Vitality Jens-Otto Andersen, 2019-03-12 Today's science has a huge knowledge about the compounds in our foods minerals proteins vitamins antioxidants etc but we must include also their vitality properties to fully understand food quality Vitality here means the ability of living organisms to keep up their life processes and life cycle while being under heavy pressure from the surroundings So living organisms are not understood based on compounds alone and we must look at their more or less vulnerable organs and life processes In the same way we need to re define our concept of health from absence of single diseases towards the ability of the organism to maintain a complex balance in the organs and the life processes during the major changes taking place recurrently during our life cycle The book presents in a popular way a spectrum of vitality examples taken from research and everyday life
