Mars Wars Thor Hogan, 2009-08-13 On the 20th anniversary of the first human landing on the Moon President George H W Bush stood atop the steps of the National Air and Space Museum in Washington D C and proposed a long range human exploration plan that included the successful construction of an orbital space station a permanent return to the Moon and a mission to Mars This enterprise became known as the Space Exploration Initiative SEI The president charged the newly reestablished National Space Council with providing concrete alternatives for meeting these objectives To provide overall focus for the new initiative Bush later set a thirty year goal for a crewed landing on Mars Within a few short years after this Kennedyesque announcement however the initiative had faded into history the victim of a flawed policy process and a political war fought on several different fronts The story of this failed initiative was a tale of organizational cultural and personal confrontation by key protagonists and critical battles Some commentators have argued that SEI was doomed to fail

due primarily to the immense budgetary pressures facing the nation during the early 1990s The central thesis of Mars Wars The Rise and Fall of the Space Exploration Initiative suggests however that failure was not predetermined Instead it was the result of a deeply flawed decision making process that failed to develop or even consider policy options that may have been politically acceptable given the existing political environment **Tales of Myths and Fantasy** Darryl Gopaul,2005-03 While many of these stories deal with tales based on folklore of Trinidad and the West Indies there is an extension into the imaginary world of outer space and what that may have in store for us **Transformations** Mike Ashley,2005-02-01 This is the second of three volumes which chart the history of the science fiction magazine from the earliest days to the present The first volume Time Machines traced the development of the sf magazine from its earliest days and the creation of the first specialist magazine Amazing Stories Transformations takes up the story to reveal a turbulent period that was to witness the extraordinary rise and fall and rise again of science Britain s foremost sf historian Mike Ashley charts the sf boom years in the wake of the nuclear age that was to see the The Golden Age of Science Fiction with the emergence of magazines such as Galaxy Startling Stories and Fantastic as well as authors like Isaac Asimov Philip K Dick and Frank Herbert He then goes on to explore the bust years of 1954 1960 followed by the renaissance in the 1960s led by the new wave of British authors like Michael Moorcock and J G Ballard and the rise in interest of fantasy fiction encouraged by Lord of the Rings and the Conan books of Robert E Howard Transformations concludes with an examination of the new found interest in sf magazines during the late 1960s and the incredibly influential roles Star Trek the film 2001 A Space Odyssey and above all the first manned Moon landing played in transforming the sf magazine
