Scientist As Editor:

The Scientist as Editor: Guidelines for Editors of Books and Journals, by Maeve O'Connor, 1979 An Editor's Guide to Writing and Publishing Science Michael E. Hochberg, 2019 This contemporary guide is packed full of expert tips and suggestions which will make the reader think in a fresh creative and novel way about writing and publishing science

Scientific Information Transfer: The Editor's Role M. Balaban, 2012-12-06 It was Faraday who in 1821 said that there are three necessary stages of useful research The first to begin it the second to end it and the third 1 to publish it There has since indeed been so much research and publication that we have become increasingly alarmed by the galloping proliferation of scientific information produced in relation to the user's ability to retrieve and consume it effectively conveniently and creatively In 1948 to deal with this concern the Royal Society Scientific Information Conference held in London spanned the whole realm of scientific information Sir Robert Robinson President of the Royal Society in his opening address noted that the study of scientific information services in all its ramifications has enormous scope and the London conference dealt with scientific publication format editorial policy subject grouping organization abstracting reviews classification indexing and training of information officers It was about this time that information science began to develop more on the retrieval end so it seems logical that the first editors group founded in 1949 was ICSU AB the International Council of Scientific Unions Abstracting Board In 1958 the National Academy of Sciences International Conference of 2 Scientific Information in Washington limited its interests and expanded on the later phases of the life cycle of information storage and retrieval

Medical and Scientific Publishing Jasna Markovac, Molly Kleinman, Michael Englesbe, 2017-11-13 Very few doctors and scientists receive any sort of systematic training in publishing editing and reviewing scholarly articles despite the central importance of that work for scientific research and for their careers Medical and Scientific Publishing will help fill the gap and help readers to Understand processes of scientific and medical publishing Understand the role of an academic in medical publishing Become a better scientific communicator Develop skills to effectively serve as the editor of a medical journal Medical and Scientific Publishing is based on a successful course at the University of Michigan Medical School for third and fourth year medical students The course teaches students not just how to write scientific and medical articles but addresses key issues surrounding copyright ethics open access and much more Students will build a strong foundation on how to do peer review and how to be authors and editors which are important skills in building a professional career **Popular**

Environmental Science - Editor's Picks 2021 Martin Siegert, 2021-11-24 **Frontiers in Earth Science - Editor's Choice 2017** Valerio Acocella, 2018-03-29 2017 has been an exciting year for our innovative open access journal Frontiers in

Earth Science many new articles have been published and are now indexed in Web of Science ESCI new sections have opened for submissions including Solid Earth Geophysics and our Editorial Board has been successfully leading the peer review process and providing comprehensive reviews to our authors Have a look at our archive to read about the feeding habits of dinosaurs human influence on in the African humid period volcanic hazard models or how glaciers flowing into the ocean surrounding Greenland have changed over time Launched at the end of 2013 our Journal consists of several specialties whose number has increased with time and currently stands at 19 also including a few specialties co listed in other fields <https://www.frontiersin.org/journals/earth-science> The present selection is not exhaustive as new ones are being launched and or are under consideration for development This growth has been paralleled by a yearly increase in the number of contributions and the Editorial Board members reflecting the health of the Journal Now also indexed in Web of Science Emerging Sources Citation Index ESCI Frontiers in Earth Science is ambitious to become the leading open access journal in its field The idea of creating an Editor's Choice eBook has been in our minds for a while as we wanted to create an environment for the Chief Editors to highlight their choice of representative papers in the Journal we are happy to present now our first edition The eBook offers a quick though representative window into the different specialties giving additional visibility to some of the most interesting studies published in 2016 and 2017 It provides a glimpse into the state of the art of Earth Science on the cusp of 2020 Earth Science studies the different spheres of the Earth geosphere atmosphere hydrosphere and partly biosphere and as such it provides a holistic perspective of our planet This discipline in addition to understanding our environment enables us to face major natural challenges such as improving the management of natural resources promoting environmental sustainability and forecasting and managing natural hazards Acocella 2015 and references therein On this basis the contributions grouped in this eBook even though appearing distinct in subject methods goal and impact should be considered as different aspects of the same system Indeed the selection of these contributions aims to capture a multidisciplinary and common understanding of our planet with its interconnected processes and challenges It is important to note that in many cases it has not been easy to select a representative study per specialty and thus the papers included in this eBook should therefore not be considered as the representative ones but rather as a concise selection of key papers We hope you enjoy reading our first edition of the Editor's Choice eBook Jessica Journal Manager and Valerio Field Chief Editor

An Editor's Guide to Writing and Publishing Science Michael Hochberg,Alex Cagan,2019 A good research paper is more than just a clear concise scientific expose It is a document that needs to go beyond the science to attract attention There are both strict and less definable norms for doing this but many authors are unaware as to what they are or their use Publishing is rapidly changing and needs to be explained with a fresh perspective Simply writing good clear concise science is no longer enough there is a different mind set now required that students need to adopt if they are to succeed The purpose of this book is to provide the foundations of this new approach for both young scientists at the start of their careers as well as for more experienced scientists to teach the younger generation Most importantly the book will make the reader think in a fresh creative and novel way about writing and publishing science This is an introductory guide suitable for advanced
