Non-Conventional Copyright Enrico Bonadio, Nicola Lucchi, 2018-10-26 Copyright law has always somehow managed to adapt to new technological and social developments as well as to new artistic and creative practices However every time such a development occurs the legitimate question arises if the system is adaptable or if the breakthrough is so gigantic that a new system needs to be elaborated In any case new scholarly reflections are needed in regular intervals and that is exactly the purpose of this fascinating edited collection by Enrico Bonadio and Nicola Lucchi on non conventional copyright exploring from various angles the copyright issues of all sorts of creations ranging from unconventional art forms new music and atypical cultural practices to new advances in technology not forgetting to investigate the delicate issues around copyright on illegal and immoral works

Christophe Geiger University of Strasbourg France Copyright law constantly evolves to keep up with societal changes and technological advances Contemporary forms of creativity can threaten the comfortable conceptions of copyright law as creative people continually find new ways of expressing themselves In this context Non Conventional Copyright identifies possible new spaces for copyright protection With current copyright law in mind the contributors explore if the law should be more flexible as to whether new or unconventional forms of expression including graffiti tattoos land art conceptual art and bio art engineered DNA sport movements jokes magic tricks DJ sets perfume making typefaces or illegal and immoral works deserve protection Vitally the contributors suggest that it may be time to challenge some of the basic tenets of copyright laws by embracing more flexible ways to identify protectable works and interpret the current requirements for protection Additionally some contributors cast doubts about whether copyright is the right instrument to address and regulate these forms of expression Contemporary in topic this thought provoking book will be essential reading for intellectual property law scholars practitioners and policymakers Creative people and those involved in the creative industries will also find this book an engaging read Contributors include E Bonadio S Burke C Cronin T Dagne T W Dornis F J Dougherty T M Gates M P George E Haber S Karapapa Y M King T Iverson N Lucchi G Mazziotti J McCutcheon L McDonagh M Maggiore P Mezei M Mimler A G Scaria C Y N Smith X Tang Antitrust Enforcement & Intellectual Property Rights:

The Export World and Commercial Intelligence ,1924 *Producing for TV and Video* Cathrine Kellison,2006 A comprehensive practical book about the TV producer s roles and responsibilities **Copyright and Patent Laws for the Age of Artificial Intelligence** Eva Janecková,2025-05-15 This book responds to the need to distinguish human creations from those produced by AI It does so by tracing human attributes of authorship and inventorship in statutory requirements for protection and ownership in European copyright and patent laws Its main contribution lies in exposing shortcomings in how the laws are applied in the UK Germany and France It shows that the human origin of creations is traditionally inferred from their expressive form or technical character Given the advancements in AI such inferences are no longer legitimate What is more these shortcomings may eventually lead to granting copyright or patent protection where none is lawfully permitted or sufficiently justified To remedy the situation this book offers doctrinal and conceptual amendments and proposes law reforms to implement them This book guides authorities practitioners and students through the main arguments of the debate concerning copyright and patents for objects entirely or partly generated by AI It also makes original contributions to advance the ongoing academic and policy debates on AI and intellectual property law **Artificial Intelligence and Intellectual Property** Jyh-An Lee,Reto Hilty,Kung-Chung Liu,2021-02-25 Artificial Intelligence AI has become omnipresent in today s business environment from chatbots to healthcare services to various ways of creating useful information While AI has been increasingly used to optimize various creative and innovative processes the integration of AI into products services and other operational procedures raises significant concerns across virtually all areas of intellectual property IP law While AI has drawn extensive attention from IP experts globally this is the first book providing a broad and comprehensive picture from the perspectives of the very nature of AI technology its commercial implications its interaction with different kinds of IP IP administration software and data its social and economic impact on the innovation policy and

ultimately AI's eligibility as a legal entity Criminal Law in Cameroon Carlson Anyangwe, 2011 This is a pioneer long overdue and truly original book that offers a unique comprehensive and thorough exposition of the criminal law of this country by a leading scholar This latest book by Professor Carlson Anyangwe adopts a thematic approach each chapter covering a specific aspect of the criminal law The text is a clear simple and comprehensive exposition of all the offences codified in the Penal Code It offers a rich clear learned and discerning analysis to understanding of the criminal law The book is designed to instruct and to contribute to a deeper understanding of the subject the treatment of which is unique informative and makes for compelling reading This is the first textbook ever on the subject in this country and it is undoubtedly an indispensable tool of trade for judges prosecutors lawyers in private practice academic lawyers law students and law enforcement officers

Intellectual Property and Emerging Technologies Tshimanga Kongolo, 2024-11-15 This book evaluates issues and challenges emerging from the interaction between intellectual property IP and new technologies namely artificial intelligence AI big data social media internet of things IoT metaverse blockchain video gaming and voice cloning New technologies have not only shaken the current IP system but show the limits of a framework which was designed more than three centuries ago As technological innovations have rendered some established IP rules and principles difficult to apply new approaches are required to adequately respond to ensuing challenges This volume uses existing case studies and prevailing court decisions to underline the dynamic of the current system It proposes adjustments to accommodate new technologies within the current IP structure The book reflects on the challenges created by new technologies and explores alternative ways to respond to these issues This book will assist IP experts academics professionals and policy makers in their undertakings to understand various issues generated by new technologies It will also be of interest to researchers in the field of IP law and the law of emerging technologies

Toward a Conceptual Network for the Private Law of Artificial Intelligence Paweł Księżak, Sylwia Wojtczak, 2023-01-16 This book provides a set of proposals for the new conceptual network required in order to establish civil law rules for a world permeated by Artificial Intelligence These proposals are intended by their authors to push the debate on the new civil law forward In spite of the natural conservatism of jurists some innovative or even futuristic ideas are called for also because the future even this not so distant one is difficult to foresee Paradoxically and unlike in the past this lack of knowledge must not stop us from planning If it does humankind may as some pessimists already claim lose its chance to win the battle for control of the world The rise and expansion of Artificial Intelligence and robotics in recent years has highlighted a pressing need to create a suitable legal framework for this new phenomenon The debate on the subject although wide ranging and involving many new legal documents is still quite general and preliminary in nature although these preparatory works illustrate the very real need to develop appropriate new civil law arrangements It is exactly the branch of private law where the necessity of these new rules appears to be the most imperative Autonomous vehicles medical robots and expertise software raise fundamental questions on aspects of civil

liability such as culpability whereas the growth in popularity of automated intelligent software systems for concluding contracts requires a new approach to many fundamental and deeply rooted elements of contract law e g consciousness intent error deception interpretation of contracts and good faith Ruling on these specific matters demands the identification and clarification of certain key points which shall become the foundation for constructing AI robot civil law *The Cumulative Book Index* ,1995 A world list of books in the English language *Making Intellectual Property Work for Business - A Handbook for Chambers of Commerce and Business Associations Setting Up Intellectual Property Services* World Intellectual Property Organization,2012-01-01 This publication provides practical guidance on the key areas where business membership organizations can integrate intellectual property into their services This user friendly handbook is written to support a wide range of basic to more advanced intellectual property services and contains a large number of references to online resources
