*Marxism and the Modern State* David Wells, 1981      *Democracy and the Capitalist State* Graeme Campbell Duncan, 1989-03-02 This book examines one of the key issues in the analysis of the capitalist state its relationship with democracy To what extent can a capitalist state be democratised Where and how do democratic institutions intervene in the management and control of capitalism These questions and more are the subject of this book      **Critical Companion to Contemporary Marxism** Jacques Bidet, 2008 International and interdisciplinary in range and scope the Critical Companion to Contemporary Marxism provides a thorough and precise panorama of recent developments in Marxist theory in the US Europe and beyond      The Political Ecology of the State Antonio Augusto Rossotto Ioris, 2014-03-26 The contemporary state is not only the main force behind environmental change but the reactions to environmental problems have played a crucial role in the modernisation of the state apparatus especially because of its mediatory role The Political Ecology of the State is the first book to critically assess the philosophical basis of environmental statehood and regulation addressing the emergence and evolution of environmental regulation from the early twentieth century to the more recent phase of ecological modernisation and the neoliberalisation of nature The state is understood as the result of permanent socionatural interactions and multiple forms of contestation from a critical politico ecological approach This book examines the tension between pro and anti commons tendencies that have permeated the organisation and failures of the environmental responses put forward by the state It provides a reinterpretation of the achievements and failures of mainstream environmental policies and regulation and offers a review of the main philosophical influences behind different periods of environmental statehood and regulation It sets out an agenda for going beyond conventional state regulation and grassroots dealings with the state and as such redefines the environmental apparatus of the state      **Class, Politics and the Economy (Routledge Revivals)** Stewart Clegg, Paul Boreham, Geoff Dow, 2014-11-06 This study first published in 1986 provides a systematic account of the processes and structure of class formation in the major advanced capitalist societies The focus is on the organizational mechanisms of class cohesion and division theoretically deriving from a neo Marxian perspective Chapters consider the organization and structure of the corporate ruling class the middle class and the working class and are brought together in an overarching analysis of the organization of class in relation to the state and the economy This title will be of particular interest to students researching the impact of recession on societal structure and the processes of political class struggle as well as those with a more general interest in the socio economic theories of Marx Engels and Weber      *The Magical State* Fernando Coronil, 1997-11-10 In 1935 after the death of dictator General Juan Vicente Gómez Venezuela consolidated its position as the world's major oil exporter and began to establish what today is South America's longest lasting democratic regime Endowed with the power of state oil wealth successive presidents appeared as transcendent figures who could magically transform Venezuela into a modern nation During the 1974-78 oil boom dazzling development

projects promised finally to effect this transformation Yet now the state must struggle to appease its foreign creditors counter a declining economy and contain a discontented citizenry In critical dialogue with contemporary social theory Fernando Coronil examines key transformations in Venezuela s polity culture and economy recasting theories of development and highlighting the relevance of these processes for other postcolonial nations The result is a timely and compelling historical ethnography of political power at the cutting edge of interdisciplinary reflections on modernity and the state

*Fictions of State* Patrick Brantlinger, 2019-06-30 In this ambitious book Patrick Brantlinger offers a cultural history of Great Britain focused on the concept of public credit from the 1694 founding of the Bank of England to the present He draws on literary texts ranging from Augustan satire such as Gulliver s Travels to postmodern satire such as Martin Amis s Money A Suicide Note All critique the misrecognition of public credit as wealth The economic foundations of modern nation states involved national debt public credit and paper money Brantlinger traces the emergence of modern imperial Great Britain from those foundations He analyzes the process whereby nationalism both the cause and the result of wars and imperial expansion multiplied national debt and produced crises of public credit resolved only through more nationalism and war During the first half of the eighteenth century conservatives attacked public credit as fetishistic and characterized national debt as alchemical From the 1850s the stabilizing theories of public credit authored by David Hume Adam Smith Henry Thornton and others helped initiate the first social science economics In the nineteenth century literary criticism both paralleled and questioned early capitalist discourse on public credit and nationalism while the Victorian novel refigured debt as the individual private credit and debt During the era of high modernism and Keynesian economics the notion of high culture as genuine value recast the debate over money and national indebtedness Brantlinger relates this cultural historical trajectory to Marxist poststructuralist and postcolonial theories about the decline of the European empires after World War II the global debt crisis and the weakening of western nation states in the postmodern era
