Martin Buber And The Human Sciences:

Martin Buber and the Human Sciences Maurice Friedman,2012-02-01 The specific focus of Martin Buber and the Human Sciences is dialogue as the foundation of and integrating factor in the human sciences using dialogue in the special sense which Buber has made famous mutuality presentness openness meeting the other in his or her uniqueness and not just as a content for one's own thought categories and knowing as deriving in the first instance from mutual contact rather than knowledge of a subject about an object By the human sciences the authors editors mean material that can be meaningfully approached in a dialogic way hence the humanities education psychology speech communication anthropology history sociology and economics The essays in Martin Buber and the Human Sciences demonstrate that thirty years after Buber's death his influence is still resonating in many countries and in many fields *Martin Buber and the Eternal* Maurice S. Friedman,1986 Martin Buber Maurice S. Friedman,2003-09-02 Martin Buber The Life of Dialogue the first study in any language to provide a complete overview of Buber's thought remains the definitive guide to the full range of his work and the starting point for all modern Buber scholarship Maurice S Friedman reveals the implications of Buber's thought for theory of knowledge education philosophy myth history and Judaic and Christian belief This fully revised and expanded fourth edition includes a new preface by the author an expanded bibliography incorporating new Buber scholarship and two new appendices in the form of essays on Buber's influence on Emmanuel Levinas and Mikhail Bakhtin **Humanity at the Limit** Michael Alan Signer,2000 Five decades after the end of World War II issues relating to the history and meaning of the Holocaust far from fading from social consciousness have if anything intensified New generations probe the past and its implications for understanding human behavior As fresh information about the particularities of the Holocaust comes to light we know more and more about how these events happened but the deeper question of why remains unanswered In this compelling volume Jewish and Christian thinkers from Israel Germany and Eastern Europe as well as the United States and Canada among them scholars from the fields of history theology ethics genetics the arts and literature confront the legacy of the Holocaust and its continuing impact from the perspectives of their disciplines The issue of religion is central as the Vatican's 1998 statement We Remember Reflections on the Shoah prompts Jewish and Christian contributors to address issues of responsibility evil and justice within their concrete historical and social settings The essays in this important interfaith international and interdisciplinary volume will leave readers pondering the unavoidable question what in view of the crimes of the Holocaust is the nature of human nature Amazon.com Lessons and Legacies IV ,1991 Essays that illustrate new areas of concern within Holocaust study and that explore neglected issues such as gender and place **Theories of Human Communication** Stephen W. Littlejohn,Karen A. Foss,2010-11-04 For almost four decades Theories of Human Communication has offered readers an engaging and informative guide to the rich array of theories that influence our understanding of communication The first edition broke new ground with its comprehensive discussion of

theorizing by communication scholars Since that time the field has expanded tremendously from a small cluster of explanations and relatively unconnected theories to a huge body of work from numerous traditions or communities of scholarship The tenth edition covers both classic and recent theories created by communication scholars and informed by scholars in other fields Littlejohn and Foss organize communication theory around two intersecting elements contexts and theoretical traditions and emphasize the connections trajectories and relationships among the theories They provide clear accessible explanations that synthesize without oversimplifying Their extensive use of examples presents theorizing as a natural process and invites readers to reflect on their own experiences and to become active participants in continuing the conversation In addition to the authors lucid explanations of theories the text includes From the Source boxes in which the theorists share their perspectives on communication The extensive bibliography almost 1 200 entries and chapter citations are invaluable resources for more in depth study

A Companion to Continental Philosophy Simon Critchley, William R. Schroeder, 1998-06-08 Covering the complete development of post Kantian Continental philosophy this volume serves as an essential reference work for philosophers and those engaged in the many disciplines that are integrally related to Continental and European Philosophy

Ontology and Closeness in Human-Nature Relationships Neil H. Kessler, 2018-10-10 In *Ontology and Closeness in Human Nature Relationships* Neil H Kessler identifies the preconceptions which can keep the modern human mind in the dark about what is happening relationally between humans and the more than human world He has written an accessible work of environmental philosophy with a focus on the ontology of human nature relationships In it he contends that large scale environmental problems are intimate and relational in origin He also challenges the deeply embedded modernist assumptions about the relational limitations of more than human beings ones which place erroneous limitations on the possibilities for human more than human closeness Diverging from the posthumanist literature and its frequent reliance on new materialist ontology the arguments in the book attempt to sweep away what ecofeminists call human nature dualisms In doing so conceptual avenues open up that have the power to radically alter how we engage in our daily interactions with the more than human world all around us Given the diversity of fields and disciplines focused on the human nature relationship the topics of this book vary quite broadly but always converge at the nexus of what is possible between humans and more than human beings The discussion interweaves the influence of human nature dualisms with the limitations of Deleuzian becoming and posthumanism s new materialism and agential realism It leverages interhuman interdependence theory Charles Peirce s synechism of feeling and various treatments of Theory of Mind while exploring the influence of human nature dualisms on sustainability place attachment common worlds pedagogy emergence and critical animal studies It also explores the implications of plant electrical activity plant intelligence and plant neurobiology for possibilities of relational capacities in plants while even grappling with theories of animism to challenge the animate inanimate divide The result is an engaging novel treatment of human nature relational ontology that will encourage the

reader to look at the world in a whole new way **The Communicative Relationship Between Dialogue and Care** Marie Baker-Ohler, Annette Holba, 2009 This book provides insight into the nature of the relationship between dialogue and care The work is textured and mindful of the human need for authentic communication between embedded human communicative agents This is because the authors are well versed in the field having published articles books and book chapters dealing with the cultivation of human communication and human relationships through aspects of care dialogue and other philosophical preconditions This study approaches the relationship of care and dialogue through a constructive hermeneutic approach situated within the current historical moment while relying on a rich and textured historical tradition of philosophical writings that invite new discussion on the value of this relationship In a historical era of rapidly changing technologies it is often easier to text twitter and e mail in a hypertext mode that fails to acknowledge the dialogic potential in human relationships This book reminds us that even in these technologically sophisticated times we gain more in human relationships through care and dialogue than in quick instant communication It is unique from other books dealing with the relationship between dialogue and care in human relationships because it integrates literature involving communication ethics and philosophies of communication framed around the metaphor of care to provide a more textured insight related to human communication The discussion is an alternative to a social scientific approach Readers will gain a thorough and comprehensive understanding of the issue s involved from different perspectives Many other books on these matters are also theoretically laden with deep philosophical concepts but they are often devoid of connections to everyday experiences which limits application of the ideas The authors address this by a text that explores those philosophical and theoretically laden concepts related to care in an applied manner so that the practice of these ideas is situated within actual human interaction This study provides an in depth exploration specifically dealing with care as a philosophical and ethical paradigm for living in the world This book is distinctive as it encompasses theorists scholars from multiple perspectives that include sociological psychological philosophical and from both social science and humanities approaches all of which come together within a communication framework The purpose of this book is to provide readers with the opportunity to consider multiple ways of enhancing human communication through discovering how the notion of care has the ability to shape and guide communicative exchanges Care is posited as a philosophy of communication and more specifically as a communicative ethic that can be embraced in interpersonal and organizational communicative contexts Our goal is to provide a textured understanding of care as it relates to human communication and as it is foregrounded in philosophical thought This text will help develop philosophical understanding of this topic that is inescapably linked to human communication This book will interest all in communication sociology psychology and anthropology **The Inquiring Organization** Catherine Kikoski, John Kikoski, 2004-07-30 This book provides the context and tools to create knowledge via a proven process of inquiry questions and conversation It introduces the theoretical background to explain why as well as the practical hands on skills

and processes to demonstrate how to surface tacit knowledge that which we know but which we have not yet made explicit in conversation e g background education and experience and create new knowledge in collaboration with colleagues In the information economy knowledge is an asset and a currency The creation of new knowledge therefore enhances an organization s position in the marketplace How do we create new knowledge We don t do it by learning what is already known The learning organization is already pass Instead we do it by inquiring which is a method of bringing tacit knowledge to the forefront of awareness The inquiring organization surfaces tacit knowledge which is what its employees bring to the table their background education experience character and judgment and transforms that knowledge into new explicit knowledge that can be transferred from one employee to another through conversation That is true knowledge creation and this book provides the tools skills techniques and processes for executives and professionals in any field to accomplish this task in today s fluid environment

Reviewing **Martin Buber And The Human Sciences**: Unlocking the Spellbinding Force of Linguistics

In a fast-paced world fueled by information and interconnectivity, the spellbinding force of linguistics has acquired newfound prominence.
