Nivison,2018-07-09 In his last essay just weeks before his death at the age of 91 David S Nivison says Breaking into a formal system such as a chronology must be like breaking into a code If you are successful success will show right off Since the late

1970 s Nivison has focused his scholarship on breaking the code of Three Dynasties Xia Shang Zhou chronology by establishing an innovative methodology based on mourning periods astronomical phenomenon and numerical manipulations derived from them Nivison is most readily known in the field for revising and then revising again the date of the Zhou conquest of Shang and for his theory that Western Zhou kings employed two calendars His so called Two yuan theory the second being set in effect upon the death of the new king s predecessor and counted from the completion of post mourning rites for him i e a second first year Nivison s enabling discovery that the Bamboo Annals BA had a historical basis was initially designed to make Wang Guowei s analysis of lunar phase terms the so called Four quarter theory that separated each month into four quarters work for Western Zhou bronze inscriptions In order to do so he had to assume that some inscriptions used a second yuan counted from completion of mourning The king s death was the most important event late in a reign so this implied that a king s reign of record was normally counted from the second yuan omitting initial mourning years It follows that when the unexpressed mourning years are forgotten or edited out but the dates of the beginning and end of the dynasty are still known the remaining reigns of record cluster toward the beginning and end and a reign in the middle is enlarged Problems ideas and solutions like the one described above are found throughout this new collection of important works on chronology astronomy and historiography
