## **Seizures And Epilepsy In The Elderly:**

**Seizures and Epilepsy in the Elderly** A. J. Rowan, Eugene Ramsay, 1997 Epileptic seizures in the elderly population occur more frequently than previously thought Recent epidemiologic data indicate that the incidence of seizures rises sharply after middle age Seizures occur because of previous stroke or head trauma in addition to a variety of systemic derangements drugs drug withdrawal or acute intracranial disease The aging process creates particular problems in diagnosis specific therapy and long term management Prompt diagnosis and therapy are essential This book emphasizes the physiologic and pathologic changes associated with aging that have an impact on diagnosis and treatment It will include epidemiology clinical diagnosis imaging and electrophysiologic studies age related physiologic changes pharmacokinetics drug interactions current and new antiepileptic drugs and management *Epilepsy in the Elderly* Günter Krämer, 1999 This text provides a systematic description of the advantages and disadvantages of individual drugs for the elderly and provides orientation by means of numerous tables which list among others drug interactions and special features in cases of liver and kidney disease including hemodialysis **Handbook on the Neuropsychology of Aging and Dementia** Lisa D. Ravdin, Heather L. Katzen, 2012-09-14 With the aging of the baby boomers and medical advances that promote longevity older adults are rapidly becoming the fastest growing segment of the population As the population ages so does the incidence of age related disorders Many predict that 15% 20% of the baby boomer generation will develop some form of cognitive decline over the course of their lifetime with estimates escalating to up to 50% in those achieving advanced age Although much attention has been directed at Alzheimer's disease the most common form of dementia it is estimated that nearly one third of those cases of cognitive decline result from other neuropathological mechanisms In fact many patients diagnosed with Alzheimer's disease likely have co morbid disorders that can also influence cognition i e vascular cognitive impairment suggesting mixed dementias are grossly under diagnosed The Clinical Handbook on the Neuropsychology of Aging and Dementia is a unique work that provides clinicians with expert guidance and a hands on approach to neuropsychological practice with older adults The book will be divided into two sections the first addressing special considerations for the evaluation of older adults and the second half focusing on common referral questions likely to be encountered when working with this age group The authors of the chapters are experts and are recognized by their peers as opinion leaders in their chosen chapter topics The field of neuropsychology has played a critical role in developing methods for early identification of late life cognitive disorders as well as the differential diagnosis of dementia Neuropsychological assessment provides valuable clinical information regarding the nature and severity of cognitive symptoms associated with dementia Each chapter will reinforce the notion that neuropsychological measures provide the clinician with sensitive tools to differentiate normal age related cognitive decline from disease associated impairment aid in differential diagnosis of cognitive dysfunction in older adults as well as identify cognitive deficits most likely to translate into functional impairments in everyday life *Clinical Neurology*

*of the Older Adult* Joseph I. Sirven, Barbara L. Malamut, 2008 Now in its Second Edition this text is the most up to date reference on the evaluation and treatment of neurologic problems in older adults The book is organized so that clinicians can quickly look up either a patient's symptom or a disease and includes medication charts and diagnostic algorithms Psychosocial issues such as driving and long term care options are also addressed This edition has more information on EMG evoked potentials other clinical neurophysiologic procedures brain imaging PET scans for dementia screening and functional imaging in patients with cognitive changes Updated information on new antiparkinsonian agents and paraneoplastic syndromes is also included      **Management of Seizures and Epilepsy in the Elderly** Erica B. Chisanga, 2004
