Seurat's Circus Sideshow Richard Thomson, 2017-02-15 Georges Seurat 1859 1891 created just six major figure paintings during his lifetime one of which the alluring Circus Sideshow Parade de cirque has remained the most

challenging to interpret since it first intrigued viewers at the 1888 Salon des Indépendants in Paris. Unlike Seurat's earlier sunlit scenes, *Circus Sideshow* presents a nighttime tableau depicting a parade, a street show enticing passersby to purchase tickets. With its geometrically precise composition, muted colors, and elements of abstraction, the painting stands apart as a masterpiece of Neo-Impressionism and heralds Seurat's subsequent depictions of popular entertainments. This book, the first comprehensive study of *Circus Sideshow*, situates the painting in the context of nineteenth-century Paris and of the many social changes France was undergoing. Renowned art historian Richard Thomson illuminates the roles of caricature, naturalist, and avant-garde painting, and circus advertising, examining Seurat's use of contemporary aesthetic theory and discussing how artists ranging from Rouault to Picasso mined the sideshow theme into the twentieth century. Illustrated with Seurat's related drawings, works by other artists, and period posters and broadsides, *Seurat's Circus Sideshow* delves into the history of traveling circuses and seasonal fairs in France, exploring the ongoing appeal of this traditional form of popular entertainment through the fin de siècle. Two additional essays describe the painting's enthusiastic reception in New York upon its 1929 debut and present the results of a fresh technical examination of the canvas, making this volume the definitive resource on one of Seurat's most captivating works. Modern Art & the Remaking of Human Disposition Emmelyn

Butterfield-Rosen, 2021-11-09. How artists at the turn of the twentieth century broke with traditional ways of posing the bodies of human figures to reflect modern understandings of human consciousness. With this book, Emmelyn Butterfield-Rosen brings a new formal and conceptual rubric to the study of the turn of the century modernism, transforming our understanding of the era's canonical works. Butterfield-Rosen analyzes a hitherto unexamined formal phenomenon in European art: how artists departed from conventions for posing the human figure that had long been standard. In the decades around 1900, artists working in different countries and across different media began to present human figures in strictly frontal, lateral, and dorsal postures. The effect, both archaic and modern, broke with the centuries-old tradition of rendering bodies in torsion, with poses designed to simulate the human being's physical volume and capacity for autonomous thought and movement. This formal departure destabilized prevailing visual codes for signifying the existence of the inner life of the human subject. Exploring major works by Georges Seurat, Gustav Klimt, and the dancer and choreographer Vaslav Nijinsky, replete with new archival discoveries, *Modern Art and the Remaking of Human Disposition* combines intensive formal analysis with inquiries into the history of psychology and evolutionary biology. In doing so, it shows how modern understandings of human consciousness and the relation of mind to body were materialized in art through a new vocabulary of postures and poses. **Art Books** Wolfgang M. Freitag, 1997. Expanded to twice as many entries as the 1985 edition and updated with new publications, new editions of previous entries, titles missed the first time around, more of the artist's own writings, and monographs that deal with significant aspects or portions of an artist's work, though not all of it. The listing is alphabetical by artist, and the index by author. The works cited include analytical and critical biographical and enumerative their formats.
