Selected Issues In Logic And Communication:

Selected Issues in Logic and Communication Trudy Govier, 1988 Selected Issues in Logic and Communication is the first anthology to explore the many points of intersection between the realms of critical thinking and modern mass communication. It raises important questions about how the mass media influence thought and considers whether a free marketplace of ideas is still a viable concept today. **Selected Issues in Logic and Communication** Trudy Govier, 1998-06-30 *High Speed*

Circuits For Lightwave Communications, Selected Topics In Electronics And Systems, Vol 1 Keh-chung Wang, 1999-01-25 High speed circuits are crucial for increasing the bandwidth of transmission and switching of voice video data over optical fiber networks. The ever increasing demand for bit rates higher than those available due to the explosion of Internet traffic has driven engineers to develop integrated circuits of performance approaching 100 Gb/s. Commercial lightwave products using high speed circuits of 10 Gb/s and beyond are readily available. High Speed Circuits for Lightwave Communications presents the latest information on circuit design, measured results, applications and product development. It covers electronic and opto-electronic circuits for transmission, receiving and cross point switching. These circuits were implemented with various state of the art IC technologies including Si BJT, GaAs MESFET, HEMT, HBT as well as InP HEMT and HBT. The book, written by more than 50 experts, will benefit graduate students, researchers and engineers who are interested in or work in this exciting and challenging field of optical communications. *Propaganda and Information Warfare in the Twenty-First Century* Scot Macdonald, 2006-12-05 This is the first book to analyze how the technology to alter images and rapidly distribute them can be used for propaganda and to support deception operations. In the past, propagandists and those seeking to conduct deception operations used crude methods to alter images of real people, events and objects which could usually be detected relatively easily. Today, however, computers allow propagandists to create any imaginable image, still or moving, with appropriate accompanying audio. Furthermore, it is becoming extremely difficult to detect that an image has been manipulated and the Internet, television and global media make it possible to disseminate altered images around the world almost instantaneously. Given that the United States is the sole superpower, few if any adversaries will attempt to fight the US military conventionally on the battlefield. Therefore, adversaries will use propaganda and deception, especially altered images, in an attempt to level the battlefield or to win a war against the United States without even having to fight militarily. *Propaganda and Information Warfare in the 21st Century* will be of great interest to students of information war, propaganda, public diplomacy and security studies in general. *Reasonable Responses* Catherine E. Hundleby, 2017-01-17 This tribute to the breadth and influence of Trudy Govier's philosophical work begins with her early scholarship in argumentation theory, paying special attention to its pedagogical expression. Most people first encounter Trudy Govier's work and many people only encounter it through her textbooks, especially *A Practical Study of Argument*, published in many editions. In addition to the work on argumentation that has continued throughout her career, much of Govier's later work addresses social philosophy.

and the problems of trust and response to moral wrongs The introduction by Catherine Hundleby situates Govier's research along the path of her unusual academic life While following the timeline of Govier's research publication in this collection the authors build on her work and suggest certain new connections between her argumentation theory and social philosophy A Practical Study of Argument first published in 1985 situates Govier among a distinct segment of informal logicians whose concerns about teaching reasoning to post secondary students orient their research Takuzo Konishi argues Moira Kloster evaluates Govier's progress in the challenge of providing critical thinking education to diverse and changing social contexts Shifting gears to social philosophy but still addressing education Laura Elizabeth Pinto explores the significance of Govier's work on trust for explaining the problem of audit culture for teaching At the centre of this volume social philosophy receives an abstract meta ethical defense from Linda Radzik Moving solidly into the domain of normative social philosophy Alice MacLachlan reconsiders Govier's condemnation of revenge by viewing it as a form of moral address but she notes how revenge as an act of communication contrasts with argumentation in lacking the respect that Govier maintains is intrinsic to argumentation MacLachlan ultimately agrees that revenge is morally indefensible The practical challenges of addressing others in the aftermath of wrongdoing especially in public contexts can make it difficult to distinguish between victims and combatants or wrongdoers Alistair Little and Wilhelm Verwoerd explain and Kathryn Norlock argues that forgiveness is psychologically vexed too People may recognize transformation to be in principle possible for all people Norlock argues and yet we may find the evidence regarding some particular evildoer sufficient to count that person as an exception Finally Govier responds to the various papers

Many Sides: A Protagorean Approach to the Theory, Practice and Pedagogy of Argument M. Mendelson, 2013-06-29 Many Sides is the first full length study of Protagorean antilogic an argumentative practice with deep roots in rhetorical history and renewed relevance for contemporary culture Founded on the philosophical relativism of Protagoras antilogic is a dynamic rather than a formal approach to argument focused principally on the dialogical interaction of opposing positions anti logoi in controversy In ancient Athens antilogic was the cardinal feature of Sophistic rhetoric In Rome Cicero redefined Sophistic argument in a concrete set of dialogical procedures In turn Quintilian inherited this dialogical tradition and made it the centrepiece of his own rhetorical practice and pedagogy Many Sides explores the history theory and pedagogy of this neglected rhetorical tradition and by appeal to recent rhetorical and philosophical theory reconceives the enduring features of antilogical practice in a dialogical approach to argumentation especially suited to the pluralism of our own age and the diversity of modern classrooms

Handbook of Epistemology I. Niiniluoto,Matti Sintonen,Jan Wolenski,2004-03-31 Epistemology or theory of knowledge has always been one of the most important if not the most important field of philosophy New arguments are constantly brought to bear on old views new variants are marshalled to revive ancient stands new concepts and distinctions increase the sophistication of epistemological theories There are a great many excellent textbooks monographs as well as anthologies consisting of articles in epistemology Similarly there are useful philosophical dictionaries which contain a great number of relatively short entries and general philosophical handbooks which also touch epistemological issues This volume of 27 essays grew out from the interest to see a handbook which is devoted entirely to the historical roots and systematic development of theory of knowledge It is not intended to compete but to supplement the already existing literature It aims at giving both beginners and more advanced students as well as professionals in epistemology and other areas of philosophy an overview of the central problems and solutions of epistemology The essays are self contained and still often rather extensive discussions of the chosen aspects of knowledge The contributions presuppose very little familiarity with previous literature and only a few of them require the mastery of even elementary logical notation This we hope makes the volume also accessible to the philosophically interested wider audience The contributors were asked to provide substantial up to date self contained and balanced surveys of the various subareas and more specific topics of epistemology with reference to literature
