Sturgis, H.E. Krehbiel. Ed. by G. Iles** Russell Sturgis, 1897 *Ecology of Sumatra* Tony Whitten, Sengli J. Damanik, 2012-06-26 The Ecology of Sumatra distills for the first time the information found in nearly 1 500 scholarly works relevant to an understanding of the full range of natural and man made ecosystems on the island many of them available only in Dutch German or Indonesian It was originally prepared by a team working at the Centre for Resource and Environmental Studies CRES at the University of North Sumatra to supplement existing documents This new version is aimed at general readers and includes a section on recent development on Sumatra as well as an additional bibliography of recent publications It contains hundreds of line drawings tables maps and photographs It is hoped that The Ecology of Sumatra will prove useful to resource managers ecologists environmental scientists and local government personnel and be enlightening to Sumatra s inhabitants and visitors It should also be of great interest to anyone wanting to learn about Southeast Asian biology *A.L.A. Booklist**, 1910 *The Plant Diversity of Malesia* P. Baas, K. Kalkman, R. Geesink, 2012-12-06 Although the only publication with a realistic claim to the title The plant diver sity of Malesia is Flora Malesiana itself we have hesitatingly chosen this title for the present proceedings volume Past present and future work on the Flora Malesiana project was the subject of a successful symposium held in August 1989 This book contains only a selection of the papers presented at that meet ing yet it covers a much greater diversity of themes than just the inventory of botanical diversity It even goes beyond the boundaries of the vast Flora Malesi ana region in several of its chapters The role of the founder of the Flora Malesiana Project Professor C G G J van Steenis repeatedly recurs in several chapters not only as director of and contributor to the project but also as a pioneer in the fields of Malesian vege tation conservation and biogeography and as an enlightened systematist whose ideas and practical recommendations for taxonomic delimitation still largely apply Botanical information made available in regional and local floras is of vital im portance for applications such as the exploitation of natural forests on a sus tainable yield basis for

establishing gene banks for the benefit of agriculture forestry and horticulture and not in the least for nature conservation
 Several chapters are devoted to these themes Floristic studies are also at the basis of the biogeographical essays and
 vegetation studies included in this book *Bulletin Texas State Library. Legislative Reference Section,1911* Booklist
 ,1910 *Photojournalism* Paul Martin Lester,2015-07-16 Originally published in 1991 A photojournalist is a mixture of a
 cool detached professional and a sensitive involved citizen The taking of pictures is much more than F stops and shutter
 speeds The printing of pictures is much more than chemical temperatures and contrast grades The publishing of pictures is
 much more than cropping and size decisions A photojournalist must always be aware that the technical aspects of the
 photographic process are not the primary concerns This book addresses ethics in photojournalism in depth with sections on
 the philosophy in the discipline on pictures of victims or disaster scenes on privacy rights and on altering images As
 important and interesting today as when it was first in print **Catalog of Copyright Entries. Third Series** Library of
