Recent social psychological research demonstrates that certain types of mental simulations are particularly useful for helping individuals reach the things they envision (e.g., Taylor, Plana, Rivlin, & Armer, 1998). More specifically, Taylor's (1998, 1999; Taylor et al., 1998) recent research indicates that the most successful simulation focus on the process of achieving a goal rather than on the resources or outcomes of the goal. In this article, we extend simulations of persuasive versus outcome-focus and thought in advertising. In studies manipulating the focus of participants' thoughts while viewing a print advertisement, we find that process-focused thought results in significantly higher behavioral intentions than an outcome-focused thought when advertisement arguments are strong. However, in the case of weak advertisement arguments, process-focused thought actually lowers behavioral intentions compared to thoughts focusing on the end result or outcome of product usage. Thus, in addition to increasing the persuasive power of strong advertising claims, process-focused thinking appears to make individuals better or more discerning consumers who do not form behavioral intentions when it is inappropriate to do so.

In the popular press, self-help writers commonly advise people to simulate favorable outcomes and consequences to motivate successful achievement of individual goals (e.g., Penning, 1991; Potts, 1992). Some examples include visualizing one's self enjoying the benefits of losing or attaining one's financial goals or simulating one's self making the free throw shot that wins the basketball game (as opposed to imagining practicing free throw shots). Advertising also encourages consumers to simulate favorable outcomes of using products. A recent television advertisement for a luxury automobile was filmed from the driver's seat. The car is stopped at an intersection with a car next to it. The announcer says, "Imagine this is your only chance to make an impression. What type of impression would you like to leave?" In another advertising campaign, the California lottery encourages consumers to "Watch a little

dream" of how they would spend their millions, were they to win. In these advertisements and many others, marketers encourage viewers to imagine positive outcomes of product usage.

Thus, in both the self-help domain and advertising, most instructions to simulate appear to focus on the enjoyment of achieved positive outcomes—on "eyes on the prize" focus. Recent research in social psychology, however, indicates that by focusing on the processes involved in goal-directed activities rather than on favorable outcomes, people are better able to achieve their goals (see the discussion of process-focused thoughts and its implications for the self-help literature provided in Taylor, Plana, Rivlin, & Armer, 1998). The purpose of this article is to explore the distinction between outcome- and process-focused mental simulations as a possible tool for designing persuasive advertisements. In applying this research to the advertising domain, we extend current literature on process-focused mental simulation by demonstrating that the strength of a persuasive communication moderates the effect of simulation type (process vs. outcome) on behavioral intentions.

## Recent Thought In Focus:

The New Thought Movement in Healthcare Gabriel Andrade, 2025-05-17 This book delves into the evolution of the New Thought Movement and its pervasive influence on modern healthcare. The book begins by tracing the roots of the New Thought Movement originating in the 19th century, emphasizing the power of the mind in healing and personal development. Over time, this philosophy morphed into the contemporary positive thinking industry, becoming a significant component of Western self-help culture. The book explores how these ideas have become a contentious point in today's culture wars, polarized between supporters who credit it for personal empowerment and critics who highlight its limitations and potential harm. Central to the discussion is an in-depth analysis of the New Thought philosophy's impact on the healthcare industry. While acknowledging the potential benefits, such as motivating patients to adopt healthier lifestyles and fostering a sense of personal agency, the book critically examines how this philosophy's emphasis on mental positivity can lead to victim-blaming. It argues that oversimplifying health issues by attributing them solely to personal mindset obscures the multifaceted reality of health, particularly the significant role of social determinants of health and systemic inequities. This critique underscores how attributing illness to insufficient positive thinking can perpetuate stigma and neglect the socio-economic and environmental factors critical for understanding and addressing health challenges. By offering a nuanced perspective, the book aims to catalyze discussions on integrating mindful optimism with a holistic acknowledgment of the complexities inherent in healthcare, striving for a more balanced and equitable approach.

**The Unforgettables** Charles C. Eldredge, 2022-11 In the past, histories of American art have traditionally highlighted the work of a familiar roster of artists, often white and male. Over time, the achievements of others worthy of attention, including numerous women and artists of color as well as white men, have gone uncelebrated and fallen into obscurity. In this collection of essays, sixty-three scholars from various institutions, specialties, and locales respond to the challenge to nominate one maker deserving remembrance and detail the reasons for their choice. The collection is headed by a preface from editor Charles C. Eldredge explaining the genesis of the anthology and an introduction by Dr. Kirsten Pai Buick promoting the value of recovered reputations and oeuvres in the training of future art experts and audiences.

*A Comparison of World Religions* Mary M. Saurer, 2005-11-22 Human beings have inhabited

the world for millions of years and the oldest religious art found in caves and on bones dates as far back as 30 000 years From earliest times and still today people share their ideas and form a group with others who have drawn similar conclusions about the meaning of life and the ultimate reality They might call their group a religion others might call it a cult But the name they give to their concept of God does not mean that they worship a different god only that they hold a different concept of the Source and Power of that which was is and always will be Every religion serves as a way of life an opportunity to practice ones accepted beliefs and a way to socialize with those who hold similar views Religions can be dictated but beliefs cannot They are private and unique to the individual It is ones own experience with that which he or she perceives as God that prompts the acceptance of a belief system quiet endurance when there seems to be no choice or the withdrawal from religion altogether Public and personal wars have been fought in the name of righteous indignation in support of different belief systems that came from efforts to answer the questions of life Many individuals have lived lives of frustration and confusion as a result of the commonly accepted belief system of the culture into which they were born In this study we look briefly at the historical and geographical conditions related to the emergence of specific religious views and the situation of the people whose lives are influenced by them Our intent is not to determine which religion is right or wrong Using a comparison point chart we examine the basic premises of each belief system and how the holding of a premise impacts the lives of those who live it as if it were true

Evangelicalism Richard Kyle,2017-09-20 Most forms of religion are best understood in the con text of their relationship with the surrounding culture This may be particularly true in the United States Certainly immigrant Catholicism became Americanized mainstream Protestantism accommodated itself to the modern world and Reform Judaism is at home in American society In Evangelicalism Richard Kyle explores paradoxical adjustments and transformations in the relationship between conservative Protestant Evangelicalism and contemporary American culture Evangelicals have resisted many aspects of the modern world

but Kyle focuses on what he considers their romance with popular culture Kyle sees this as an Americanized Christianity rather than a Christian America but the two are so intertwined that it is difficult to discern the difference between them Instead in what has become a vicious self serving cycle Evangelicals have baptized and sanctified secular culture in order to be considered culturally relevant thus increasing their numbers and success within abundantly populous and populist driven American society In doing so Evangelicalism has become a middle class movement one that dominates America s culture and unabashedly populist Many Evangelicals view America as God s chosen nation thus sanctifying American culture consumerism and middle class values Kyle believes Evangelicals have served themselves well in consciously and deliberately adjusting their faith to popular culture Yet he also thinks Evangelicals may have compromised themselves and their future in the process so heavily borrowing from the popular culture that in many respects the Evangelical subculture has become secularism with a light gilding of Christianity If so he asks can Evangelicalism survive its own popularity and reaffirm its religious origins or will it assimilate and be absorbed into what was once known as the Great American Melting Pot of religions and cultures Will the Gospel of the American dream ultimately engulf and destroy the Gospel of Evangelical success in America This thoughtful and thought provoking volume will interest anyone concerned with the modern day success of the Evangelical movement in America and the aspirations and fate of its faithful
