Reasoning With Logic Programming:

Reasoning with Logic Programming José Júlio Alferes, 1996 **Reasoning with Logic Programming** Jose Julio Alferes, Luís Moniz Pereira, 1996-07-25 This workshop is dedicated to research projects on the early universe discussing strategies for studying faint distant objects in the optical and infrared spectral regions This field is evolving very rapidly Observational constraints on the evolution and formation of galaxies and large scale structures as well as the cosmic chemical evolution were critically discussed with regard to the theory and numerical simulations In this context the VLT first generation instrument capabilities were presented comprehensively and their use as cosmological tools discussed The concluding remarks focussed on the analysis of various possibilities for the VLT second generation instrumentation Many of these topics were covered by invited reviews and talks and some contributed talks which are included in this volume

Comyn, Norbert E. Fuchs, 1992-08-25 Logic programming enjoys a privileged position. It is firmly rooted in mathematical logic yet it is also immensely practical as a growing number of users in universities, research institutes and industry are realizing. Logic programming languages specifically Prolog have turned out to be ideal as prototyping and application development languages. This volume presents the proceedings of the Second Logic Programming Summer School LPSS 92. The First Logic Programming Summer School LPSS 90 addressed the theoretical foundations of logic programming. This volume focuses on the relationship between theory and practice and on practical applications. The introduction to the volume is by R. Kowalski, one of the pioneers in the field. The following papers are organized into sections on constraint logic programming, deductive databases and expert systems, processing of natural and formal languages, software engineering and education. Logic Programming and Nonmonotonic Reasoning Thomas Eiter, Wolfgang Faber, Mirosław Truszczyński, 2003-08-06 This book constitutes the refereed proceedings of the 6th International Conference on Logic Programming and Nonmonotonic Reasoning LPNMR 2001 held in Vienna, Austria in September 2001. The 22 revised full papers and eleven system descriptions presented with five invited papers were carefully reviewed and rigorously selected. Among the topics addressed are computational logic, declarative information extraction, model checking, inductive logic programming, default theories, stable logic programming, program semantics, incomplete information processing, concept learning, declarative specification, Prolog programming, many-valued logics, etc.
