

CONNECTING FOR LUNG HEALTH: LUNG CANCER SCREENING

Learn About Lung Cancer Screening

Lung cancer is a disease where cells in the lungs grow out of control. It is the second most common cancer in the United States, after skin cancers. The goal of a screening test is to diagnose a disease early, so it can be treated more successfully. That is why it is so important to get screened, especially if you are at higher than average risk. This fact sheet will help you understand if lung cancer screening is right for you. It will provide some answers about how to get a screening and talk to your doctor.

Research shows that lung cancer is more common in Black and African American men compared to other populations. The chance of being diagnosed late, and to dying from it are also higher. Some health disparities contribute to the differences in these statistics. "Health care disparities" means that there are differences in access to care for certain groups of people. These differences could be based on many factors. These include race, gender, income or location. This fact sheet suggests things you can do to reduce these barriers to care.

Find a Doctor You Trust

It is not always easy to put your health in the hands of doctors you do not know well. For Black or African American individuals, this can sometimes be a difficult process. Both personal experience and historical events can make it harder to find a doctor you trust. Many people find it easier to talk to a doctor who is supportive and understanding.

Talk with friends and family members or other people you trust about finding a doctor they would recommend. This could be a doctor who is also a person of color. It can also be someone who has a history of providing excellent care. When you feel understood by your doctor, you will have better outcomes. They can also help you gain better access to critical health care, such as screening.

Be Your Strongest Advocate

Don't be afraid to ask for what you need from your doctor. It might feel embarrassing or awkward to talk about personal health concerns like lung cancer. Other times, it may feel like your doctor is not hearing what you are telling them. It is not a sign of weakness to ask for help. It is the only way to ensure your good health in the long-term.

For Black and African American people, feeling dismissed by your doctor is a common concern. Speaking up for yourself is not always easy, but it can make a difference. Being open with your doctor can help you understand your risk for lung cancer. This includes asking questions. If you feel you are not getting the best care, consider changing providers or seeking a second opinion.

Using Technology to Support Learning and Teaching Andy Fisher, Kate Exley, Dragos Ciobanu, 2014-01-03 The climate of Higher Education is changing rapidly The students are more likely to see themselves as consumers and have increasingly high expectations regarding teaching and

learning Universities are in part aiming to meet this need by increasing the use of technology for example whether to increase access to teaching materials outside the classroom or to make lectures more interactive Although there is no illusion amongst Higher Education intuitions that technology is a panacea it is clear that technology is a vital tool in meeting expectations and one that will be used more and more Consequently the context of this book is one in which technology needs to be understood as part of an overall teaching practice Technology continues to move on a pace and is used increasingly within Higher Education to support and enhance teaching and learning There are books which are steeped in technical detail and books which are steeped in theoretical pedagogy with little discussion about the impact on learning and student teacher behaviour Using Technology to Support Learning and Teaching fills a gap in the market by providing a jargon free but pedagogically informed set of guidance for teaching practitioners who wish to consider a variety of ways in which technology can enrich their practice and the learning of their students It integrates a wide range of example cases from different kinds of HE institutions and different academic disciplines illustrating practicable pedagogies to a wide range of readers It is full of advice hints and tips for practitioners wanting to use technology to support a style of teaching and learning that is also built on sound pedagogical principles It will provide a quick user friendly reference for practitioners wanting to incorporate technology into Higher Education in a way that adheres to their learning principles and values This book is primarily for teaching practitioners particularly those who are new to the industry This book would also prove useful on training courses for practitioners such as the Postgraduate Certificate for Higher Education The authors also intend that the book be of value to newer teachers perhaps taking teacher training programmes who wish to see where recommended approaches link to pedagogy

The Design of Instruction and Evaluation Mitchell Rabinowitz,Fran C. Blumberg,Howard T. Everson,2004-09-22 This book is about empirically tested knowledge and principles that inform the design of instructional and evaluation systems and

the use and promise of media and technology within such systems Historically psychology has informed the design of instructional and evaluation systems in different ways A behavioral perspective emphasizes the role of the environment in determining behavior a factor external to the learner A cognitive perspective focuses on the role of cognitive processing and constraints in determining learning factors that are internal to the learner This volume presents the affordances approach which addresses how the environment and the affordances within it interact with cognitive processes to determine learning Insights into this interaction are presented It is the book s contention that the affordance approach represents an advancement over the behavioral and cognitive perspectives it is an evolution within the cognitive approach not an alternative to it The Design of Instruction and Evaluation Affordances of Using Media and Technology is intended for education practitioners responsible for the implementation of media and technology in classrooms for researchers and faculty and for use as a text in courses on media and technology use in educational settings instructional design and psychology of learning Cognition in Education Jose Mestre,Brian H. Ross,2011-07-28 This volume contains overviews of research projects at the intersection of cognitive science and education The prominent contributors were chosen both for the quality of their work and the variety of their contributions Cognitive Load Theory Fred Paas,Alexander Renkl,John Sweller,2016-02-04 The papers of this special issue demonstrate that cognitive load theory provides the framework for investigations into cognitive processes and instructional design The genesis of Cognitive Load Theory emerged from an international symposium organized at the bi annual conference of the European Association for Research on Learning and Instruction in 2001 in Fribourg Switzerland Most of the papers are based on contributions to that symposium and discuss the most recent work carried out within the cognitive load framework As a whole this issue is demonstrating that cognitive load theory is continuing its role of using cognitive psychology principles to generate novel instructional design procedures
