The Cambridge Social History of Britain, 1750-1950 F. M. L. Thompson, 1990 Whilst in certain quarters it may be fashionable to suppose that there is no such thing as society historians have had no difficulty in finding their subject The difficulty rather is that the advance has occurred through such an outpouring of research and writing that it is hard for anyone but the specialist to keep up with the literature or grasp the overall picture In these three volumes as is the tradition in Cambridge Histories a team of specialists has assembled the jigsaw of recent monographic research and presented an interpretation of the development of modern British society since 1750 from three complementary perspectives those of regional communities of the working and living environment and of social institutions Each volume is self contained and each contribution thematically defined contains its own chronology of the period under review Taken as a whole they offer an authoritative and comprehensive view of the manner and method of the shaping of society in the two centuries of unprecedented demographic and economic change

An Imperial State at War Lawrence Stone, 2013-10-18 The study of eighteenth century history has been transformed by the writings of John Brewer and most recently with *The Sinews of Power* he challenged the central concepts of British history Brewer argues that the power of the British state increased dramatically when it was forced to pay the costs of war in defence of her growing empire In *An Imperial State at War* edited by Lawrence Stone himself no stranger to controversy the leading historians of the

an innovative theory of causation David Hume's six volume History of England From the Invasion of Julius Caesar to the Revolution in 1688 1754 61 is probably his most important work as a constitutional historian and political theorist Jia Wei's book shows that the History can be understood in two ways firstly as Hume's own narrative of England's state formation and secondly as his answer to the question of how eighteenth century Britain could cope with the challenges of commercial revolution It illuminates the relationship between Hume the political thinker Hume the historian and Hume the political economist and highlights the social economic and institutional changes which he wove into an innovative theory of causation The first part of the book considers Hume's account of the fundamental rationale of maritime trade and England's unique approach to liberty in the modern era The second part looks at his views concerning the profound impact of maritime trade on English politics From his perspective the problem of how to cope with the challenges posed by the commercial revolution in eighteenth century Britain was closely linked to the question of how transoceanic trade had fundamentally recast English politics from the sixteenth century onwards This study shows how these two narratives were interwoven into Hume's History and will be of interest to scholars and students not only of David Hume and political theory but of historiography eighteenth century British history and Enlightenment studies JIA WEI received her PhD from the University of Cambridge
