to Textile Coloration Roger H. Wardman,2017-09-04 An Introduction to Textile Coloration Principles and Practice The

Publications Committee of the Society of Dyers and Colourists SDC has been aware for some time of the need to produce a book at an introductory level aimed at personnel working in textile dyeing or printing companies as well as those interested in entering into the field. The SDC runs a course for dyehouse technicians leading to the award of its Textile Coloration Certificate and this book is intended to be helpful for candidates following the course. Additionally it will be helpful for professionals in textile companies who do not have a strong scientific background so that they may attain a better understanding of the chemical principles of colour application. Starting with the basic science underlying dyeing and printing processes, this comprehensive book explains the fundamentals of dye and pigment chemistry and the various application techniques and processes. It offers chapter coverage of the general chemistry related to textiles, textile fibres, chemistry of dyes and pigments, industrial coloration methods, textile printing, theoretical aspects of dyeing, the measurement of colour and fastness testing. Reference is made to developments that have taken place in the coloration industry in recent years, not least of which have been the challenges imposed by the drive towards environmentally friendly processes and restrictions on the use of certain chemicals. *An Introduction to Textile Coloration Principles and Practice* Covers atomic structure, chemical reactions and acids, bases and salts. Explains the nature of fibre-forming polymers and the conversion of synthetic polymers into fibre filaments. Educates on the classification of colorants and the commercial naming of dyes and pigments. Introduces readers to the dye application processes and dyeing machinery. Instructs on dye aggregation factors affecting colour appearance, the principles of colour fastness testing and more. This is the sort of book any dyer, technician, student, academic will want to always have as a ready reference to everything pertaining to textile coloration. Richard S Blackburn, School of Design, University of Leeds, Leeds LS2 9JT, UK. *Dictionary of Textile Finishing* H.-K. Rouette, 2014-03-14. In the Dictionary of textile finishing, the textile engineer will find the correct technical terms for 16 000 keywords within their field of activity in the German language and vice versa. The dictionary is the link between the Encyclopedia of Textile Finishing and the Lexikon der Textilveredelung from the same author. It is supplemented by a comprehensive collection of acronyms in the textile field, approx. 500 acronyms and their meanings. This book is essential for all textile engineers in the textile industry and textile machine-producing industry, researchers, students, translators and journalists in textile science. **Fabrics** Marypaul Yates, 2002-04-30. *Fabrics* provides designers with the information needed to make their fabric specifications easy, informed and appropriate to the job at hand, considering aesthetics, performance, application and green design. This thorough handbook by a textile professional describes and illustrates fibers and yarns, fabric structures, fabric design, dye and printing processes, finishes and treatments, styles and applications of cloth for furniture, window, wall and floor coverings. Also covered are testing and flaws in the fabric industry and professional practice.
