Marx's Theory of Exchange, Alienation, and Crisis Paul Craig Roberts, Matthew A. Stephenson, 1973 *Marxism and Alienation* Nicholas Churchich, 1990 An exposition and critique of the views of Marx and Marxists in which Marx's views are compared with other views and are explored in terms of theories causes and the transcendence of alienation self alienation and self realization and economic religious philosophic scientific social and political alienation **The State Bearing Gifts** Brian J. McVeigh, 2006-01-01 Using Japanese higher education as a case study author Brian J McVeigh explores the varieties of exchange dynamics among the Education Ministry universities faculty and students With one eye on large scale processes and the other on everyday practices he elucidates trafficking between micro and macro levels and key concepts of value exchange and role performance by studying how political economy configures dramatization and deception at the everyday level Relying on extensive ethnographic participant observation and the notion of the gift McVeigh challenges the commonly accepted idea of social contract for understanding state society relations Written to be read as both a political and philosophical commentary and anthropological investigation this work has theoretical implications for comparative studies of political systems particularly regarding the relation between self deception and the ideological manufacture of legitimacy **Advanced Introduction to the Economics of Organization** Richard N. Langlois, 2025-03-12 This incisive book presents a succinct overview of the economics of organization Combining traditional approaches with more challenging cutting edge perspectives Richard N Langlois critically examines the ways in which tasks and transactions in the economy are organized **Introduction to Criminology** Anthony Walsh, Craig Hemmens, 2010-12-09 This new edition of the authors popular text reader provides instructors and students with the best of both worlds authored text with carefully selected accompanying readings Thoroughly updated throughout this Second Edition provides an interdisciplinary perspective on crime and criminality that incorporates the latest theories concepts and research from sociology psychology genetics evolutionary biology and the neurosciences Book Jacket Copula Robyn Ferrell, 2012-02-01 How will the ability to manipulate human reproduction change our social world and the relationship between the sexes Taking an explicitly interdisciplinary approach to gender and reproductive technology Robyn Ferrell examines this question in the light of feminist theories of sexual equality and sexual difference arguing that technology itself can be seen as a kind of reproduction Invoking a concept of reproduction that understands it as generic Ferrell asserts that in any reproduction something is produced of a kind that was there before and yet that is also new Technology is therefore generically reproductive since it produces new matter of the same kind In addition to key figures in French feminism Ferrell draws from psychoanalysis and contemporary continental thinkers ranging from Heidegger to Haraway **The Political Economy of Soviet Socialism: the Formative Years, 1918-1928** Peter J. Boettke, 2013-03-14 This book presents a narrative of one of the more interesting utopian experiments in comparative political and economic history the first decade of

the Soviet experience with socialism 1918 1928 Though historical and textual analysis the book's goal is to render this experience intelligible to get at the meaning of the Soviet experience with socialism for comparative political economy today The book examines the texts of Lenin Bukharin and other revolutionaries as well as the interpretations of contemporary historians of the revolution and the writings of more recent interpreters of Soviet political and economic history Arguing that the first three years of the Bolshevik regime 1918 1921 constitute an attempt to carry out the Marxian ideal of comprehensive central planning and that the disastrous results which all commentators agree occurred were the inevitable outcome of this Marxian ideal coming into conflict with the economic reality of the coordination problem that all economic systems face the book draws clear conclusions and elucidates the air of mystery that often surrounds the subject Offering a radical challenge to contemporary comparative political economy at the level of high theory applied research and public policy this book is appropriate for students and scholars interested in Marxism economic history political economy and Austrian economics

A Desolate Place for a Defiant People Daniel Sayers, 2014-11-25 In the 250 years before the Civil War the Great Dismal Swamp of Virginia and North Carolina was a brutal landscape 2 000 square miles of undeveloped and unforgiving wetlands peat bogs impenetrable foliage and dangerous creatures It was also a protective refuge for marginalized communities including Native Americans African American maroons free African Americans and outcast Europeans Here they created their own way of life free of the exploitation and alienation they had escaped In the first thorough examination of this vital site Daniel Sayers examines the area's archaeological record exposing and unraveling the complex social and economic systems developed by these defiant communities that thrived on the periphery He develops an analytical framework based on the complex interplay between alienation diasporic exile uneven geographical development and modes of production to argue that colonialism and slavery inevitably created sustained critiques of American capitalism

The Division of Labor in Economics Guang-Zhen Sun, 2013-03-01 This book provides for the first time a systematic and comprehensive narrative of the history of one central idea in economics namely the division of labour over the past two and a half millennia with special focus on that having occurred in the most recent two and a half centuries Quite contrary to the widely held belief the idea has a fascinating biography much richer than that exemplified by the pin making story that was popularized by Adam Smith's classical work published in 1776
