**The Status of Soviet Civil Science** Craig Sinclair,2012-12-06 This volume represents one outcome of the initiatives taken from time to time by the NATO Science Committee to add to the work of supporting civil science within the Alliance by mounting open meetings or other projects dealing with some topical aspect of science and technology policy Past examples have included the 20th anniversary meeting of the establishment of the Science Committee in 1978 which made a review of the achievements of the various programmes It proved to be a valuable opportunity to take stock of the impact of science and technology on Western societies and was a particularly useful occasion for a critical analysis of the changing nature and social role of science and technology In contrast the Science Committee Conferences in 1973 and 1976 on the Technology of Efficient Energy Utilization and on Thermal Energy Storage were responses of the Committee to specific technological problems engendered by the then acute energy supply position A similar technologically oriented study was made in 1975 of the Rational Use of Potentially Scarce Metals These initiatives were the counterpoint to the bulk of the continuing work of the Committee in funding scientific mobility in the Alliance as support to civil science This latter is done competitively in response to unsolicited applications The Committee hopes to demonstrate by its special activities its flexibility and responsiveness to the evolving activities technologists and policy makers

The Oxford Handbook of the Science of Science Communication Kathleen Hall Jamieson,Dan Kahan,Dietram A. Scheufele,2017-05-17 The proposal to vaccinate adolescent girls against the human papilloma virus ignited political controversy as did the advent of fracking and a host of other emerging technologies These disputes attest to the persistent gap between expert and public perceptions Complicating the communication of sound science and the debates that surround the societal applications of that science is a changing media environment in which misinformation can elicit belief without corrective context and likeminded individuals are prone to seek ideologically comforting information within their own self

constructed media enclaves Drawing on the expertise of leading science communication scholars from six countries The Oxford Handbook of the Science of Science Communication not only charts the media landscape from news and entertainment to blogs and films but also examines the powers and perils of human biases from the disposition to seek confirming evidence to the inclination to overweight endpoints in a trend line In the process it draws together the best available social science on ways to communicate science while also minimizing the pernicious effects of human bias The Handbook adds case studies exploring instances in which communication undercut or facilitated the access to scientific evidence The range of topics addressed is wide from genetically engineered organisms and nanotechnology to vaccination controversies and climate change Also unique to this book is a focus on the complexities of involving the public in decision making about the uses of science the regulations that should govern its application and the ethical boundaries within which science should operate The Handbook is an invaluable resource for researchers in the communication fields particularly in science and health communication as well as to scholars involved in research on scientific topics susceptible to distortion in partisan debate *The Five-year Outlook* ,1980 **The Five-year Outlook: Source materials** National Science Foundation (U.S.),1980 Science Communication Annette Leßmöllmann, Marcelo Dascal, Thomas Glöning, 2019-12-16 The volume gives a multi perspective overview of scholarly and science communication exploring its diverse functions modalities interactional structures and dynamics in a rapidly changing world In addition it provides a guide to current research approaches and traditions on communication in many disciplines including the humanities technology social and natural sciences and on forms of communication with a wide range of audiences **Grants and Awards for Fiscal Year...** National Science Foundation (U.S.),1977 **An Introduction to Science Studies** John M. Ziman, 1987-07-23 The purpose of this book is to give a coherent account of the different perspectives on science and technology that are normally studied under various disciplinary heads such as philosophy of science sociology of science and science policy It is intended for students embarking on courses in these subjects and assumes no special knowledge of any science It is written in a direct and simple style and technical language is introduced very sparingly As various perspectives are sketched out in this book the reader moves towards a consistent conception of contemporary science as a rapidly changing social institution that has already grown out of its traditional forms and plays a central role in society at large It will appeal to students in a wide range of scientific disciplines and complement well Professor Ziman s earlier books **Mapping Scientific Frontiers** Chaomei Chen, 2013-07-30 This is an examination of the history and the state of the art of the quest for visualizing scientific knowledge and the dynamics of its development Through an interdisciplinary perspective this book presents profound visions pivotal advances and insightful contributions made by generations of researchers and professionals which portrays a holistic view of the underlying principles and mechanisms of the development of science This updated and extended second edition highlights the latest advances in mapping scientific frontiers examines the foundations of strategies principles and design

patterns provides an integrated and holistic account of major developments across disciplinary boundaries Anyone who tries to follow the exponential growth of the literature on citation analysis and scientometrics knows how difficult it is to keep pace Chaomei Chen has identified the significant methods and applications in visual graphics and made them clear to the uninitiated Derek Price would have loved this book which not only pays homage to him but also to the key players in information science and a wide variety of others in the sociology and history of science Eugene Garfield This is a wide ranging book on information visualization with a specific focus on science mapping Science mapping is still in its infancy and many intellectual challenges remain to be investigated and many of which are outlined in the final chapter In this new edition Chaomei Chen has provided an essential text useful both as a primer for new entrants and as a comprehensive overview of recent developments for the seasoned practitioner Henry Small Chaomei Chen is a Professor in the College of Information Science and Technology at Drexel University Philadelphia USA and a ChangJiang Scholar at Dalian University of Technology Dalian China He is the Editor in Chief of Information Visualization and the author of Turning Points The Nature of Creativity Springer 2012 and Information Visualization Beyond the Horizon Springer 2004 2006
