PHILIP P. EVERTS

Institute of International Studies, Leiden University, Netherlands

I. Introduction

Early in 1971 UNESCO asked us to prepare a new International Repertory of Institutions for Peace and Conflict Research, and to undertake an analysis of the data collected for that purpose.¹ In order to carry out a task like this it is necessary to formulate, at least for oneself, as clearly as possible, what is to be understood by this kind of activity, called peace and conflict research.² What then do we understand by peace and conflict research? What are its

1. This article is based on the introduction to the *International Repertory of Institutions for Peace and Conflict Research*, UNESCO, Paris 1972, and is published here with UNESCO's permission. The author is Director of the Institute for International Studies, University of Leyden and former Editor of the *International Peace Research Newsletter*. He wants to express his gratitude to all those who assisted through their advice and criticism to improve the quality of this paper and to all the institutions which facilitated his work by promptly supplying the necessary data. Special thanks go to Joris Voorhoeve and Gerard Aupers, who assisted in the collection, coding and processing of the data.

2. Although there are a number of differences between peace research and conflict research, the term "peace research" will be used throughout as identical with "peace and conflict research".

purposes, object and method? It is—in short—a field of applied research into the causes of wars and other large scale conflicts, and the conditions of a more peaceful world.

A battle is still being waged on two fronts—and there is much division of opinion within the ranks. On the one hand peace research has yet to establish itself firmly and defend its position in a sceptical and often hostile academic environment. As anyone working in this environment knows, university departments behave more often than not like warring tribes, fighting against encroachments on their territory and way of life. Peace research in many countries came into being in opposition against established academic and political interests and is often still viewed with suspicion and disbelief. Is it a scientific discipline in its own right or politics in

The Conflict Helix R. J. Rummel, This is a book on conflict and consensus aimed at the general reader In active plain and direct language it makes the seemingly abstract and complex issues simple Its view of peace is well rounded tough minded one that well understands the difficult world of social and personal violence and conflict At its heart is a simple finding to wage peace we need to foster freedom The human race can best achieve that simple aim by leaving people alone to form their own communities The Conflict Helix avoids the ambiguous in favor of the categorical the hedged qualified statement for the direct Rummel presents a series of basic principles each concerning an aspect of conflict and peace psychological interpersonal societal international and each aspect having its own master principle These principles are not mere organizational props but are deeply theoretical and empirically fundamental The volume expresses the core ideas results and conclusions of Rummel's major five volume work on Understanding Conflict and War In discarding technical material and focusing on principles and meaning The Conflict Helix presents an executive summary of a lifetime of work in a digestible form In light of recent events in Europe Asia and Latin American this work takes on a special poignancy for the developing no less than the industrialized worlds Hence this book should be of value to the general reader as well as professionals and advanced students of international politics
