Security and Privacy in the Age of Ubiquitous Computing Ryoichi Sasaki, Eiji Okamoto, Hiroshi Yoshiura, 2010-06-03

Even in the age of ubiquitous computing the importance of the Internet will not change and we still need to solve conventional security issues In addition we need to deal with new issues such as security in the P2P environment privacy issues in the use of smart cards and RFID systems Security and Privacy in the Age of Ubiquitous Computing addresses these issues and more by exploring a wide scope of topics The volume presents a selection of papers from the proceedings of the 20th IFIP International Information Security Conference held from May 30 to June 1 2005 in Chiba Japan Topics covered include cryptography applications authentication privacy and anonymity DRM and content security computer forensics Internet and web security security in sensor networks intrusion detection commercial and industrial security authorization and access control information warfare and critical protection infrastructure These papers represent the most current research in information security including research funded in part by DARPA and the National Science Foundation

Encyclopedia of Cryptography, Security and Privacy Sushil Jajodia, Pierangela Samarati, Moti Yung, 2025-01-10 A rich stream of papers and many good books have been written on cryptography security and privacy but most of them assume a scholarly reader who has the time to start at the beginning and work his way through the entire text The goal of Encyclopedia of Cryptography Security and Privacy Third Edition is to make important notions of cryptography security and privacy accessible to readers who have an interest in a particular concept related to these areas but who lack the time to study one of the many books in these areas The third edition is intended as a replacement of Encyclopedia of Cryptography and Security Second Edition that was edited by Henk van Tilborg and Sushil Jajodia and published by Springer in 2011 The goal of the third edition is to enhance on the earlier edition in several important and interesting ways First entries in the second edition have been updated when needed to keep pace with the advancement of state of the art Second as noticeable already from the title of the encyclopedia coverage has been expanded with special emphasis to the area of privacy Third considering the fast pace at which information and communication technology is evolving and has evolved drastically since the last edition entries have been expanded to provide comprehensive view and include coverage of several newer topics

Security Management, Integrity, and Internal Control in Information Systems Steve Furnell, Paul Dowland, Bhavani Thuraisingham, X. Sean Wang, 2006-06-03 This is the first joint working conference between the IFIP Working Groups 11.1 and 11.5 We hope this joint conference will promote collaboration among researchers who focus on the security management issues and those who are interested in integrity and control of information systems Indeed as management at any level may be increasingly held answerable for the reliable and secure operation of the information systems and services in their respective organizations in the same manner as they are for financial aspects of the enterprise there is an increasing need for ensuring proper standards of integrity and control in information systems in order to ensure that data software and ultimately the business processes are complete adequate and valid for intended functionality and expectations of the owner i.e. the user organization As organizers we would like to thank the members of the international program committee for their review work during the paper selection process We would also like to thank the

Schneider, 2004 Since these new services take place in a public and therefore in untrusted networks there are many security issues involved that are of concern to different communities **Cyber Security and the Politics of Time** Tim

Stevens, 2015-10-09 Cyber security is a recent addition to the global security agenda concerned with protecting states and citizens from the misuse of computer networks for war terrorism economic espionage and criminal gain Many argue that the ubiquity of computer networks calls for robust and pervasive countermeasures not least governments concerned about their potential effects on national and economic security Drawing on critical literature in international relations security studies political theory and social theory this is the first book that describes how these visions of future cyber security are sustained in the communities that articulate them Specifically it shows that conceptions of time and temporality are foundational to the politics of cyber security It explores how cyber security communities understand the past present and future thereby shaping cyber security as a political practice Integrating a wide range of conceptual and empirical resources this innovative book provides insight for scholars practitioners and policymakers **Security and Privacy in the Age of Uncertainty** Sabrina

de Capitani di Vimercati, Pierangela Samarati, Sokratis Katsikas, 2003-04-30 Security and Privacy in the Age of Uncertainty covers issues related to security and privacy of information in a wide range of applications including Secure Networks and Distributed Systems Secure Multicast Communication and Secure Mobile Networks Intrusion Prevention and Detection Access Control Policies and Models Security Protocols Security and Control of IT in Society This volume contains the papers selected for presentation at the 18th International Conference on Information Security SEC2003 and at the associated

workshops The conference and workshops were sponsored by the International Federation for Information Processing IFIP and held in Athens Greece in May 2003 *Security and Privacy - Silver Linings in the Cloud* Kai Rannenber, Vijay Varadharajan, Christian Weber, 2010-08-07 These proceedings contain the papers of IFIP SEC 2010 It was a special honour and privilege to chair the Program Committee and prepare the proceedings for this conference which is the 25th in a series of well established international conferences on security and privacy organized annually by Technical Committee 11 TC 11 of IFIP Moreover in 2010 it is part of the IFIP World Computer Congress 2010 celebrating both the Golden Jubilee of IFIP founded in 1960 and the Silver Jubilee of the SEC conference in the exciting city of Brisbane Australia during September 20-23 The call for papers went out with the challenging motto of Security the acceptance rate was therefore as low as 24.5% making SEC 2010 a highly competitive forum One of those 25 submissions could unfortunately not be included in the proceedings as none of its authors registered in time to present the paper at the conference *Next-Generation Enterprise Security and Governance* Mohiuddin Ahmed, Nour Moustafa, Abu Barkat, Paul Haskell-Dowland, 2022-04-19 The Internet is making our daily lives as digital as possible and this new era is called the Internet of Everything IoE The key force behind the rapid growth of the Internet is the technological advancement of enterprises The digital world we live in is facilitated by these enterprises advances and business intelligence These enterprises need to deal with gazillions of bytes of data and in today's age of General Data Protection Regulation enterprises are required to ensure privacy and security of large scale data collections However the increased connectivity and devices used to facilitate IoE are continually creating more room for cybercriminals to find vulnerabilities in enterprise systems and flaws in their corporate governance Ensuring cybersecurity and corporate governance for enterprises should not be an afterthought or present a huge challenge In recent times the complex diversity of cyber attacks has been skyrocketing and zero day attacks such as ransomware botnet and telecommunication attacks are happening more frequently than before New hacking strategies would easily bypass existing enterprise security and governance platforms using advanced persistent threats For example in 2020 the Toll Group firm was exploited by a new crypto attack family for violating its data privacy where an advanced ransomware technique was launched to exploit the corporation and request a huge figure of monetary ransom Even after applying rational governance hygiene cybersecurity configuration and software updates are often overlooked when they are most needed to fight cyber crime and ensure data privacy Therefore the threat landscape in the context of enterprises has become wider and far more challenging There is a clear need for collaborative work throughout the entire value chain of this network In this context this book addresses the cybersecurity and cooperate governance challenges associated with enterprises which will provide a bigger picture of the concepts intelligent techniques practices and open research directions in this area This book serves as a single source of reference for acquiring the knowledge on the technology process and people involved in next generation privacy and security *Visions of the Information Society*, 2003 Protocols for Secure Electronic Commerce Mostafa Hashem

Sherif,2003-11-24 The continued growth of e commerce mandates the emergence of new technical standards and methods that will securely integrate online activities with pre existing infrastructures laws and processes Protocols for Secure Electronic Commerce Second Edition addresses the security portion of this challenge It is a full compendium of the protocols for securing online commerce and payments serving as an invaluable resource for students and professionals in the fields of computer science and engineering IT security and financial and banking technology The initial sections provide a broad overview of electronic commerce money payment systems and business to business commerce followed by an examination of well known protocols SSL TLS WTLS and SET The book also explores encryption algorithms and methods EDI micropayment and multiple aspects of digital money Like its predecessor this edition is a general analysis that provides many references to more technical resources It delivers extensive revisions of previous chapters along with new chapters on electronic commerce in society new e commerce systems and the security of integrated circuit cards *ICCS 2007* Babak

Akhgar,2009-12-24 The 15th International Workshop on Conceptual Structures ICCS 2007 brings together numerous discussions between international groups of researchers from the field of Information and Communications Technology ICT At ICCS 2007 some of the world s best minds in information technology arts humanities and social science will meet to explore novel ways that ICT can augment human intelligence The ICCS 2007 workshops include Rough sets and data mining Ubiquitous and collaborative computing and Semantic information retrieval These different workshops provide a platform for dissemination and exploitation of international research and development projects and business applications **Organizing**

for the Digital World Federico Cabitza,Carlo Batini,Massimo Magni,2018-08-20 This book argues that organizing is a broader term than managing as it entails understanding how people and machines interact with each other how resources data goods are exchanged in complex and intertwined value chains and how lines of action and activities can be articulated using flexible protocols and often ad hoc processes in situated practices of use and production The book presents a collection of research papers shedding new light on these phenomena and related practices from both academic and professional perspectives Given the plurality of views that it offers the book makes a relevant contribution to the understanding and appreciation of the complexity of the digital world at various levels of granularity It focuses on how individuals communities and the cooperative societies of our new global and hyperconnected world produce value and pursue their objectives and ideals in mutually dependent ways The content of the book is based on a selection of the bestpapers original double blind peer reviewed contributions presented at the annual conference of the Italian chapter of the AIS which was held in Milan Italy in October 2017
