Plurality, Conjunction and Events P. Lasersohn, 2013-03-09 Plurality Conjunction and Events presents a novel theory of plural and conjoined phrases in an event based semantic framework It begins by reviewing options for treating the alternation between collective and distributive readings of sentences containing plural or conjoined noun phrases including analyses from both the modern and the premodern literature It is argued that plural and conjoined noun phrases are unambiguously group denoting and that the collective distributive distinction therefore must be located in the predicates with which these noun phrases combine More specifically predicates must have a hidden argument place for events the

collective distributive distinction may then be represented in the part whole structure of these events This allows a natural treatment of collectivizing adverbial expressions and of pluractional affixes it also allows a unified semantics for conjunction in which conjoined sentences and predicates denote groups of events much like conjoined noun phrases denote groups of individuals

*The Embryonic Development of Drosophila melanogaster* Jose A. Campos-Ortega,Volker Hartenstein,2013-11-11 but our knowledge is so weak that no philosopher will ever be able to completely explore the nature of even a fly Thomas Aquinas In Symbolum Apostolorum 079 RSV p 96 This is a monograph on embryogenesis of the fruit fly *Drosophila melanogaster* conceived as a reference book on the morphology of embryonic development A monograph of this extent and content is not yet available in the literature on *Drosophila* embryology and we believe that there is a real need for it Thanks to the progress achieved during the last ten years in the fields of developmental and molecular genetics work on *Drosophila* development has expanded considerably creating an even greater need for the information that we present here Our own interest in embryonic development of the wild type arose several years ago when we began to study the development of mutants In the course of these studies we repeatedly had occasion to discover gaps and inadequacies in the

existing literature on the embryology of the wild type so that we undertook to investigate many of these problems ourselves. Convinced that many of our colleagues will have encountered similar difficulties we decided to publish the present monograph. Although not explicitly recorded, Thomas Aquinas was probably referring to the domestic fly and not to the fruit fly. Irrespective of which fly he meant, however, we know that Thomas was right.
