Markov Chains Theory And Applications:

Markov Chains Bruno Sericola,2013-08-05 Markov Chains Theory and Applications Markov chains are a fundamental class of stochastic processes They are widely used to solve problems in a large number of domains such as operational research computer science communication networks and manufacturing systems The success of Markov chains is mainly due to their simplicity of use the large number of available theoretical results and the quality of algorithms developed for the numerical evaluation of many metrics of interest The author presents the theory of both discrete time and continuous time homogeneous Markov chains He carefully examines the explosion phenomenon the Kolmogorov equations the convergence to equilibrium and the passage time distributions to a state and to a subset of states These results are applied to birth and death processes He then proposes a detailed study of the uniformization technique by means of Banach algebra This technique is used for the transient analysis of several queuing systems *Markov Chains: Theory and Applications* ,2025-03-28 Markov Chains Theory and Applications Volume 52 in the Handbook of Statistics series highlights new advances in the field with this new volume presenting interesting chapters on topics such as Markov Chain Estimation Approximation and Aggregation for Average Reward Markov Decision Processes and Reinforcement Learning Ladder processes symmetric functions and semigroups Continuous time Markov Chains and Models Study via Forward Kolmogorov System Analysis of Data Following Finite State Continuous Time Markov Chains Computational applications of poverty measurement through Markov model for income classes and more Other sections cover Estimation and calibration of continuous time Markov chains Additive High Order Markov Chains The role of the random product technique in the theory of Markov chains on a countable state space On estimation problems based on type I Longla copulas and Long time behavior of continuous time Markov chains Provides the latest information on Markov Chains Theory And Applications Offers outstanding and original reviews on a range of Markov Chains research topics Serves as an indispensable reference for researchers and students alike **Markov Chains** Dean L. Analyzing Markov Chains using Kronecker Products Tugrul Dayar,2012-07-25 Kronecker products are used to define the underlying Markov chain MC in various modeling formalisms including compositional Markovian models hierarchical Markovian models and stochastic process algebras The motivation behind using a Kronecker structured representation rather than a flat one is to alleviate the storage requirements associated with the MC With this approach systems that are an order of magnitude larger can be analyzed on the same platform The developments in the solution of such MCs are reviewed from an algebraic point of view and possible areas for further research are indicated with an emphasis on preprocessing using reordering grouping and lumping and numerical analysis using block iterative preconditioned projection multilevel decomposition and matrix analytic methods Case studies from closed queueing networks and stochastic chemical kinetics are provided to motivate decomposition and matrix analytic methods respectively **Stability Problems for Stochastic Models: Theory and Applications** Alexander Zeifman,Victor Korolev,Alexander Sipin,2021-03-05 The aim of this Special Issue of Mathematics is to commemorate the outstanding Russian mathematician Vladimir Zolotarev whose 90th birthday will be celebrated on February 27th 2021 The present Special Issue contains a collection of new papers by participants in sessions of the International Seminar on Stability Problems for Stochastic Models founded by Zolotarev Along with research in probability distributions theory limit theorems of probability theory stochastic processes mathematical statistics and queueing theory this collection contains papers dealing with applications of stochastic models in modeling of pension schemes modeling of extreme precipitation construction of statistical indicators of scientific publication importance and other fields
