Initial National Priorities for Comparative Effectiveness Research Institute of Medicine, Board on Health Care Services, Committee on Comparative Effectiveness Research Prioritization, 2009-11-14 Clinical research presents health care providers with information on the natural history and clinical presentations of disease as well as diagnostic and treatment options In today's healthcare system patients physicians clinicians and family caregivers often lack the sufficient scientific data and evidence they need to determine the best course of treatment for the patient's medical conditions Initial National Priorities for Comparative Effectiveness Research CER is designed to fill this knowledge gap by assisting patients and healthcare providers across diverse settings in making more informed decisions In this 2009 report the Institute of Medicine's Committee on Comparative Effectiveness Research Prioritization establishes a working definition of CER develops a priority list of research topics and identifies the necessary requirements to support a robust and sustainable CER enterprise As part of the 2009 American Recovery and Reinvestment Act Congress appropriated 1.1 billion in federal support of CER reflecting legislators' belief that better decisions about the use of health care could improve the public's health and reduce the cost of care The Committee on Comparative Effectiveness Research Prioritization was successful in preparing a list 100 top priority CER topics and 10 recommendations for best practices in the field

Guiding Neurosurgery by Evidence B.E. Pollock, 2006 Guiding Neurosurgery by Evidence provides its readers with a succinct review of contemporary neurosurgical practice when evaluated by evidence based medicine standards It begins with an introduction of the concept

and principles of evidence based medicine The subsequent chapters address the topics of brain tumor epidemiology benign adult brain tumors pediatric neurosurgery endovascular treatment of cerebrovascular disorders lumbar spine surgery minimally invasive spine surgery stereotactic radiosurgery trauma and the treatment of chronic pain disorders by neurostimulation Each chapter summarizes the available literature and grades it according to the quality of the evidence In addition this book highlights not only the usefulness of evidence based medicine in neurosurgical practice but also its limitations with regard to neurosurgical disorders that are frequently rare and therefore impossible to evaluate in randomized clinical trials Neurological surgeons and neurologists both practicing physicians and residents in training will find in this publication valuable information about the practice of the different neurosurgical subspecialties by evidence based medicine standards Annual Report to Congress United States.
