Governing Global Networks Mark W. Zacher, Brent A.

Sutton, 1996 Governing Global Networks argues that most international regimes are grounded in states mutual cooperation and not in the dictates of the most powerful states It focuses on the regimes for four important international industries shipping air transport telecommunications and postal services Of particular importance to these regimes have been states interests in both the free flow of commerce and their policy autonomy The authors examine the relationship between these potentially conflicting goals In particular they trace the impact of deregulation which has led some states increasingly to place gains from economic openness ahead of their desire to maintain a high degree of control of their own economies and to the decline of the traditional cartel elements of these regimes This analysis is an important contribution to theoretical debates between neo realists and neo liberals in the study of international organisations and international political economy

Comparative Law Relating to Patents and Abuse of Dominance in Global Telecommunication Industry Amrit Subhadarsi, 2018-12-15 The intersection between Competition law and intellectual property has always been a subject matter of controversy because of the very nature of the two subject areas On the one hand competition law seeks to protect the interest of traders and consumers by way of abuse of monopoly power on the part of an enterprise or an individual and on the other hand the grant of an intellectual property right to a person automatically excludes other persons from making use of the property on which the right has been vested

EC Competition and Telecommunications Law Christian Koenig, Andreas Bartosch, 2009-03-27 This new volume updates the groundbreaking analysis of its first edition in 2002 when the EC common regulatory framework for electronic communications networks and services had just entered into force So much has changed in the intervening years that that this new edition bears little resemblance to its predecessor with every

chapter either extensively altered or entirely new. It remains however the most detailed and comprehensive overview available of the application of the EC Treaty's competition rules in the markets for telecommunications and audiovisual media and of the applicable regulatory framework. In thirteen chapters each contributed by one or more noted legal authorities in the field, the second edition of *EC Competition and Telecommunications Law* covers the full range of EC telecommunications law across all major areas of both institutional and substantive law both on the international and EC levels including the following: State aid, the merger control regulation, justification for sector specific regulation in EC competition law, network access, authorizations and privileges, and mobile telephony. Relevant EC media and communications law and relevant aspects of EC competition law are dealt with in detail. While some chapters focus on competition law, others deal primarily with sector specific regulation. There is practical guidance throughout on procedural matters alongside analysis of the substantive provisions. Well known in its first edition, this thoroughly revised and updated version continues to be vital reading for practitioners in particular those specializing in European competition law and for company and in-house lawyers who are seeking advice on how European law affects their business. As a detailed analysis of the basic legislative and regulatory framework of European telecommunications law, it will be an invaluable reference work for lawyers, judges, regulators and policymakers in all the EC Member States as well as for students and teachers of European law.

Governance in a Global Economy Miles Kahler, David A. Lake, 2021-08-10. Critics of globalization claim that economic integration drains political authority from states, devolving authority to newly empowered regions, delegating it to supranational organizations and transferring it to multinational firms and nongovernmental organizations. Globalization is also attacked for forcing convergence of state institutions and policies and threatening the ability of societies to chart their own democratically determined courses. In *Governance in a Global Economy*, Miles Kahler and David Lake assemble the contributions of seventeen leading scholars who have systematically investigated how global economic integration produces changes of governance. These authors conclude that globalization has created a new and intricate fabric of governance, but one that fails to match the stark portrait of beleaguered states. Exploring changes in governance across several policy areas such as tourism, trade, finance, and fiscal and monetary policy, the authors demonstrate that globalization changes the policy preferences of some actors, increases the bargaining power of others, and opens new institutional options for yet others. By reintroducing agency and choice into our understanding of globalization, this book provides important new insights into the complex and contingent effects of globalization on political authority and governance. The introduction and the conclusion are by the editors; the contributors are James A. Caporaso, Benjamin J. Cohen, Barry Eichengreen, Zachary Elkins, Geoffrey Garrett, Peter Gourevitch, Virginia Haufler, Michael J. Hiscox, Robert O. Keohane, Lisa L. Martin, Walter Mattli, Kathleen R. McNamara, Joseph S. Nye Jr., Jonathan Rodden, Ronald Rogowski, Beth A. Simmons, and Peter Van Houten.
