Books Written in Stone J. Marc. Merrill,2012-05 Like the Great Pyramid mysteries surround the other pyramids as well as other features found at the Giza plateau in Egypt For example Why does the second pyramid have two entrances both off center while the single entrance to the third pyramid is centered What was the purpose of the two lower chambers in the second pyramid Moreover why was the sarcophagus in this pyramid made to be wider than the passages that lead to the upper chamber In a related matter why were the bones of a bull placed in the sarcophagus And why was the sarcophagus sunk into the floor up to its lid At the third pyramid why were parts of a body dating to the Christian period wrapped in a coarse yellow woolen cloth and buried beneath three feet of rubbish in the upper chamber Why in the third pyramid was the lower vaulted chamber designed so that it would absorb both sound and light Out on the plateau what was the purpose of the so called trial passages On the south side of the Great Pyramid why was an ancient boat dismantled and buried in a pit east of that pyramid s north south axis And what was stored in the other pit west of the axis Do the four so called air shafts in the Great Pyramid link the three major pyramids together And how are the compartments above the King s Chamber related to the end time David Furlong author of The Keys to the Temple says the whole of the Giza complex was based on a coherent design intended to portray a spiritual theme page 89 Volume 2 of Books Written in Stone

Books Written in Stone: Volume 1 J. Marc. Merrill, 2012-03-06 The Great Pyramid mysteries abound For example Why was the subterranean chamber apparently abandoned and yet it is larger than the Queen s Chamber and the King s Chamber combined Why is there a pit in the floor of the subterranean chamber and why does the narrow passage that snakes south off the subterranean chamber come to a sudden end after 53 feet Why was sand from the Sinai hidden behind the wall of the horizontal passage to the Queen s Chamber and why is there a sudden drop in that passage Why was the Grand Gallery built so large in comparison to the ascending passage and why are the slots in the ramps of the Grand Gallery empty Why was the antechamber to the King s Chamber built with both limestone and granite blocks and what purpose could the so called Granite Leaf have served Egyptologists pyramidologists and others outside these two camps have attempted to explain such anomalies Their theories are examined and compared to a new vision that answers not just some of the questions about the Great Pyramid but all of them as revealed in Books Written in Stone Enoch the Seer the Pyramids of Giza and the Last Days
