Model-Based Reasoning in Scientific Discovery L. Magnani, N.J. Nersessian, Paul

Thagard, 2012-12-06 The volume is based on the papers that were presented at the International Conference Model Based Reasoning in Scientific Discovery MBR 98 held at the Collegio Ghislieri University of Pavia Pavia Italy in December 1998 The papers explore how scientific thinking uses models and explanatory reasoning to produce creative changes in theories and concepts The study of diagnostic visual spatial analogical and temporal reasoning has demonstrated that there are many ways of performing intelligent and creative reasoning that cannot be described with the help only of traditional notions of reasoning such as classical logic Traditional accounts of scientific reasoning have restricted the notion of reasoning primarily to deductive and inductive arguments Understanding the contribution of modeling practices to discovery and conceptual change in science requires expanding scientific reasoning to include complex forms of creative reasoning that are not always successful and can lead to incorrect solutions The study of these heuristic ways of reasoning is situated at the crossroads of philosophy artificial intelligence cognitive psychology and logic that is at the heart of cognitive science There are several key ingredients common to the various forms of model based reasoning to be considered in this book The models are intended as interpretations of target physical systems processes phenomena or situations The models are retrieved or constructed on the basis of potentially satisfying salient constraints of the target domain

Model-Based Reasoning, Abductive Cognition, Creativity Emiliano Ippoliti, Lorenzo Magnani, Selene Arfini, 2024-11-20 This book discusses how scientific and other types of cognition make use of models abduction and explanatory reasoning in order to produce important innovative and possibly creative changes in theories and concepts Gathering revised contributions presented at the international conference on Model Based Reasoning MBR023 held on June 7-9 2023 in Rome Italy the book addresses various intertwined topics ranging from the epistemology and applications of models also concerning the problem of knowledge production and scientific methodology information visualization experimental methods and design to the analysis of their role in cognition decision making also with respect to social implications The problem of model based cognition is also illustrated taking advantage of recent results regarding problem solving abduction and logic paying attention to a critique of the dominant and received approaches to the aim of fostering new discussions and stimulate new ideas All in all the book provides researchers and graduate students in the fields of applied philosophy epistemology cognitive science and artificial intelligence alike with an authoritative snapshot of the latest theories and applications of model based reasoning

Scientists as Writers James Harrison, 2014-05-09 In the endless debate about the Two Cultures no book until this attempted to provide a selection of scientific writing on specific themes to stimulate students of arts subjects into discussion and writing about the nature of science and its relationship with the rest of life This book is based on a selection of prose passages written by scientists about science supplemented by notes and a brief linking commentary Originally published in 1965 the passages were chosen to illustrate or comment on different aspects of eleven main themes ranging from surveys of changing ideas on the nature of the

universe and the material of which it was made to evolution past and future and the relation of science with religion and art Most of the extracts were from contemporary authors but there are passages by Aristotle Bacon Boyle Hooke Newton Dalton Faraday and Darwin At the end of the book there are suggestions for discussion to accompany each chapter to encourage the study of the use of language in consideration of the nature history and role of science Science and Its History Joseph Agassi,2008-09-16 Professor Joseph Agassi has published his Towards an Historiography of Science in 1963 It received many reviews by notable academics including Maurice Finocchiaro Charles Gillispie Thomas S Kuhn Geroge Mora Nicholas Rescher and L Pearce Williams It is still in use in many courses in the philosophy and history of science Here it appears in a revised and updated version with responses to these reviews and with many additional chapters some already classic others new They are all paradigms of the author s innovative way of writing fresh and engaging chapters in the history of the natural sciences Proceedings of the Technical Section British Paper and Board Makers' Association.
