. Byrd, 2012-12-06 There is a saying he is a person who can charm the birds from the trees This might well be applied to Kurt Benirschke Indeed it describes both his warm personality and his intimate interaction with nature He might be considered a modern adept of the Greek and Roman Stoic school of philosophy which taught an understanding of man as integrated into nature in its totality The right way to live is according to nature with nature as part of it This at the same time means humanity and Kurt Benirschke impresses us not only as an outstanding scientist but also as a humanist who has had a lifelong love affair with nature The foundation of Springer Verlag New York in 1964 offered a great opportunity for getting together with eminent authors in the United States Kurt Benirschke was one of them and his book Pathology of the Placenta was highly acclaimed all over the world My attention was first called to him by my dear friend Dr Ernst Uhlinger then a pathologist in Zurich With a sharp and critical eye he followed the international

literature on pathology and discovered the genius of Kurt Benirschke Our first encounters led to a relationship of trust which in turn grew into friendship I soon learned to esteem the special qualities of the man and the scientist in fact they cannot be separated

Mothers in Children's and Young Adult Literature Lisa Rowe Fraustino, Karen Coats, 2016-05-05 Winner of the Children's Literature Association's 2018 Edited Book Award Contributions by Robin Calland Lauren Causey Karen Coats Sara K Day Lisa Rowe Fraustino Dorina K Lazo Gilmore Anna Katrina Gutierrez Adrienne Kertzer Kouen Kim Alexandra Kotanko Jennifer Mitchell Mary Jeanette Moran Julie Pfeiffer and Donelle Ruwe Living or dead present or absent sadly dysfunctional or merrily adequate the figure of the mother bears enormous freight across a child's emotional and intellectual life Given the vital role literary mothers play in books for young readers it is remarkable how little scholarly attention has been paid to the representation of mothers outside of fairy tales and beyond studies of gender stereotypes This collection of thirteen essays begins to fill a critical gap by bringing together a range of theoretical perspectives by a rich mix of senior scholars and new voices Following an introduction in which the coeditors describe key trends in interdisciplinary scholarship the book's first

section focuses on the pedagogical roots of maternal influence in early children's literature. The next section explores the shifting cultural perspectives and subjectivities of the twentieth century. The third section examines the interplay of fantasy, reality, and the ethical dimensions of literary mothers. The collection ends with readings of postfeminist motherhood from contemporary realism to dystopian fantasy. The range of critical approaches in this volume will provide multiple inroads for scholars to investigate richer readings of mothers in children's and young adult literature.
