Seventeenth-century Economic Documents Joan Thirsk, John Phillips Cooper, 1972 *Seventeenth-century Economic Documents* Joan Thirsk, John Phillips Cooper, 1972 *Economic History of the Seventeenth Century* G. P. Jones (Litt. D.),

The Business Community of Seventeenth-Century England Richard Grassby, 2002-11-07 A comprehensive study of the business community in a pre industrial economy **The Making of the English Middle Class** Peter Earle, 1989-01-01 This is the first major study of a neglected yet extremely significant subject the London middle classes in the period between 1660 and 1730 a period in which they created a society and economy that can be seen with hindsight to have ushered in the modern world Using a wealth of material from contemporary sources including wills business papers inventories marriage contracts divorce hearings and the writings of Daniel Defoe and Samuel Pepys Peter Earle presents a fully rounded picture of the middling sort of people getting to the hearts of their lives as men and women struggling for success in the biggest richest and most middle class city in contemporary Europe He examines in fascinating and convincing detail the business life of Londoners from apprenticeship through the problems and potential rewards of different occupational groups going on to look at middle class family social political and material life from relationships with spouses children servants and neighbors to food and clothes and furniture to sickness death and burial Stimulating scholarly and constantly illuminating this book is an important and impressive contribution to English social history **English Merchants in Seventeenth-Century Italy** Gigliola Pagano De Divitiis, 1997 This book shows how England's conquest of Mediterranean trade proved to be the first step in building its future economic and commercial hegemony and how Italy lay at the heart of that process In the seventeenth century the Mediterranean was the largest market for the colonial products which were exported by English merchants as well as being a source of raw materials which were indispensable for the growing and increasingly aggressive domestic textile industry The new free port of Livorno became the linchpin of English trade with the Mediterranean and together with ports in southern Italy formed part of a system which enabled the English merchant fleet to take control of the region's trade from the Italians In her extensive use of English and Italian archival sources the author looks well beyond Braudel's influential picture of a Spanish dominated Mediterranean world In doing so she demonstrates some of the causes of Italy's decline and its subsequent relegation as a dominant force in world trade *England's Baltic Trade in the Early Seventeenth Century* Trade J. K. Fedorowicz, 1980 England's relationship with the Baltic trading area has remained a generally neglected aspect of English commercial development in the seventeenth century The spectacular colonial ventures have traditionally attracted more historical attention although the Baltic trade in this period was more fundamental to the English economy it supplied precisely those naval commodities such as flax hemp timber pitch and tar which facilitated the creation of fleets for the colonial trades Medieval English trade had been conditioned by a search for markets and the predominantly agricultural economy of the Polish Commonwealth proved to be an ideal target for cloth exports By the early seventeenth century

however this traditional relationship was changing The growing English fleets demanded steady supplies of naval stores which Poland was increasingly unable to supply while the Polish economy weakened by wars and entering a period of decline could no longer afford the luxury of cloth imports from England **The World of William Penn** Richard S. Dunn, Mary Maples Dunn, 2015-09-29 A collection of 20 essays by a distinguished panel of specialists in British and American history that explores the complex political economic intellectual religious and social environment in which William Penn lived and worked

Barry, H. French, 2004-11-23 This collection of essays is arranged around the central issue raised by a raft of new empirical research the relationship between social identity or the vision of the self and the ways in which this can explain historical agency If identities in early modern society were multiple complex and dependent on context rather than homogenous consistent or easily determined then it is difficult to make simple causal links to behaviour This collection aims to make innovative new research on the structures of English society available to the wider scholarly audience The essays use a number of detailed contextual case studies to explore the twin themes of the nature of identities in early modern society and their role in influencing historical agency They examine the variety of identities available to individuals in early modern England and the ways in which these were invoked and employed
