Scientists, Politics, and the Rhetoric of Public Controversy Pamela Pietrucci, Leah Ceccarelli, 2025-09-01 This book examines how scientists around the world embrace their responsibility as citizens and how science is being used and abused by non scientists in public spaces As right wing politicians conspiracy theorists and modern robber barons assault science in the current moment it is time for the rhetoric of science to reconceptualize itself as a crisis care discipline The essays in this volume help us do that by scrutinizing particular cases of science activism examining the public modalities of resistance that scientists are increasingly taking up as they modify their public engagement to fit evolving rhetorical situations These essays also reveal how the authority of science is being distorted and exploited by non experts in ways that are more dangerous than ever in the shadow of climate change and global pandemics The book ends with a look at new possibilities for collaboration between local communities and scientists and a reflection on how a rhetorical conception of ethos can help us comprehend the negotiation of asymmetries between experts and laypeople in the current era
