Henry Aaron,William B. Schwartz,2005-11-21 Over the past four decades the share of income devoted to health care nearly tripled If policy is unchanged this trend is likely to continue Should Americans decide to rein in the growth of health care spending they will be forced to consider whether to ration care for the well insured a prospect that is odious and unthinkable to many This book argues that sensible health care rationing can not only save money but improve general welfare and public health It reviews the experience with health care rationing in Great Britain The choices the British have made point up the nature of the options Americans will face if they wish to keep public health care budgets from driving taxes ever higher and private health care spending from crowding out increases in other forms of worker compensation and consumption This book explains why serious consideration of health care rationing is inescapable It also provides the information policymakers and concerned citizens need to think clearly about these difficult issues and engage in an informed debate

The Medical Age

,1896 **Aching & Fatigue** Stephen Gislason MD,2016-06-02 The book Aching Fatigue is about non specific illnesses and two common patterns of illness the Chronic Fatigue Syndrome and Fibromyalgia Some patients say I feel sick all over These are overlapping symptom complexes and are often part of a larger illness complex The general classification is non specific hypersensitivity disease Dr Gislason explains why diet revision as the first and most essential form of therapy Long term management of food intake is required to sustain improvements The book Aching Fatigue describes these common problems and their solution providing case history examples People with chronic pain describe a variety of patterns generalized aching associated with tender pressure points are common complaints Fibromyalgia sufferers often say I feel like I am 90 years old Stiffness after sitting or lying down is common The stiffness and pain will often improve with mild activities but overly vigorous exertion makes it worse There are many ideas about Fibromyalgia Patients are often frustrated and confused Physicians are not always helpful and insurance companies are reluctant to pay disability claims Some people have strong opinions and beliefs about Fibromyalgia and some support groups champion one idea over all others We believe that Fibromyalgia is one expression of non specific hypersensitivity disease and should be treated with diet revision as the first

and most essential form of therapy Not everyone agrees with us The recent marketing a drug directed at fibromyalgia pain has legitimized the diagnosis If the drug has any benefit it comes with a high price to purchase and then a cost to you as you endure the side effects We have prepared an intelligent guide for people with FM who are motivated to experiment modify their lifestyle and make a sustained effort to improve Drugs should not be the preferred remedy The Alpha Nutrition Program can help to resolve Fibromyalgia and related disorders The program is both a diagnostic and a treatment procedure The first Phase of the program is an attempt to clear symptoms This is home science You start with the hypothesis that your food intake is causing or contributing to your illness and you do an experiment to find out if it is true You want to accomplish four important goals at the same time Remove all the problems in your existing food supply Add all the nutrients your body needs Reintroduce the best nourishing foods available and establish a new healthier diet learn how to take better care of yourself Begin gentle exercise and slowly regain physical fitness
