Rebirth Of Nature The Greening Of Science And God:

The Rebirth of Nature Rupert Sheldrake, 1994-04-01 Rupert Sheldrake one of the world's preeminent biologists has revolutionized scientific thinking with his vision of a living developing universe one with its own inherent memory In The Rebirth of Nature Sheldrake urges us to move beyond the centuries old mechanistic view of nature explaining why we can no longer regard the world as inanimate and purposeless Sheldrake shows how recent developments in science itself have brought us to the threshold of a new synthesis in which traditional wisdom intuitive experience and scientific insight can be Dogs That Know When Their Owners Are Coming Home Rupert Sheldrake, 2011-04-26 With a scientist mutually enriching s mind and an animal lover s compassion world renowned biologist Rupert Sheldrake presents a groundbreaking exploration of animal behavior that will profoundly change the way we think about animals and ourselves How do cats know when it s time to go to the vet even before the cat carrier comes out How do dogs know when their owners are returning home at unexpected times How can horses find their way back to the stable over completely unfamiliar terrain After five years of extensive research involving thousands of people who have pets and work with animals Dr Sheldrake proves conclusively what many pet owners already know there is a strong connection between humans and animals that defies present day scientific understanding Sheldrake compellingly demonstrates that we and our pets are social animals linked together by invisible bonds connecting animals to each other to their owners and to their homes in powerful ways His provocative ideas about these social or morphic fields explain the uncanny behavior often observed in pets and help provide an explanation for amazing animal behavior in the wild such as migration and homing Dogs That Know When Their Owners Are Coming Home not only provides fascinating insight into animal and human behavior but also teaches us to question the boundaries of conventional scientific thought and shows that the very animals who are closest to us have much to teach us about biology nature and consciousness **Topographies of the Sacred** Catherine E. Rigby, 2004 Although the British romantic poets notably Blake Wordsworth and Byron have been the subjects of previous ecocritical examinations this text compares English and German literary models of romanticism **Green Psychology** Ralph Metzner, 1999-06-01 A visionary ecopsychologist examines the rift between human beings and nature and shows what can be done to bring harmony to both the ecosystem and our own minds Shows that the solution to our ecological dilemma lies in our own consciousnesses It is becoming more and more apparent that the causes and cures for the current ecological crisis are to be found in the hearts and minds of human beings For millennia we existed within a religious and psychological framework that honored the Earth as a partner and worked to maintain a balance with nature But somehow a root pathology took hold in Western civilization the idea of domination over nature and this led to an alienation of the human spirit that has allowed an unprecedented destruction of the very systems which support that spirit In Green Psychology Ralph Metzner explores the history of this global pathology and examines the ways that we can restore a healing relationship with nature His search for role models takes him from

shamanic ceremonies with the Lacandon Maya of Mexico to vision guests in the California desert from the astonishing nature mysticism of Hildegard von Bingen to the Black Goddesses and Green Gods of our pagan ancestors He examines the historical roots of the split between humans and nature showing how first sky god worshiping cultures then monotheisms and finally mechanistic science continued to isolate the human psyche from the life giving Earth His final chapters present a solution showing that disciplines such as deep ecology and ecofeminism are creating a worldview in which the mind of humanity and the health of the Earth are harmoniously intertwined Who Guards the Guardians? Peter Raine, 2003 This book attempts to link ecology philosophy and theology through an exploration of a new model of intercultural dialogue Case studies provide practical and theoretical applications which lead to a deeper understanding of not only environmental guardianships but also the fundamental relationship between human beings and nature s being **Minding Creation** Joanna Leidenhag, 2020-12-10 Are humans the only creatures that can appreciate God's creation What if consciousness is spread more widely across all things This volume examines panpsychism through the lens of Christian doctrine Minding Creation is the first substantial examination of what a panpsychist theory of consciousness implies for key theological debates concerning God's presence and action evolution and the origin of the soul human uniqueness and the environmental crisis Joanna Leidenhag develops a theological panpsychism that is based on an exceptionally wide range of scholarship Minding Creation draws on the theologies of historical figures such as Augustine of Hippo Gottfried von Leibniz and others in order to create a critical and constructive conversation with contemporary analytic philosophers of mind such as Thomas Nagel Galen Strawson and David J Chalmers Leidenhag also discusses key concepts and issues such as emergence theory divine action and ecology She concludes that God created a universe from nothing which is filled with indwelling powers sacramental value and intrinsic experience This is a creation in which the Holy Spirit is internally present at every point a creation that worships God and a creation that human beings must protect and lead in praise Wild Earth, Wild Soul (2nd Edition) Sky Otter, 2025-04-29 Imagine a nature based culture so alive and so connected spreading like wildfire This Evolutionary Healing Barbara Sarter, 2002 Taking both a spiritual and philosophical approach this book book is the match is a reflection of the author's quest to come to terms with the meaning of human suffering The book integrates ancient and modern philisophies of life with modern scientific discovery. The author applies these philosophies with the process of healing and describes evolutionary healing as the evolution of one s consciousness through health and disease Alexandria 4 David Fideler, 1997-01-01 Alexandria explores the relationships between philosophy cosmology myth and culture the spiritual philosophical and intellectual heritage of the Western World and what the humanities have to contribute to the world today

<u>Reductionism</u> Richard H. Jones,2000 Reductionism s approach brings together many of the most interesting questions today in philosophy consciousness and computers and in science issues of complexity and self organization. It also presents a brief history of how reductionism has developed in Western philosophy and religion with reference to Indian philosophy on

certain issues The Postmodern Adventure Steven Best, Douglas Kellner, 2020-12-17 This compelling book explores the challenges to theory politics and human identity that we face on the threshold of the third millennium It follows on the successor of Best and Kellner's two previous books Postmodern Theory acclaimed as the best critical introduction to the field and The Postmodern Turn which provides a powerful mapping of postmodern developments developments in the arts politics science and theory In The Postmodern Adventure Best and Kellner analyze a broad array of literary cultural and political phenomena from fiction film science and the Internet to globalization and the rise of a transnational image culture Experiments That Could Change the World Rupert Sheldrake, 2002-07-01 Examines the realities of unexplained natural phenomenon and provides explanations that push the boundaries of science Looks at animal telepathy and the ability of pigeons to home Proves the point that big guestions don't need big science Noted scientist Rupert Sheldrake is a former research fellow of the Royal Society New Edition with an Update on Results How does your pet know when you are coming home How do pigeons home Can people really feel a phantom amputated arm These questions and more form the basis of Sheldrake s look at the world of contemporary science as he puts some of the most cherished assumptions of established science to the test What Sheldrake discovers is that certain scientific beliefs are so widely taken for granted that they are no longer regarded as theories but are seen as scientific common sense In the true spirit of science Sheldrake examines seven of these beliefs Refusing to let intellectual dogmatism influence his search for the truth Sheldrake presents simple experiments that allow the curious and the skeptical to join in his journey of discovery His experiments look at how scientific research is often biased against unexpected patterns that emerge and how a researcher's expectations can influence the results He also examines the taboo of taking pets seriously and explores the question of human extrasensory perception Perhaps most important he questions the notion that science must be expensive in order to achieve important results showing that inexpensive methods can indeed shake the very foundations of science as we know it In this compelling and intelligent book Sheldrake offers no preconceived wisdom or easy answers just an open invitation to explore the unknown create new science Animal Passions and Beastly Virtues Marc Bekoff, 2006 An engaging thoughtful look and perhaps even change the world at the science and ethics of research into animal behavior Jung in the 21st Century Volume Two, After the **Anthropocene** Anne Fremaux, 2019-03-25 The environmental crisis is the most prominent challenge humanity has ever had to battle with and humanity is currently failing The Anthropocene or so called age of humans is indeed a period when the survival of humanity has never been so much at risk This book locates itself in the field of critical green political theory Fremaux s analysis of the current environmental crisis calls for us to embrace radical shifts in our modes of being or in other words socially progressive innovations that will be described within the unique framework of Green Republicanism In offering a constructive and emancipatory delineation of what could be considered an ecological civilization that is respectful of its natural environment and social differences this book describes how to shift from an arrogant speciesism and

materialistic lifestyle to a post anthropocentric ecological humanism focusing on the good life within ecological limits This new political regime calls for a radical reinvention of our societies a decentering of the humans within our metaphysical worldview and a withdrawal of the capitalist technosphere at the benefit of the biosphere It will require a new economic paradigm that replaces the unsustainable capitalist logic of growth by sustainable degrowth and steady economics Rooted in ethical thinking and political philosophy this book seeks to offer a concrete roadmap of how sustainable societies can be International Environmental Law, Policy, and Ethics Alexander Gillespie, 2014-08-21 This second edition of International Environmental Law Policy and Ethics revises and expands this groundbreaking study into the question of why the environment is protected in the international arena This question is rarely asked because it is assumed that each member of the international community wants to achieve the same ends However in his innovative study of international environmental ethics Alexander Gillespie explodes this myth He shows how nations like individuals create environmental laws and policies which are continually inviting failure as such laws can often be riddled with inconsistencies and be ultimately contradictory in purpose Specifically he seeks a nexus between the reasons why nations protect the environment how these reasons are reflected in law and policy and what complications arise from these choices This book takes account of the numerous developments in international environmental law and policy that have taken place the publication of the first edition most notably at the 2002 World Summit on Sustainable Development and the 2012 Rio 20 United Nations Conference on Sustainable Development Furthermore it addresses recent debates on the economic value of nature and the problems of the illegal trade in species and toxic waste The cultural context has also been considerably advanced in the areas of both intangible and tangible heritage with increasing attention being given to conservation wildlife management and the notion of protected areas The book investigates the ways in which progress has been made regarding humane trapping and killing of animals and how in contrast the Great Apes initiative and similar work with whales have failed Finally the book addresses the fact that while the notion of ecosystem management has been embraced by a number of environmental regimes it has thus far failed as an international philosophy **Illusion of Separation** Giles Hutchins, 2014-10-06 Our modern patterns of thinking and learning are all based on observing a world of things which we think of as separate building blocks This worldview allows us to count and measure objects without their having any innate value it provides neat definitions and a sense of control over life However this approach also sets humans apart from each other and from nature In reality in nature everything is connected in a fluid dynamic way Separateness is an illusion we have created and is fast becoming a dangerous delusion infecting how we relate to business politi and other key areas of our daily reality Giles Hutchins argues that the source of our current social economic and environmental issues springs from the misguided way we see and construct our world With its roots in ancient wisdom this insightful book sets out an accesssible easy to follow exploration of the causes of our current crises offering ways to rectify these issues at source and then pointing to a way ahead Renewing the Balance

Dirk Dunbar,2017-03-31 In Renewing the Balance Dirk Dunbar shows how the balance worshipped in ancient Earth wisdom traditions is being integrated into Western culture's dominantly masculine rational value system Filled with hope revelations regarding cultural evolution and scholarship of the highest order Dunbar's book passionately challenges all of us to recover the archaic reverence for the natural world to reconsider the limits of growth progress and mechanistic thinking and to join in the newly reclaimed celebration of life that fosters peace and the potential for a sustainable future Dirk Dunbar's Renewing the Balance is a crucial and comprehensive account of how traditional cultures maintained a healthy balance that preserved our natural world and how our modern technocratic economic ideology has produced a culture that is dangerously out of balance It is at once a diagnosis of our dis ease and a prescription for healing our collective psyche polis and environment A truly fascinating philosophical adventure Sam Keen Author of 12 books including The Passionate Life and Hymns to an Unknown God Renewing the Balance brings depth and breadth to our efforts to understand how Western culture evolved as it did and to appreciate the many streams that now flow into our efforts to manifest ecological wisdom in a hypermodern world Charlene Spretnak Author of 9 books including States of Grace and The Resurgence of the Real

Laudato Si Anthony Kelly,2016-09-20 Pope Francis Laudato Si is a game changing document for the life of the Church and the ecological health of this planet A Catholic vision is deficient if it does not include the earth and its life forms Loving one s neighbour must include loving the planetary neighbourhood in which all live For its part the integral ecology on which the Pope insists must include the dimensions of mind and heart science and art faith and the whole spiritual life of culture Here the great theological themes animating the Catholic vision play their part as ever renewable resources the Creator and the gift of creation the incarnation of the Word amongst us the inexhaustible life of the Trinity itself the Eucharist as communion with Christ in the here and now of earthly life just as Sister Death must be given her place for the sake of ecological and eschatological realism Integral ecology and Catholic vision are two sides of the conversion of mind and heart necessary to promote the communion of life now and in the world to come Paganism: A Religion for the 21st Century Shanddaramon,2009-03-26 In the Postmodern world we are living in our religious institutions have struggled to come to terms with current cultural trends Modern Paganism is an antidote for those seeking a spiritual path that recognizes and honors the realities of our world
