Service Learning History Theory And Issues:

Service-Learning Bruce W. Speck, Sherry Hoppe, 2004-07-30 Although service learning programs can have diverse theoretical roots faculty who engage their students in service learning may not be cognizant of alternatives to the one they adopt This book presents not only a historical perspective but it also debates the theories and issues surrounding the conflicts inherent in those theories One theory based on a philanthropic model engages students in a commitment to serve others from a sense of gratitude for their own good fortunes or from a desire to give back to communities from which they have benefited Typically service learning programs based on the philanthropic or communitarian models deal with the overt needs of community members In contrast the civic model requires deeper analysis of the various political and social issues that may be the cause of social conditions that require the help of the more fortunate Opponents of the civic theory fear that proponents see the classroom as a forum for advancing particular political agendas conceivably indoctrinating students to a particular view of social injustices This book presents the theories and critiques their merits and liabilities providing insight into the widely divergent curricular applications It also examines the reasons professors should consider service learning components in their classes and provides resources for further investigation of both theory and practice **The SAGE**

Dunn, Bernard B. Beins, Maureen A. McCarthy, G. William Hill, IV, 2010-01-12 Introductory and capstone experiences in the undergraduate psychology program are crucial ways to engage students in their major and psychology department impart realistic expectations and prepare them for life beyond college Providing the right orientation and capstone courses in psychology education is increasingly a concern of instructors department chairs program directors and deans and both types

of courses have become important sources for gathering pre and post coursework assessment data for degree learning outcomes. The strategies presented here have been designed to help educators examine issues around teaching the introductory or careers course and developing a psychology specific orientation program. The authors also provide concrete suggestions for building capstone experiences designed to fit the needs of a department, its pedagogical philosophy or the educational agenda of the college or university. Undergraduate psychology curriculum designers and instructors can benefit from learning innovative and effective strategies for introducing the major to first year students and at graduation for bringing closure, reinforcing the overall departmental learning outcomes and helping students apply their disciplinary knowledge in capstone experiences and post graduate life. In this collection of articles, psychology instructors involved in the improvement of teaching and learning review the research and share their own successes and challenges in the classroom. Discussions include effective practices for helping students become acclimated to and engaged in the psychology major, application of developmental knowledge and learning communities to course design and use of quality benchmarks to improve introductory and capstone courses. Other chapters describe innovations in the design of stand alone courses and offer concrete advice on counseling psychology graduates about how to use what they have learned beyond their higher education experiences.

Service-Learning Iqbal Ahmad, Rani Gul, 2023-11-17 This book examines key concepts, principles and applications of the service learning approach. Service learning is a community based educational approach to improve a student's academic, personal, leadership, civic and professional development through civic engagement. Unlike other traditional approaches to education, service learning students can use their classroom based knowledge and skills in a real life context in collaboration with community organisations and residents. This volume explores the theory, research and practices of how service learning is understood, implemented and evaluated in different contexts. It provides essential guidelines to implement and integrate service learning at educational institutions through extensive discussions on the principles, philosophical challenges, opportunities and its applications. Key themes include Theory of service learning, Concept of service learning, Challenges to service learning, Applications of service learning, Service learning as professional development, Service learning as communication. Accessibly written, this book would be of interest to faculty, students, community organisations and researchers working in the areas of education, pedagogy, sociology and social work.

Civic Engagement and Politics: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources, 2019-01-04 Creating transparency between government and citizens through outreach and engagement initiatives is critical to promoting community development and is also an essential part of a democratic society.
