

4. HOW RECENT NAIC DEVELOPMENTS COULD IMPACT STRUCTURED SOLUTIONS

NAIC Group	Regulatory Effort	Explanation	Current Status (Aug 2022)	Impact for Rated Notes	Impact for Subordinated Notes
Statutory Accounting Working Group (SAPWG)	Bond Definition	- Defines what investments qualify as Schedule D bonds - Investments not qualified would likely end up on Schedule BA with higher capital charges - For ABS (including CFO rated tranches) to be considered bond, "substantive credit enhancement," with "pre-determined principal and interest payments"	- Definition and issue paper under revision based on insurers' feedback - Likely adoption in 2024 or later	- Current proposal provides a clear pathway for CFO rated notes to be considered bonds - Rated notes with credit collateral most likely continued to be considered bonds "Stapling" of tranches does not change bond qualification	As before, not considered bonds, reported on Schedule BA
RBC Investment Risk and Evaluation Working Group (RBC IRE WG)	Structured Products RBC Charges	- To propose interim RBC charges for structured products to properly account for risks - More holistic RBC methodologies for CLO and other structured products to follow	- Early stage in discussion - No proposal yet	Too early to say	Too early to say
Valuation of Securities Task Force (VOSTF)	Concerns about Credit Rating Providers	VOSTF noting inconsistent rating outcomes from different credit rating providers; proposing a few possible solutions, including requiring at least two ratings, excluding the use of rating from certain rating agencies.	On hold, huge industry push-back; not likely to go forward in the current form	If adopted, rated notes may require more than one rating, or ratings from only certain providers	Not relevant
VOSTF	Private Letter Rating	NAIC requires investments with private letter rating to file rating rationale report	Adopted	- No change for publicly-rated notes - Report needs to be filed if private - Though no change for capital / accounting treatments	Not relevant

The Structure of Long-term Memory Wolfgang Klimesch,2013-05-13 How is information stored and retrieved from long term memory It is argued that any systematic attempt to answer this question should be based on a particular set of specific representational assumptions that have led to the development of a new memory theory the connectivity model One of the crucial predictions of this model is that in sharp contrast to traditional theories the speed of processing information increases as the amount and complexity of integrated knowledge increases In this volume the predictions of the model are examined by analyzing the results of a variety of different experiments and by studying the outcome of the simulation program CONN1 which illustrates the representation of complex semantic structures In the final chapter the representational assumptions of the connectivity model are evaluated on the basis of neuroanatomical and physiological evidence suggesting that neuroscience provides valuable knowledge which should guide the development of memory theories

Digital Computer Structure and Design R. Townsend,2014-05-20 Digital Computer Structure and Design Second Edition discusses switching theory counters sequential circuits number representation and arithmetic functions The book also describes computer

memories the processor data flow system of the processor the processor control system and the input output system Switching theory which is purely a mathematical concept centers on the properties of interconnected networks of gates The theory deals with binary functions of 1 and 0 which can change instantaneously from one to the other without intermediate values The binary number system is used in computer arithmetic and other operations due to its simplicity that can be easily adopted in device parameters These operations involve only two levels the on or off positions which also offer maximum immunity to noise or circuit interference The binary system is a very efficient way to represent numbers or to store data When the computer uses this system the clock cycle of the processor determines or divides the cycles for each sub operation into steps A master timing counter defines each of these steps and synchronizes them avoid data loss or mix ups After the sub operation has been completed the monitor will display the result Programmers computer engineers computer instructors and students of computer science will find the book highly useful Structure and Development of the "living Matter" ...

Partnerships for Strengthening Health Care Workforce Capacity: Models of Collaborative Education Jeanne Mahoney Leffers,Jennifer Gail Audette, Kevin S. Hardwick,William Van Cleve,2018-07-31 A critical problem in resource scarce countries across the globe is the shortage of appropriately trained health care providers According to the World Health Organization the current global health workforce shortage of 7.2 million providers is estimated to increase to 12.9 million by 2035 This disproportionately affects resource scarce countries denying basic health care to millions and limiting access to life saving treatments Due to limited resources in these countries not enough health professionals receive training few have the opportunity for continuing education and the ability to develop or implement educational programs and curricula is constrained Additionally many existing providers choose to emigrate in pursuit of professional advancement opportunities contributing to the overall shortage of qualified health care providers in these environments Efforts to strengthen health workforce capacity not only increases access safety and availability of care but is critical to building

resilient health systems capable of caring for the world's neediest populations. This requires not only cultivating new health care providers but also providing ongoing professional development to retain and support current providers, advancing the level of practice in accordance with current clinical science, cultivating educators and enhancing training curricula. It is critical also to contribute to the limited body of research documenting the effectiveness and impact of various models of collaborative education and partnership to improve health worker training and retention. This Research Topic examines strategies for building health workforce capacity through the prism of educational partnerships, offering significant examples of effective models of international collaborative education as well as insight and guidance on the structure and operation of successful global partnerships. Collectively, the 31 articles accepted and included in this eBook represent a diversity of health professions and geographies across academic, non-governmental organizations and other global partnership forms. The published manuscripts highlight various elements of partnerships with several consistent themes emerging: capacity building, local empowerment, mutual trust and respect, long-term commitment, equity, collaboration, and the importance of integrating theory and practice for a balance of academic and clinical development. The manuscripts provide examples of partnership and educational programs that are in the formative, early stages of implementation and others which have been sustained long-term, some for decades. The following eBook is divided into two parts, with each part broken down into sections. Part I of the eBook includes 18 manuscripts that showcase long-term educational programs that strongly exemplify multiple foundational aspects of international partnerships in education, including mutual collaboration and project management, empowerment of host partners to lead and sustain programs and capacity building. While individual manuscripts included in Part I look broadly at multiple aspects of successful international partnerships in education, Part II manuscripts focus intently on one or two elements. Part II includes 13 articles that highlight partnership through short rather than long-term educational initiatives as well as program development and broad academic partnerships. This Research Topic was sponsored by Health Volunteers Overseas, a United States-based non-profit that collaborates with over eighty international universities and health institutions to send volunteer health professionals to low resource countries to provide continuing education, train the trainer courses, professional support and consultation on academic program and curricula development.

Strategy and Structure Alfred Dupont Chandler, 1966. Investigates the changing strategy and structure of the large industrial enterprise in the United States.

Strategy and Structure Alfred D. Chandler, Jr., 1969-08-15. This book shows how the seventy largest corporations in America have dealt with a single economic problem: the effective administration of an expanding business. The author summarizes the history of the expansion of the nation's largest industries during the past hundred years and then examines in depth the modern decentralized corporate structure as it was developed independently by four companies: du Pont, General Motors, Standard Oil, New Jersey, and Sears Roebuck. This 1990 reprint includes a new introduction by the author.
