Culture and Security Michael Williams, 2007-05-07 This book examines the role of culture in contemporary security policies providing a critical overview of the ways in which culture has been theorized in security studies Developing a theoretical framework that stresses the relationship between culture power security and strategy the volume argues that cultural practices have been central to transformations in European and US security policy in the wake of the Cold War including the evolution of NATO and the expansion of the EU Michael C Williams maintains that cultural practices continue to play powerful roles in international politics today where they are essential to grasping the ascendancy of neoconservatism in US foreign policy Investigating the rise in popularity of culture and constructivism in security studies in relation to the structure and exercise of power in post Cold War security relations the book contends that this poses significant challenges for considering the connection between analytic and political practices and the relationship between scholarship and power in the construction of security relations Culture and Security will be of interest to students and researchers in the fields of international relations security studies and European politics

Ecological Security Matt McDonald, 2021-09-23 Climate change is increasingly recognised as a security issue Yet this recognition belies contestation over what security means and whose security is viewed as threatened Different accounts here defined as discourses of security range from those focused on national sovereignty to those emphasising the vulnerability of human populations This book examines the ethical assumptions and implications of these climate security discourses ultimately making a case for moving beyond the protection of human institutions and

collectives Drawing on insights from political ecology feminism and critical theory Matt McDonald suggests the need to focus on the resilience of ecosystems themselves when approaching the climate security relationship orienting towards the most vulnerable across time space and species The book outlines the ethical assumptions and contours of ecological security before exploring how it might find purchase in contemporary political contexts A shift in this direction could not be more urgent given the current climate crisis

Conflict Resolution and Ontological Security Bahar Rumelili, 2014-12-17 This volume highlights the ways in which the prospect of peace can generate anxieties and consequently set in motion social and political processes that reproduce and reactivate conflicts In analysing this issue the volume builds on the notion of ontological security and its recent applications to international relations theory Although conflicts threaten the physical security of the parties involved they also help settle existential questions about basic parameters of life being and identity and thus over time become sources of ontological security The prospect of peace through the resolution or transformation of conflict threatens to unsettle the stability and consistency of self narratives and their associated routines and habits at the individual group and state levels The contributors argue two key points 1 that ontological insecurity may set in motion political and social processes that reproduce and reactivate conflicts 2 that coping with peace anxieties necessitates the formulation of alternative self narratives at the individual societal and state levels that re situate the Self in relation to Other and to the world at large Consequently the book analyses the ways in which and the conditions under which conflict resolution induces ontological insecurity and the different ways in which ontological insecurity has prevented the successful culmination of peace processes in different conflict contexts including Cyprus Israel Palestine and Northern Ireland This book will be of much interest to students of critical security studies conflict resolution peace and conflict studies social theory and IR in general

Gendering Global Conflict Laura Sjoberg, 2013-08-13 Laura Sjoberg positions gender and gender subordination as key factors in the making and fighting of global conflict Through the lens of gender she examines the meaning causes practices and experiences of war building a more inclusive approach to the analysis of violent conflict between states Considering war at the international state substate and individual levels Sjoberg s feminist perspective elevates a number of causal variables in war decision making These include structural gender inequality cycles of gendered violence state masculine posturing the often overlooked role of emotion in political interactions gendered understandings of power and states mistaken perception of their own autonomy and unitary nature Gendering Global Conflict also calls attention to understudied spaces that can be sites of war such as the workplace the household and even the bedroom Her findings show gender to be a linchpin of even the most tedious and seemingly bland tactical and logistical decisions in violent conflict Armed with that information Sjoberg undertakes the task of redefining and reintroducing critical readings of war s political economic and humanitarian dimensions developing the beginnings of a feminist theory of war

Environmental Security and Gender Nicole Detraz, 2014-08-21 Over the past 20 years scholars policymakers and the media have increasingly recognized the links between both traditional and non traditional security issues and the changing condition of the global environment Concepts such as environmental security and resource conflict have been used to hint at these significant linkages While there has been a good deal of scholarly work conducted that seeks to identify the ways that actors link these concepts there has been little examination of the intersection between approaches to environmental security and gender This book explores this intersection to provide an insight into the gendered nature of both global environmental politics and security studies It examines how the issues of security and the environment are linked to theory and practice and the extent to which gender informs these discussions By adopting a feminist environmental security discourse this book

provides crucial redefinitions of key concepts and offers new insights into the ways we understand security environment connections Case studies evaluate if and how environment and security discourses are being used to understand a range of environmental issues and how a feminist environmental security discourse contributes to our understanding of security environment connections This multidisciplinary volume draws on literature from the environmental sciences security studies and sociology to highlight the complex human insecurities that often accompany environmental change As conceptualizations of security continue to shift and broaden to include environmental issues and concerns it is imperative that gender informs the debate Research Methods in Critical Security Studies Mark B. Neuman Stanivuković, 2017-09-01 Europeanization as Discursive Practice adopts a poststructuralist reading of Europeanization to study the effects of EU accession in the light of political territoriality and consequent state building processes in the EU and Central and Eastern European countries CEECs and the Western Balkans from 1990 2013 Focusing on how domestic actors have framed Europe EU norms in the debates on territorial reforms and the implications of this framing on policy reforms it asks how competing articulations of the EU and its norms construct state territoriality in the given political and policy debates The book argues that the European Union acted as a discursive force and a challenge to the established structures of understanding of territoriality statehood and power With this the author proposes a new research model for the study of Europeanization that goes beyond the neo institutionalist account of the EU s policy norm transfer to member non member states This text will be of key interest to students scholars and practitioners of European integration EU foreign policy enlargement policy and regional policy and territoriality in post socialist spaces Explaining the EU's

Common Security and Defence Policy X. Kurowska, F. Breuer, 2011-11-22 An engaging assessment of the theoretical debates on the EU's Common Security and Defence Policy CSDP The contributions to this volume bring together sophisticated theoretical frameworks and extensive empirical research Pluralistic in its approach the volume emphasizes the role of conceptual diversity for better explaining the EU's CSDP *Conflict, Security and the Reshaping of Society* Alessandro Dal Lago, Salvatore Palidda, 2010-07-13 A PDF version of this book is available for free in open access via www.tandfebooks.com as well as the OAPEN Library platform www.oapen.org It has been made available under a Creative Commons Attribution Non Commercial No Derivatives 3.0 license and is part of the OAPEN UK research project This book is an examination of the effect of contemporary wars such as the War on Terror on civil life at a global level Contemporary literature on war is mainly devoted to recent changes in the theory and practice of warfare particular those in which terrorists or insurgents are involved for example the revolution in military affairs small wars and so on On the other hand today's research on security is focused among other themes on the effects of the war on terrorism and on civil liberties and social control This volume connects these two fields of research showing how war and security tend to exchange targets and forms of action as well as personnel for instance the spreading use of private contractors in wars and of military experts in the struggle for security in modern society This shows how contrary to Clausewitz's belief war should be conceived of as a continuation of politics by other means the opposite statement is also true that politics insofar as it concerns security can be defined as the continuation of war by other means This book will be of much interest to students of critical security studies war and conflict studies terrorism studies sociology and IR in general Salvatore Palidda is Professor of Sociology in the Faculty of Education at the University of Genoa Alessandro Dal Lago is Professor of Sociology of Culture and Communication at the University of Genoa

Constructing Sovereignty between Politics and Law Tanja Aalberts, 2012-08-06 This book explores the interplay between sovereignty politics and law through different conceptualizations of sovereignty Despite developments such as European integration globalization and state failure sovereignty proves to be a resilient institution in contemporary international politics This book investigates both the continuity and change of sovereignty through an examination of the different ways it is understood sovereignty as an institution as identity as a language game and as subjectivity In this illuminating book Aalberts examines sovereign statehood as a political legal concept an institutional product of modern international society and seeks an interdisciplinary approach that combines international relations and international law This book traces the consequences of this origin for the conceptualization of sovereign statehood in modern academic discourse drawing on key jurisprudence and international treaties and provides a new framework to consider the international significance of sovereignty As an innovative approach to a critical institution *Constructing Sovereignty between Politics and Law* will be of interest to students and scholars of international relations international relations theory and international law *Security Without Weapons* M. S. Wallace, 2016-09-13 Few questions of global politics are more pressing than how to respond to

widespread violence against civilians Despite the efforts of Responsibility to Protect R2P proponents to draw attention away from exclusively military responses debates on humanitarian intervention and R2P's Third Pillar still tend to boil down to two unsatisfying options stand by and do nothing or take military action to protect civilians essentially using violence to stop violence Accordingly and given disagreement and uncertainty regarding moral claims as well as the unpredictability of military effectiveness this book asks how can we counter violence ethically and effectively taking action consistent with our particular moral commitments while also nurturing difference and enacting responsibility towards multiple others After evaluating the pragmatic and ethical failings of military action the book proposes nonviolent intervention as a third unarmed on the ground option for protecting civilians during humanitarian crises In the empirical section of the book focusing on the discursive and psychological conditions enabling violence Wallace analyses the mechanisms by which Nonviolent Peaceforce an international NGO engaged in nonviolent intervention unarmed civilian peacekeeping UCP was able to protect civilians and prevent violence even if on a limited scale in the broader context of Sri Lanka's war counterinsurgency in 2008 Both philosophically innovative and practically useful to those working in the field the book contributes to a range of literatures and debates from just war theory and poststructuralist ethics to nonviolent action and conflict transformation and from humanitarian intervention R2P and civilian protection to strategic theory and discursive and psychological theories of violence
