Beyette, 2021 The devastating history of colonization worldwide includes centuries of violence and conflict with lasting effects that continue to alter the social economic political and environmental structures of post colonial societies Colonization affects the environment directly through historic exploitation of natural resources leading to environmental degradation But colonial legacies also affect the environment via pathways of disenfranchisement such as economic disparities social inequalities and political turmoil In this thesis I explore the potential ways in which variations in colonization may influence current environmental conditions as well as environmental concern in former colonies I explore variations in mode of colonization duration of colonial events time since colonization ended enslavement of colonized populations environmental exploitation population demographics and

educational institutions I examine 77 case countries with differing histories of colonization 19 of which have never been colonized Beyond its historical impacts colonization and its on going legacies have shaped the world we live in Countries that have been colonized have lower levels of income equality weaker structures of governance and worse environmental conditions today than those that have not been colonized Colonial legacies potentially affect environmental condition both directly as well as through current governance structures and levels of income equality which are both shaped by variations in colonization and have potential to affect environmental outcomes Legacies of colonization will continue to affect structural and environmental outcomes in modern society until we actively address them in our environmental and equity solutions

Albert Memmi,1965      **Colonialism Is Crime** Marianne Nielsen,Linda M. Robyn,2019-09-20 There is powerful evidence that the colonization of Indigenous people was and is a crime and that that crime is on going Achieving historical colonial goals often meant committing acts that were criminal even at the time The consequences of this oppression and criminal victimization is perhaps the critical factor explaining why Indigenous people today are overrepresented as victims and offenders in the settler colonist criminal justice systems This book presents an analysis of the relationship between these colonial crimes and their continuing criminal and social consequences that exist today The authors focus primarily on countries colonized by Britain especially the United States Social harm theory human rights covenants and law are used to explain the criminal aspects of the historical laws and their continued effects The final chapter looks at the responsibilities of settler colonists in ameliorating these harms and the actions currently being taken by Indigenous people themselves
