**The Scientific Bases for the Preservation of the Hawaiian Crow** National Research Council, Division on Earth and Life Studies, Commission on Life Sciences, Committee on the Scientific Bases for the Preservation of the Hawaiian Crow, 1992-02-01 The Hawaiian Crow or Alala once an inhabitant of large forested areas of Hawaii is now found only in the wild in a relatively small area of the central Kona coast The decline of the Alala is part of a larger phenomenon of reduction and extinction of forest birds throughout Polynesia that has been associated with human colonization It is a symptom of underlying ecological problems In this book a committee of experts in ornithology captive propagation conservation biology population genetics and ecology analyzes existing data about the Alala and details its findings conclusions and recommendations concerning recovery efforts for this endangered bird The Scientific Bases for Preservation of the Mariana Crow Committee on the Scientific Bases for the Preservation of the Mariana Crow, Commission on Life Sciences, Division on Earth and Life Studies, National Research Council, 1997-03-21 This book while focusing on current preservation challenges posed by the Aga or Mariana crow also reflects the larger issues and challenges of biodiversity conservation in all oceanic island ecosystems It evaluates causes for the continuing decline of the Aga which exists on only the two southernmost islands in the Mariana archipelago Guam and Rota and reviews actions to halt or reverse the decrease This book reminds us of the importance and challenge of preserving the unique environmental heritage of islands of the Mariana archipelago the need for increased knowledge to restore and maintain native species and habitats and the compelling and lasting value of extensive public education to stimulate environmentally informed public policy development *New and Forthcoming Books* National Academy Press (U.S.), 1993 **Our Common Journey** National Research Council, Policy and Global Affairs, Policy Division, Board on Sustainable Development, 1999-11-09 World human population is expected to reach upwards of 9 billion by 2050 and then level off over the next half century How can the transition to a stabilizing population also be a transition to sustainability How can science and technology help to ensure that human needs are met while the planet's environment is nurtured and restored Our Common Journey examines these momentous questions to draw strategic connections between scientific research technological development and societies efforts to achieve environmentally sustainable improvements in human well being The book argues that societies should approach sustainable development not as a destination but as an ongoing adaptive learning process Speaking to the next two generations it proposes a strategy for using scientific and technical knowledge to better inform future action in the areas of fertility reduction urban systems agricultural production energy and materials use ecosystem restoration and biodiversity conservation and suggests an approach for building a new research agenda for sustainability science Our Common Journey documents large scale historical currents of social and environmental change and reviews methods for what if analysis of possible future development pathways and their implications for sustainability The book also identifies the greatest threats to

sustainability in areas such as human settlements agriculture industry and energy and explores the most promising opportunities for circumventing or mitigating these threats It goes on to discuss what indicators of change from children s birth weights to atmosphere chemistry will be most useful in monitoring a transition to sustainability *Watching, from the Edge of Extinction* Beverly Peterson Stearns, Stephen C. Stearns, 2000-01-01 Annotation In this mesmerizing series of interviews with dedicated people who work to save endangered species throughout the world an alarming truth emerges the obstacles of human politics greed corruption folly and hypocrisy can present as much danger to a species survival as biological causes The dramatic lessons of this book shed new light on the problems of declining species and offer hope that we may yet change their fate **Bibliography of Agriculture with Subject Index** ,1993-03 **Resurrection Science** M. R. O'Connor, 2015-09-15 A Library Journal Best Book of 2015 A Christian Science Monitor Top Ten Book of September In a world dominated by people and rapid climate change species large and small are increasingly vulnerable to extinction In *Resurrection Science* journalist M R O Connor explores the extreme measures scientists are taking to try and save them from captive breeding and genetic management to de extinction Paradoxically the more we intervene to save species the less wild they often become In stories of sixteenth century galleon excavations panther tracking in Florida swamps ancient African rainforests Neanderthal tool making and cryogenic DNA banks O Connor investigates the philosophical questions of an age in which we play god with earth s biodiversity Each chapter in this beautifully written book focuses on a unique species from the charismatic northern white rhinoceros to the infamous passenger pigeon and the people entwined in the animals fates Incorporating natural history and evolutionary biology with conversations with eminent ethicists O Connor s narrative goes to the heart of the human enterprise What should we preserve of wilderness as we hurtle toward a future in which technology is present in nearly every aspect of our lives How can we co exist with species when our existence and their survival appear to be pitted against one another *Feather Trails* Sophie A. H. Osborn, 2024-05-02 Named ABA Birding Book Club s Best Book of the Year This book deserves to be read widely because it is only in coming to understand these animals suggests Osborn that we can choose to love and help them New Scientist The story of one woman s remarkable work with a trio of charismatic endangered bird species and her discoveries about the devastating threats that imperil them In *Feather Trails* wildlife biologist and birder Sophie A H Osborn reveals how the harmful environmental choices we ve made including pesticide use the introduction of invasive species lead poisoning and habitat destruction have decimated Peregrine Falcons Hawaiian Crows and California Condors In the Rocky Mountains the cloud forests of Hawai i and the Grand Canyon Sophie and her colleagues work day to day to try to reintroduce these birds to the wild even when it seems that the odds are steeply stacked against their survival With humor and suspense *Feather Trails* introduces us to the fascinating behaviors and unique personalities of Sophie s avian charges and shows that what endangers them ultimately threatens all life on our planet More than a deeply researched environmental investigation *Feather Trails* is also a personal journey and human story

in which Sophie overcomes her own obstacles among them heat exhaustion poachers rattlesnakes and chauvinism Ultimately Feather Trails is an inspiring poignant narrative about endangered birds and how our choices can help to ensure a future not only for the rarest species but for us too An intimate look at the wonder and effort needed for working with endangered species in the wild Osborn's matter of fact writing style and wry humor make the reader part of the action Booklist starred review

**In the Company of Crows and Ravens** John M. Marzluff, Tony Angell, 2008-10-01 Crows and people share similar traits and social strategies To a surprising extent to know the crow is to know ourselves from the Preface From the cave walls at Lascaux to the last painting by Van Gogh from the works of Shakespeare to those of Mark Twain there is clear evidence that crows and ravens influence human culture Yet this influence is not unidirectional say the authors of this fascinating book people profoundly influence crow culture ecology and evolution as well John Marzluff and Tony Angell examine the often surprising ways that crows and humans interact The authors contend that those interactions reflect a process of cultural coevolution They offer a challenging new view of the human crow dynamic a view that may change our thinking not only about crows but also about ourselves Featuring more than 100 original drawings the book takes a close look at the influences people have had on the lives of crows throughout history and at the significant ways crows have altered human lives In the Company of Crows and Ravens illuminates the entwined histories of crows and people and concludes with an intriguing discussion of the crow human relationship and how our attitudes toward crows may affect our cultural trajectory

*Seeking the Sacred Raven* Mark Jerome Walters, 2012-09-26 Will the Alala ever return to the wild A bird sacred to Hawaiians and a member of the raven family the Alala today survives only in captivity How the species once flourished how it has been driven to near extinction and how people struggled to save it is the gripping story of Seeking the Sacred Raven For years author Mark Jerome Walters has tracked the sacred bird's role in Hawaiian culture and the indomitable Alala's sad decline Trekking through Hawaii's rain forests high on Mauna Loa talking with biologists landowners and government officials he has woven an epic tale of missed opportunities and the best intentions gone awry A species that once numbered in the thousands is now limited to about 50 captive birds Seeking the Sacred Raven is as much about people and culture as it is about failed policies From the ancient Polynesians who first settled the island to Captain Cook in the 18th century to would be saviors of the Alala in the 1990s individuals with conflicting passions and priorities have shaped Hawaii and the fate of this dwindling cloud forest species Walters captures brilliantly the internecine politics among private landowners scientists environmental groups individuals and government agencies battling over the bird's habitat and protection It's only one species only one bird but Seeking the Sacred Raven illustrates vividly the many dimensions of species loss for the human as well as non human world

**Science and the Endangered Species Act** National Research Council, Commission on Life Sciences, Board on Environmental Studies and Toxicology, Committee on Scientific Issues in the Endangered Species Act, 1995-10-13 The

Endangered Species Act ESA is a far reaching law that has sparked intense controversies over the use of public lands the rights of property owners and economic versus environmental benefits In this volume a distinguished committee focuses on the science underlying the ESA and offers recommendations for making the act more effective The committee provides an overview of what scientists know about extinction and what this understanding means to implementation of the ESA Habitat its destruction conservation and fundamental importance to the ESA is explored in detail The book analyzes Concepts of species how the term species arose and how it has been interpreted for purposes of the ESA Conflicts between species when individual species are identified for protection including several case studies Assessment of extinction risk and decisions under the ESA how these decisions can be made more effectively The book concludes with a look beyond the Endangered Species Act and suggests additional means of biological conservation and ways to reduce conflicts It will be useful to policymakers regulators scientists natural resource managers industry and environmental organizations and those interested in biological conservation

Conservation Biology of Hawaiian Forest Birds Thane K. Pratt, Carter T. Atkinson, Paul C. Banko, Bethany L. Woodworth, James D. Jacobi, 2009-01-01 Hawaii's forest bird community is the most insular and most endangered in the world and serves as a case study for threatened species globally Ten have disappeared in the past thirty years nine are critically endangered and even common species are currently in decline Thane K Pratt his coeditors and collaborators all leaders in their field describe the research and conservation efforts over the past thirty years to save Hawaii's forest birds They also offer the most comprehensive look at the reasons for these extinctions and attempts to overcome them in the future Among the topics covered in this book are trends in bird populations environmental and genetic factors limiting population size avian diseases predators and competing alien bird species Color plates by award winning local photographer Jack Jeffrey illustrate all living species discussed or described
