The Ashgate Research Companion to Byzantine Hagiography

Stephanos Efthymiadis, 2020-02-25 For an entire millennium Byzantine hagiography inspired by the veneration of many saints exhibited literary dynamism and a capacity to vary its basic forms. The subgenres into which it branched out after its remarkable start in the fourth century underwent alternating phases of development and decline that were intertwined with changes in the political, social and literary spheres. The selection of saintly heroes, an interest in depicting social landscapes and the modulation of linguistic and stylistic registers captured the voice of *homo byzantinus* down to the end of the empire in the fifteenth century. The seventeen chapters in this companion form the sequel to those in volume I which dealt with the periods and regions of Byzantine hagiography and complete the first comprehensive survey ever produced in this field. The book is the work of an international group of experts in the field and is addressed to both a broader public and the scholarly community of Byzantinists, medievalists, historians of religion and theorists of narrative. It highlights the literary dimension and the research potential of a representative number of texts, not only those appreciated by the Byzantines themselves but those which modern readers rank high due to their literary quality or historical relevance.

The Ashgate Research

Companion to Byzantine Hagiography Professor Stephanos Efthymiadis, 2013-07-28 Hagiography is the most abundantly represented genre of Byzantine literature and it offers crucial insight to the development of religious thought and practice, social and literary life and the history of the empire. It emerged in the fourth century with the pioneering *Life of St Antony* and continued to evolve until the end of the empire in the fifteenth century and beyond. The appeal and dynamics of this genre radiated beyond the confines of Byzantium and it was practised also in many Oriental and Slavic languages within the orbit of the broader Byzantine world. This companion is the work of an international team of specialists and represents the first comprehensive survey ever produced in this field. It consists of two volumes and is addressed to both a broader public and the scholarly community of Byzantinists, medievalists, historians of religion and theorists of the narrative. This first volume covers the authors and texts of the four distinctive periods during which Greek Byzantine hagiography developed as well as the hagiography produced in Oriental and Slavic languages and in geographical milieux around the periphery of the empire from Italy to Armenia. Volume II addresses questions of genres and the social and other contexts of Byzantine hagiography.

Languages and Cultures of Eastern Christianity: Greek Scott Fitzgerald Johnson, 2017-05-15 This volume brings together a set of fundamental contributions, many translated into English for this publication, along with an important introduction. Together these explore the role of Greek among Christian communities in the late antique and Byzantine East, late Roman *Oriens* specifically in the areas outside of the immediate sway of Constantinople and imperial Asia Minor. The local identities based around indigenous eastern Christian languages, Syriac, Coptic, Armenian, Georgian etc. and post-Chalcedonian doctrinal confessions, Miaphysite Church of the East, Melkite, Maronite, were solidifying precisely as the Byzantine polity in the East was

extinguished by the Arab conquests of the seventh century In this multilayered cultural environment Greek was a common social touchstone for all of these Christian communities not only because of the shared Greek heritage of the early Church but also because of the continued value of Greek theological hagiographical and liturgical writings However these interactions were dynamic and living so that the Greek of the medieval Near East was itself transformed by such engagement with eastern Christian literature appropriating new ideas and new texts into the Byzantine repertoire in the process

Ann Matter, 2012-04-26 This volume examines the development and use of the Bible from late Antiquity to the Reformation tracing both its geographical and its intellectual journeys from its homelands throughout the Middle East and Mediterranean and into northern Europe Richard Marsden and E Ann Matter s volume provides a balanced treatment of eastern and western biblical traditions highlighting processes of transmission and modes of exegesis among Roman and Orthodox Christians Jews and Muslims and illuminating the role of the Bible in medieval inter religious dialogue Translations into Ethiopic Slavic

Armenian and Georgian vernaculars as well as Romance and Germanic are treated in detail along with the theme of allegorized spirituality and established forms of glossing. The Church Fathers in Arabic Translations Alexander Treiger, 2024-12-23. This volume tells the story of the Arabic translations of the Church Fathers. By tracing the history of major translation centres such as Palestine, Sinai and Antioch, it describes how Middle Eastern Christians translated into Arabic, preserved and engaged with their Patristic heritage. In addition to well-known authors such as Gregory of Nazianzus, Ephrem the Syrian and Dionysius the Areopagite, the volume presents a Patristic treatise written in Greek but preserved only in Arabic, the *Noetic Paradise*. Finally, by reconstructing a lost Arabic Dionysian paraphrase used by the Muslim theologian al-Ghazali, the volume explores Patristic influences on Islamic thought.

Patristic Literature in Arabic Translations, 2019-10-07. Patristic Literature in Arabic Translations explores the Arabic translations of the Greek and Syriac Church Fathers, focusing on those produced in the Palestinian monasteries and at Sinai in the 8th-10th centuries and in Antioch during Byzantine rule (969-1084). These Arabic translations preserve patristic texts lost in the original languages. They offer crucial information about the diffusion and influence of patristic heritage among Middle Eastern Christians from the 8th century to the present. A systematic examination of Arabic patristic translations sheds light on the development of Muslim and Jewish theological thought. Das Konzept des geistlichen Gehorsams bei Johannes Sinaïtes Andreas Müller, 2006. English summary. In Christianity, charismatic authority still plays a key role, especially in the traditions of the Eastern Church. Charisma in relation to the ministry has always been judged to be positive, in particular in Protestant patristics. However, the drawbacks of this, such as the demand for absolute obedience, were hardly noticed. Andreas Müller describes how this demand was integrated into a spiritual system in the 6th century and how obedience to spiritual fathers became necessary for salvation. In doing so, he analyzes the *Klimax* by Johannes Sinaïtes, in which Johannes countered the authoritarian concepts in the Emperor Justinian's legislation. A comparison of the concept of obedience in the *Climax* with those in the works of Pachomios, Basilios the Great and the *Apophthegmata Patrum* demonstrates the approach of Johannes.
