Services For Urban Poor Section:

Basic Services for Urban Poor Archana Ghosh, S. Sami Ahmad, Shipra Maitra, 1995 **Public Services and the Urban Poor in Mumbai: A Report Card** Suresh Balakrishnan, 1998 *Inclusion and Exclusion of the Urban Poor in Dhaka* Rasheda Khan, 2023-10-13

Inclusion and Exclusion of the Urban Poor in Dhaka explores how the inhabitants of poor neighborhoods in Dhaka Bangladesh gain inclusion in the city at the face of exclusion. The book considers how the people of poor neighborhoods encounter the exclusionary behavior of city development and how their inclusionary attempts have influenced the urban design. The book is presented in two parts: first it explains how people in poor neighborhoods face exclusion because of the imbalance of power and politics. Second, it demonstrates how the existing exclusion of urban poor is affecting their strategies to gain access to urban services through people's power and politics. Focusing on the transdisciplinary field of urban anthropology, the chapters uncover the urban forces, policies, and actions that facilitate urban politics. It also investigates the people who live in poor neighborhoods who, in the face of exclusion, have included themselves in urban development planning and design by employing diverse strategies against those forces in the urban politics, e.g., accepting dominance, bargaining, or having control over their lives. This book will recontextualize an ethnographic inquiry into the exclusion and inclusion of the people within city development design plans and innovations in applications of anthropological theory and methodology. This book will encourage the reader to understand the politics of state's development projects and plans and furthermore instigate the city government planners and policymakers to focus on the people's political power and agency that enables them to achieve inclusion. It will therefore be of interest to researchers and students of urban planning and development, urban geography, and urban anthropology, as well as planning professionals and policymakers.

Urban Waste and Sanitation Services for Sustainable Development Bas van

Vliet, Joost van Buuren, Shaaban Mgana, 2013-11-12 Urban sanitation and solid waste sectors are under significant pressure in East Africa due to the lack of competent institutional capacity and the growth of the region's urban population. This book presents and applies an original analytical approach to assess the existing socio-technical mixtures of waste and sanitation systems and to ensure wider access, increase flexibility and ecological sustainability. It shows how the problem is not the current diversity in waste and sanitation infrastructures and services and variety of types and scales of technology of formal and informal sector involvement and of management and ownership modes. The book focuses instead on the lack of an integrative approach to managing and upgrading of the various waste and sanitation configurations and services so as to ensure wider access, flexibility and sustainability for the low income populations who happen to be the main stakeholders. This approach, coined Modernized Mixtures, serves as a nexus throughout the book. The empirical core addresses the waste and sanitation challenges and debates at each scale from the micro level households to the macro level international support and is based on the results of a five year long interdisciplinary empirical research program. It assesses the socio-technical diversity in waste and sanitation and provides viable solutions to sanitation and waste management in East Africa. This book provides students, researchers and professionals in environmental technology, sociology, management and urban planning with an integrated analytical perspective on centralized and decentralized waste and sanitation configurations and tools for improvement in the technology, policy and management of sanitation and solid waste sectors. Climate Change, Disaster Risk, and the Urban Poor Judy L. Baker, 2012-04-01 The urban poor living in slums are at particularly high risk from the impacts of climate change and natural hazards. This study analyzes key issues affecting their vulnerability with evidence from a number of cities in the developing world. *The Urban Poor in Latin America* Marianne Fay, 2005 About half of the region's poor live in cities and policy makers across Latin America are increasingly interested in policy advice on how to design programmes and policies to tackle poverty. This publication argues that the causes of poverty, the nature of deprivation and the policy levers to fight poverty are to a large extent site specific. It therefore focuses on strategies to assist the urban poor in making the most of the opportunities offered by cities such as larger labour markets and better services while helping them cope with the negative aspects such as higher housing costs, pollution, risk of crime and less social capital.

Governance for Urban Services Shabbir Cheema, 2020-03-02 This book examines three vital issues in urbanization and democratization: the institutional structures and processes of urban local governance to improve access to urban services; their outcomes in relation to low income groups; access to services; citizen participation in local governance; accountability of local leaders and officials; and transparency in local governance and the factors that influence access to urban services, especially for the poor and marginalized groups. Further, it describes decentralization policies, views of the residents of slums on the effectiveness of government programs and innovations in inclusive local governance and access to urban services.
