Ignorance and Surprise Matthias Gross, 2021-08-03 The relationship between ignorance and surprise and a conceptual framework for dealing with the unexpected as seen in ecological design projects Ignorance and surprise belong together surprises can make people aware of their own ignorance And yet perhaps paradoxically a surprising event in scientific research one that defies prediction or risk assessment is often a window to new and unexpected knowledge In this

book Matthias Gross examines the relationship between ignorance and surprise proposing a conceptual framework for handling the unexpected and offering case studies of ecological design that demonstrate the advantages of allowing for surprises and including ignorance in the design and negotiation processes Gross draws on classical and contemporary sociological accounts of ignorance and surprise in science and ecology and integrates these with the idea of experiment in society He develops a notion of how unexpected occurrences can be incorporated into a model of scientific and technological development that includes the experimental handling of surprises Gross discusses different projects in ecological design including Chicago's restoration of the shoreline of Lake Michigan and Germany's revitalization of brownfields near Leipzig These cases show how ignorance and surprise can successfully play out in ecological design projects and how the acknowledgment of the unknown can become a part of decision making The appropriation of surprises can lead to robust design strategies Ecological design Gross argues is neither a linear process of master planning nor a process of trial and error but a carefully coordinated process of dealing with unexpected turns by means of experimental practice

Ten Tantalising Truths John Gribbin, 2023-10-26 Obvious questions do not always have obvious answers John Gribbin is known for giving us simple explanations of big concepts in science But there is another way to probe the mysteries of the Universe and our place in it Faced with persistent enquiries from his grandchildren Gribbin realised that simple questions such as Why is the sky blue sometimes require big answers understandable in straightforward language In answering those simple questions he discovered that he was telling the story of our place in the Universe from the Big Bang to the evolutionary reasons why men are on average bigger than women The questions may be obvious but the answers are sometimes surprising and highlight one of the main joys of science discovering the unexpected In this book Gribbin invites the reader to join him on this voyage of discovery where you may think you already know the answers but should be prepared to be surprised or at least tantalised by the truth

Scientific Surprises Sally Kindberg, 1986 *Too Good to Be True?* Laney Rosenzweig MS LMFT, 2022-07-29 Accelerated Resolution Therapy or ART for short may be one of the most important therapies you may not know about This book weaves information about the therapy with the Developer Laney Rosenzweig's autobiographical story In straightforward language she explains how the therapy has helped people from all walks of life in all sorts of situations ART is a special eye movement therapy that can help people to make astonishing changes Some have said It's too good to be true but clients will tell you that it has helped them overcome trauma often after only one session Get answers to questions such as How did the author develop the therapy and why What do you need to do the therapy Is ART mind control How has the therapy been used With ART therapy the onus of change is squarely on the client's shoulders where it should be Clinicians don't have to do the heavy lifting This alleviates compassion fatigue so clinicians can leave a therapy session feeling as light as the client

McElheny,2012-07-31 Drawing the Map of Life is the dramatic story of the Human Genome Project from its origins through the race to order the 3 billion subunits of DNA to the surprises emerging as scientists seek to exploit the molecule of heredity It s the first account to deal in depth with the intellectual roots of the project the motivations that drove it and the hype that often masked genuine triumphs Distinguished science journalist Victor McElheny offers vivid insightful profiles of key people such as David Botstein Eric Lander Francis Collins James Watson Michael Hunkapiller and Craig Venter McElheny also shows that the Human Genome Project is a striking example of how new techniques such as restriction enzymes and sequencing methods often arrive first shaping the questions scientists then ask Drawing on years of original interviews and reporting in the inner circles of biological science Drawing the Map of Life is the definitive up to date story of today s greatest scientific quest No one who wishes to understand genome mapping and how it is transforming our lives can afford to miss this book Classifying the Cosmos Steven J. Dick,2019-03-21 Since the invention of the telescope 400 years ago astronomers have rapidly discovered countless celestial objects But how does one make sense of it all Astronomer and former NASA Chief Historian Steven J Dick brings order to this menagerie by defining 82 classes of astronomical objects which he places in a beginner friendly system known as Astronomy s Three Kingdoms Rather than concentrating on technicalities this system focuses on the history of each object the nature of its discovery and our current knowledge about it The ensuing book can therefore be read on at least two levels On one level it is an illustrated guide to various types of astronomical wonders On another level it is considerably more the first comprehensive classification system to cover all celestial objects in a consistent manner Accompanying each spread are spectacular historical and modern images The result is a pedagogical tour de force whereby readers can easily master astronomy s three realms of planets stars and galaxies Khrushchev's Strategy and Its Meaning for America University of Pennsylvania. Foreign Policy Research Institute,United States. Congress. Senate. Committee on the Judiciary,1960 **One Hundred Centuries Of Solitude** James Flynn,James Chalmers,Doug Easterling,Roger Kasperson,Howard Kunreuther,2019-06-04 Time is both the ally of high level nuclear waste HLNW managers and the enemy It is the ally because the radioactivity in elements and isotopes decreases with age making the waste progressively less dangerous to human health and safety and the environment This rate of radioactive decline varies in some cases diminishing by half the

half life in seconds minutes hours days weeks months or years In other cases the decay process takes centuries or hundreds of thousands of years before the wastes are safe for human contact The problem as now conceptualized for HLNW managers is simple to state if not easy to achieve The HLNW needs to be secured in some fashion until it decays by virtue of its physical nature to safe levels Another possible future solution not currently available might be to change the ructure of HLNW through high technology processing and thus decompose the waste into units with different and less lengthy radioactivity Learning whether this processing is a future option will require patience and generous amounts of time for research

1980 NASA authorization United States. Congress. House. Committee on Science and Technology. Subcommittee on Space Science and Applications,1978 **Life Adrift** Andrew Baldwin,Giovanni Bettini,2017-05-24 Life Adrift critically engages with two of the most defining issues of our contemporary global political economy migration and climate change In their own right both are discrete areas of politics theory practice and resistance But as climate and migration are increasingly imagined together as a singular relation they are giving rise to new horizons of meaning in politics philosophy media art and literature Life Adrift is a collection of essays from across the interpretive social sciences and humanities which treats climate change and migration as a relation that demands theoretical and historical explanation rather than a problem requiring technical and expert solutions The result is a unique collection offering readers a means for reconceptualising migration and environmental changes as a site of politics and of political possibility Along the way it addresses a range of topics current in cultural and political theory including democracy place neoliberalism humanism materiality borders affect race and sexuality If climate change stands to redistribute humans and material across the globe then Life Adrift offers a set of critical resources for analysing this coming phenomenon and reimagining what it might mean to be political in a fully immanent world of bodies in flux Why Study Biology by the Sea? Karl S. Matlin,Jane Maienschein,Rachel A. Ankeny,2020-03-12 For almost a century and a half biologists have gone to the seashore to study life The oceans contain rich biodiversity and organisms at the intersection of sea and shore provide a plentiful sampling for research into a variety of questions at the laboratory bench How does life develop and how does it function How are organisms that look different related and what role does the environment play From the Stazione Zoologica in Naples to the Marine Biological Laboratory in Woods Hole the Amoy Station in China or the Misaki Station in Japan students and researchers at seaside research stations have long visited the ocean to investigate life at all stages of development and to convene discussions of biological discoveries Exploring the history and current reasons for study by the sea this book examines key people institutions research projects organisms selected for study and competing theories and interpretations of discoveries and it considers different ways of understanding research such as through research repertoires A celebration of coastal marine research *Why Study Biology by the Sea* reveals why scientists have moved from the beach to the lab bench and back *The Collected Writings of Hermann August Seger ...* Hermann August Seger,1903
