## **Scientific Study Of Mummies:**

*The Scientific Study of Mummies* Arthur C. *The Scientific Study of Mummies* Arthur C. Aufderheide, 2003 **Review of** DH. Ubelaker, 2004 Occasionally forensic scientists are requested to examine mummified remains Even relatively recent remains can become mummified under certain conditions Preserved soft tissue of great antiquity from archeological contexts also can become the subject of forensic analysis Such cases can prove challenging for the forensic scientist because many different factors can lead to unusual soft tissue preservation and human curiosity and travel can disperse such materials continents away from their original sources Analysis of such cases requires not only specialized techniques and knowledge associated with preserved soft tissue but also awareness of the geographical and temporal range of cultural practices that can result in such preservation This new book provides an overview of the relevant issues and a unique summary of the information needed to properly interpret mummified remains **Ortner's**

**The Virtopsy Approach** Michael Thali, Richard Dirnhofer, Peter Vock, 2009-05-14 Charred badly decomposed or mummified corpses as well as those restrictions forced upon coroners by certain religious sects often make autopsies impossible to perform In addition lack of manpower among the personnel charged with performing autopsies frequently creates a backlog of cases in the coroner's office This delay increases the likelihood

**The Materiality and Spatiality of Death, Burial and Commemoration** Christoph Klaus Streb, Thomas Kolnberger, 2021-09-28 Death dying and burial produce artefacts and occur in spatial contexts The interplay between such materiality and the bereaved who commemorate the dead yields interpretations and creates meanings that can change over time Materiality is more than simple matter void of meaning or relevance The apparent inanimate has meaning It is charged with significance has symbolic and interpretative value perhaps a form of selfhood which originates from the interaction with the animate In our case gravestones bodily remains and the spatial order of the cemetery are explored for their material agency and relational constellations with human perceptions and actions Consciously and unconsciously by interacting with such materiality one is creating meaning while materiality retroactively provides a form of agency Spatiality provides more than a mere context it permits and shapes such interaction Thus artefacts mementos and memorials are exteriorised materialised and spatialized forms of human activity they can be understood as cultural forms the function of which is to sustain social life However they are also the medium through which values ideas and criteria of social distinction are reproduced legitimised or transformed This book will explore this interplay by going beyond the consideration of simple grave artefacts on the one hand and graveyards as a space on the other hand to examine the specific interrelationships between materiality spatiality the living and the dead The chapters in this book were originally published as a special issue of the journal *Mortality*
