**The British Overseas** Charles Carrington, 1950 Great Britain Colonies History      **Mapping Antarctica** Robert Clancy, John Manning, Henk Brolsma, 2013-12-02 Everyone likes maps and maps are always used to illustrate the many books on the Antarctic. Here the focus is reversed with contemporary maps telling the story, one that should be attractive to the widest audience as it is a unique approach complimenting what has gone before and providing something different for all interested in Antarctica.

**Beneath the Shadow** Justin Gardiner, 2019-04 In February 2010 with the help of a friend who works as a photographer with a National Geographic sponsored cruise line Justin Gardiner boarded a ship bound for Antarctica. A stowaway of sorts Gardiner used his experiences on this voyage as the narrative backdrop for *Beneath the Shadow*, a compelling firsthand account that breathes new life into the nineteenth century journals of Antarctic explorers such as Captain Robert Falcon Scott, Sir Ernest Henry Shackleton and Captain Roald Amundsen. *Beneath the Shadow* is centered on journal excerpts by eight famous explorers which Gardiner uses as touchstones for modern day experiences of harsh seas, chance encounters, rugged terrain and unspeakable beauty. With equal parts levity and lyricism Gardiner navigates the distance between the historical and the contemporary, the artistic and the scientific, the heroic and the mundane. The bold and tragic tales of Antarctic explorers have long held our collective imagination almost as much as the mythically remote land such explorers ventured to, and this book makes those voices come to life as few ever have. **Crean** Tim Foley, 2023-05-03 Tom Crean is one of the most iconic figures in Irish history. Born in 1877 in County Kerry, he enlisted in the Royal Navy at the age of sixteen, the start of a career that would bring him to the most extreme environments on Earth. This fascinating account charts Crean's full naval career in rich new detail, from his initial voyages in the Americas where he was faced with rebellions and life-threatening storms, to Australasia where the Black Death in Sydney was a danger to all, and his crew was sent to bring to heel the warring tribes of the New Hebrides, some of whom still practised cannibalism. But it was Robert Scott's decision to employ him that led him to the frozen wastes of Antarctica, where his feats of heroism on two expeditions saw him help save the lives of crewmates on three dramatic occasions. The most famous of these was on

Ernest Shackleton's ill fated Endurance expedition when the vessel sank leaving the crew stranded on the ice and facing almost certain death before Crean and five others embarked on a journey hailed as the most daring and ambitious rescue in maritime history This is an extraordinary tale of an unassuming but quietly strong man who showed remarkable bravery in the harshest conditions on the planet and lived a life unlike others Crean is the story of a true Irish hero

**Captain Scott: Icy Deceits and Untold Realities** Krzysztof Sienicki, 2016-11-01 This expertly written book is nothing less than a daring challenge to the prevailing views of Captain Robert F Scott's journey to the South Pole and consequent disaster Borrowing from various scientific disciplines Krzysztof Sienicki lucidly argues against each of the presumed causes of Captain Scott and his companions deaths In particular he demolishes the notions of extreme low temperatures ferocious winds and food fuel shortages as the main causes of the disaster Using neural network computer simulations he proves that the Extreme Cold Snap Never Ending Gale and food fuel scarcity never occurred By eliminating the alleged causes of the disaster the author provides data and arguments that the deaths Scott Wilson and Bowers were a matter of choice rather than fate The choice was made long before there was an actual end of food fuel and long before the end of the physical strength needed to reach delusive salvation at One Ton Depot

*The Last Great Quest* Max Jones, 2004-11-11 The story of Captain Scott's last Antarctic expedition is one of the greatest adventure stories ever told Captain Robert Falcon Scott Lieutenant Henry Bowers Petty Officer Edgar Evans Captain Lawrence Oates and Dr Edward Wilson all died on the return trek from the South Pole starved and frozen only eleven miles from a supply camp In November 1912 a rescue party discovered their last letters and diaries which told a story of bravery hardship and self sacrifice that shocked the world Recent decades have seen controversy rage over whether Scott

was the last of a line of great Victorian explorers intent on discovering uncharted lands or a hopeless incompetent driven by personal ambition Rejecting the stereotypes Max Jones reveals a complex figure a product of the passions and preoccupations of an imperial age He also shows how heroes are made and manipulated through a close examination of the unprecedented outpouring of public grief at the news of the death of Scott     New Found Lands Peter Whitfield,2015-12-22

First Published in 1998 An exploration narrative can be a tale of adventure and endurance a technical account of navigation and seamanship or a political history of the overseas empires that were built up in the wake of the explorers In New Found Lands Peter Whitfield takes a different approach By focusing on the maps that the explorers themselves used Whitfield reveals how the both the explorers and their patrons understood their expanding world and their place in it what they were seeking and how they thought they could achieve it and how they integrated new knowledge into their evolving world view The maps in New Found Lands present the geographical ideas of the time making plain the power that came with increasing technical and geographical knowledge They also serve as evocative and poignant reminders of the limited knowledge of these explorers For up until very recent times as these maps show there have been areas of the world remaining to be explored and new found lands to discover This lavishly illustrated book progresses chronologically starting with the explorers of the ancient world covering the East the New World the Pacific Australia and the Modern Era It will enrich our understanding of the voyages of discovery undertaken over the past 2000 years and will delight any map or history lover Also includes 150 color and black and white maps
