Many Moral Rationalisms Karen Jones, François Schroeter, 2018-06-28 Moral rationalism takes human reason and human rationality to be the key elements in an explanation of the nature of morality moral judgment and moral knowledge This volume explores the resources of this rich philosophical tradition Thirteen original essays framed by the editors introduction critically examine the four core theses of moral rationalism i the psychological thesis that reason is the source of moral judgment ii the metaphysical thesis that moral requirements are constituted by the deliverances of practical reason iii the epistemological thesis that moral requirements are knowable a priori and iv the normative thesis that moral requirements entail valid reasons for action The five essays in Part I Normativity offer contemporary defences or reconstructions of Kant s attempt to ground the normative thesis that moral requirements entail valid reasons for action in the nature of practical reason and practical rationality The four essays in Part II Epistemology Meaning consider the viability of claims to a priori moral knowledge The authors of all four essays are sympathetic to a realist moral metaphysics and thus forgo the straightforward constructivist road to apriority The four essays in Part III Psychology each grapple with the implications for rationalism of the role of emotions and unconscious processes in moral judgement and action Together the essays demonstrate that moral rationalism identifies not a single philosophical position but rather a family of philosophical positions which resemble traditional rationalism as exemplified by Kant to varying degrees **Reason and Ethics** Joel

Marks, 2020-10-01 Reason and Ethics defends the theoretical claim that all values are subjective and the practical claim that human affairs can be conducted fruitfully in full awareness of this Joel Marks goes beyond his previous work defending moral skepticism to question the existence of all objective values This leads him to suggest a novel answer to the Companions in Guilt argument that the denial of morality would mean relinquishing rationality as well Marks disarms the argument by conceding the irreality of both morality and logic but is still able to rescue rationality while dispensing with morality on pragmatic grounds He then offers a positive account of how life may be lived productively without recourse to attributions and assertions of right and wrong good and bad and even truth and falsity Written in an accessible and engaging style Reason and Ethics will be of interest to scholars and students working in metaethics as well as to the generally intellectually curious The Impact Of Reason On Faith, Ethics And Belief Geran F. Dodson, 2016-04-11 The purpose of the book is to examine the theological claims of ethics faith and belief from a philosophical perspective The Abrahamic and Mosaic covenants of the Old Testament Jesus of the synoptic gospels and Paul s writings serve as the frame of reference in examining a biblical expression of reason and structured logic The message of Jesus centered on the Kingdom of God defined

the meaning of faith and belief established a new ethic and framed the message in logic forms The life and death of Jesus brought the realization of God's final covenant as prophesied by the Old Testament However Paul appropriated and developed the Jesus of history into the mythological eschatological Christ figure The clash of philosophy and theology is evident with theological presuppositions that are based on spiritual insight and divine revelation Logic in scripture employs propositions based primarily on revealed proof that is within the context of that which cannot be proven absolutely

Uncovering the identity of YHWH in the manuscripts and religious practices of Canaanite culture clearly associated YHWH with the polytheism of the Ugarit texts YHWH was one of the seventy sons of the Canaanite Most High God El and took on a unique identity that was rooted in El and the polytheistic nature of the pantheon of gods Theological truths stand within the context of faith and reason stands apart from faith and infers only that which can be proven based on evidence That which is knowable by faith cannot be known by reason since reason cannot validate that which is not proven to exist **Reason and**
