Markets Or Governments 2nd Edition Choosing Between Imperfect Alternatives:

Markets or Governments, second edition Charles Wolf, Jr.,1993-09-02 Provides a formal theory of nonmarket failure analyzing such problems as redundant costs monopoly frequency of unanticipated externalities and bureaucracy in such nonmarket institutions as foundations universities and government A theory of market failures is well established in economics but the same has not been true for the study of nonmarket failures Markets or Governments remedies this situation by providing a formal theory of nonmarket failure analyzing such problems as redundant costs monopoly frequency of unanticipated externalities and bureaucracy in such nonmarket institutions as foundations universities and government This new edition updates the data and results contained in the first edition and includes references and applications of the theory to the ongoing process of system transformation in Russia Ukraine and Eastern Europe The discussion of earlier literature that is relevant to the theory of nonmarket failure has been expanded **Markets Or Governments** Charles Wolf,1988-01-01 Economic studies historically have either extolled the virtues of perfect markets or decried the market s shortcomings proposing that governments correct market failure This book proposes as a counterweight to these views a theory of nonmarket failure and examines in great detail the shortcomings of government efforts to replace or to regulate markets It is an unusually thorough analysis that can be used to make more systematic comparisons between markets and governments and to arrive at more intelligent choices between them After reviewing the existing theory of market shortcomings Wolf develops a parallel framework for analyzing the shortcomings of government elaborating the inherent characteristics of government operations and the problems they present He then considers how these predictable types of nonmarket failure can be taken into account in improving the formulation of public policy And he compares market and nonmarket alternatives both in their theoretical and empirical aspects Wolf concludes that while both markets and governments have inherent shortcomings and the choice between them is never a pure one real world situations always involve some combination of the two alternatives markets do a better job than governments They are more efficient according to both static and dynamic criteria With respect to equity and other non efficiency considerations however both markets and governments have strengths and weaknesses Finally Wolf points out that government can play an important role in improving and extending the functioning of markets And perhaps most controversially he argues that market forces themselves can play an important role in improving the functioning of government They can reduce the incidence of nonmarket failure by injecting market incentives into government operations Charles Wolf Jr is Dean of the RAND Graduate School of Policy Studies and director of the RAND Corporation s Research Program in International Economic Policy He was chairman of RAND s Economics Department for 12 years and has written widely in the fields of economics defense policy and foreign policy A RAND Corporation Research Study **Markets Or Governments** Charles Wolf (Jr.),1988 The Capacity to Govern Yehezkel Dror,2012-12-06 The inadequacies of contemporary forms of governance are increasingly recognized the

brain drain from politics distrust of governments the danger of mass media and money dominated elections and the failure of governments to find good policy options on major issues Industry civil society and non governmental organizations however important cannot compensate for government s incapacity to shape the future which only it is democratically entitled to do Radical improvements in governance are urgently needed but salient proposals are scarce This book diagnoses contemporary governments as obsolete and proposes changes in values structures staffing public understanding and political culture to equip governance for the radically novel challenges of the 21st century This is the first Report dealing with governance commissioned and approved by the Club of Rome testifying to the significance of this book

Contemporary Capitalism J. Rogers Hollingsworth, Robert Boyer, 1997 This book argues that there is no single best institutional arrangement for organizing modern societies Therefore the market should not be considered the ideal and universal arrangement for coordinating economic activity Instead the editors argue the economic institutions of capitalism exhibit a large variety of objectives and tools that complement each other and can not work in isolation The various chapters of the book ask what logics and functions institutions follow and why they emerge mature and persist in the forms they do
