around seven crucial days in Leibniz's life Kempe's account allows us to observe him in the act of thinking and creating and gives us a deeper understanding of his broad reaching intellectual endeavors On October 29 1675 we find him in Paris diligently working from his bed amid a sea of notes and committing the integral symbol the basis of his calculus to paper On April 17 1703 Leibniz is in Berlin writing a letter reporting that a Jesuit priest living in China has discovered how to use Leibniz's binary number system to decipher an ancient Chinese system of writing One day in August 1714 Leibniz enjoys a Viennese coffee while drawing new connections among ontology and biology and mathematics

The Best of All Possible Worlds transports us to an age defined by rational optimism and a belief in progress and will endure as one of the few authoritative accounts of Leibniz's life available in English
