Recent Philosophers A Supplement To A Hundred Years Of Philosophy:

Recent Philosophers John Arthur Passmore, 1985 Recent Philosophers John Passmore, 1988 A Hundred Years of English Philosophy N. Milkov, 2013-11-11 This book is a historical investigation of the leading philosophical movement in England in the twentieth century In seven chapters the intellectual development of the most prominent representatives of analytic philosophy Moore Russell and Wittgenstein in Cambridge and Ryle Austin Strawson and Dummett in Oxford is traced The book does not aim however at delivering a story This means above all that generalisations and conclusions are reduced to a minimum an approach adopted in an endeavour to avert the danger of subjectivism that interpreting the philosophers under scrutiny would impose My hope is that by following this approach my investigation will stimulate readers to make their own generalisations and conclusions on the basis of the objectively presented data Instead my aim is to articulate a flawless comprehensive description of the philosophical texts of the seven most significant analytic philosophers in England in the twentieth century For this purpose all their articles and books have been sifted through in order to pick out the most representative parts For obvious reasons only the chapters on Russell and Wittgenstein and to a lesser extent the chapter on Moore are more theoretical Major Realist Film Theorists Ian Aitken, 2016-05-31 From the 1910s to the emergence of structuralism and post structuralism in the 1960s the writings of John Grierson Siegfried Kracauer Andre Bazin and Georg Lukacs dominated realist film theory In this critical anthology the first collection to address their work in one volume a wide range of international scholars explore the interconnections between their ideas and help generate new understandings of this important if neglected field Challenging preconceptions about classical theory and the nature of realist representation and in the process demonstrating how this body of work can be seen as a cohesive theoretical model this invaluable collection will help return the realist paradigm of film theory to the forefront of academic enquiry **Realism and Truth** Michael Devitt, 1997-01-12 In a provocative thesis philosophy professor Michael Devitt argues for a thoroughgoing realism about the common sense and scientific physical world and for a corresponding notion of truth contrary to the opinions of anti realists such as Putnam Dummett van Fraassen and others This second edition includes a new Afterword by the author

The Future of the Cognitive Revolution David Johnson, Christina Erneling, 1997-04-24 The basic idea of the particular way of understanding mental phenomena that has inspired the cognitive revolution is that as a result of certain relatively recent intellectual and technological innovations informed theorists now possess a more powerfully insightful comparison or model for mind than was available to any thinkers in the past The model in question is that of software or the list of rules for input output and internal transformations by which we determine and control the workings of a computing machine's hardware Although this comparison and its many implications have dominated work in the philosophy psychology and neurobiology of mind since the end of the Second World War it now shows increasing signs of losing its once virtually unquestioned preeminence Thus we now face the question of whether it is possible to repair and save this model by means of relatively

inessential tinkering or whether we must reconceive it fundamentally and replace it with something different In this book twenty eight leading scholars from diverse fields of cognitive science linguistics psychology neurophysiology and philosophy present their latest carefully considered judgements about what they think will be the future course of this intellectual movement that in many respects has been a watershed in our contemporary struggles to comprehend that which is crucially significant about human beings Jerome Bruner Noam Chomsky Margaret Boden Ulric Neisser Rom Harre Merlin Donald among others have all written chapters in a non technical style that can be enjoyed and understood by an inter disciplinary audience of psychologists philosophers anthropologists linguists and cognitive scientists alike

Realist film theory and cinema Ian Aitken,2019-01-04 Realist film theory and cinema embraces studies of cinematic realism and 19th century tradition the realist film theories of Luk cs Grierson Bazin and Kracauer and the relationship of realist film theory to the general field of film theory and philosophy This is the first book to attempt a rigorous and systematic application of realist film theory to the analysis of particular films The book suggests new ways forward for a new series of studies in cinematic realism and for a new form of film theory based on realism It stresses the importance of the question of realism both in film studies and in contemporary life Aitken s work will be of interest to scholars and advanced students of film studies literary studies media studies cultural studies and philosophy

Ethical Relativism and Universalism Saral Jhingran,2001-01-01 The present work addresses itself to one of the most hotly debated issues in contemporary ethics relativism Relativism has become a formidable argument in Western socio moral thought under the impact of postmodern writings The author presents a detailed critique of various relativist and postmodernist theses without rejecting some of their empirically justified observations She underscores the fact that the intercultural communication which has been going on since time immemorial puts a question mark to the postmodernist theories of indeterminacy of translation incommensurability of various conceptual frameworks etc The author supports cognitivism in ethics according to which the moral properties of the object of moral judgement do in some way determine or cause that judgment This view is not to be confused with any realist ontological commitment She asserts that universalizability is the necessary condition of all rational judgments including the moral ones The author also discusses the relationship between self and others and in this context she draws upon the insights of ancient Indian thinkers She proposes that minimum moral principles and maxims can be agreed upon through reasoning and intercultural discourse

The Future of the Cognitive Revolution David Martel Johnson,Christina E. Erneling (ed),1997 The basic idea of the particular way of understanding mental phenomena that has inspired the cognitive revolution is that as a result of certain relatively recent intellectual and technological innovations informed theorists now possess a more powerfully insightful comparison or model for mind than was available to any thinkers in the past The model in question is that of software or the list of rules for input output and internal transformations by which we determine and control the workings of a computing machine s hardware Although this comparison and its many implications have dominated work in

Film Theory and Contemporary Hollywood Movies Warren Buckland,2009-06-03 Film theory no longer gets top billing or plays a starring role in film studies today as critics proclaim that theory is dead and we are living in a post theory moment While theory may be out of the limelight it remains an essential key to understanding the full complexity of cinema one that should not be so easily discounted or discarded In this volume contributors explore recent popular movies through the lens of film theory beginning with industrial economic analysis before moving into a predominately aesthetic and interpretive framework The Hollywood films discussed cover a wide range from 300 to Fifty First Dates from Brokeback Mountain to Lord of the Rings from Spider Man 3 to Fahrenheit 9 11 from Saw to Raiders of the Lost Ark and much more Individual essays consider such topics as the rules that govern new blockbuster franchises the posthumanist realism of digital cinema video game adaptations increasingly restricted stylistic norms the spatial stories of social networks like YouTube the mainstreaming of queer culture and the cognitive paradox behind enjoyable viewing of traumatic events onscreen With its cast of international film scholars Film Theory and Contemporary Hollywood Movies demonstrates the remarkable contributions theory can offer to film studies and moviegoers alike

Idealism and Praxis Michele Marsonet,2013-05-02

This work manages to present a complete and informative overview of Nicholas Rescher's philosophy. A prominent representative of contemporary pragmatism and of 20th century's thought at large, Rescher wrote an impressive amount of volumes and essays on a wide variety of philosophical topics. The present book purports to make his theses and theories accessible in one single volume. Moreover, it provides an apparatus of references to the relevant literature produced by Rescher's critics and positions his work in the wider setting of its links with various contemporary American and European philosophers. The mixture of pragmatism and idealism typical of Rescher's stance is carefully taken into account along with his contributions to logic, philosophy of science, metaphysics, theory of knowledge, ethics, social and political philosophy.

□ Kai-Hung Liao, 2017-09-01. **Fifty Key Thinkers on the Environment** Joy A. Palmer, David E. Cooper, David Cooper, 2002-09-11. *Fifty Key Thinkers on the Environment* is a unique guide to environmental thinking through the ages. Joy A. Palmer herself, an important and prolific author on environmental matters, has assembled a team of thirty-five expert contributors to summarize and analyse the thinking of fifty diverse and stimulating figures from all over the world and from ancient times to the present day. Among those included are philosophers such as Rousseau, Spinoza and Heidegger; activists such as Chico Mendes; literary giants such as Virgil, Goethe and Wordsworth; major religious and spiritual figures such as the Buddha and St Francis of Assisi. Lucid, scholarly and informative, these fifty essays offer a fascinating overview of mankind's view and understanding of the physical world. **Knowledge and Persuasion in Economics** Deirdre N.

McCloskey, 1994-05-05. Is economics a science? Deirdre McCloskey says Yes, but Yes, economics measures and predicts, but like other sciences it uses literary methods too. Economists use stories as geologists do and metaphors as physicists do. The result is that the sciences/economics among them must be read as rhetoric in the sense of writing with intent. McCloskey's books *The Rhetoric of Economics* (1985) and *If You're So Smart* (1990) have been widely discussed. In *Knowledge and Persuasion in Economics* he converses with his critics, suggesting that they too can gain from knowing their rhetoric. The humanistic and

mathematical approaches to economics says McCloskey fit together in a new interpretive economics Along the way he places economics within the sciences examines the role of mathematics in the field replies to critics from the left right and centre and shows how economics can again take a leading place in the conversation of humankind Ludwig Wittgenstein Stuart Shanker,1986 **Walford's Guide to Reference Material: Social and historical sciences, philosophy and religion** Albert John Walford,Marilyn Mulla,Priscilla Schlicke,Library Association,1999 A revised and updated guide to reference material It contains selective and evaluative entries to guide the enquirer to the best source of reference in each subject area be it journal article CD ROM on line database bibliography encyclopaedia monograph or directory It features full critical annotations and reviewers comments and comprehensive author title and subject indexes The contents include philosophy and psychology religion social sciences sociology statistics politics economics labour and employment land and property business organizations finance and banking and economic surveys economic policies and controls trade and commerce business and management and law public administration social services and welfare education customs and traditions geography biography and history **The Philosophical Quest** Brenda Almond,1988
