The Tragedy of U.S. Foreign Policy Walter A. McDougall, 2018-11-22 A fierce critique of civil religion as the taproot of America's bid for global hegemony Pulitzer Prize winning historian Walter A. Sport and the American Occupation of the Philippines Gerald R. Gems, 2016-08-05 This interdisciplinary case study invokes historical sociological and anthropological means to examine the ascendance of the United States to a world power in its first imperial venture In the aftermath of the Spanish American War of 1898 the U.S. acquired and occupied the Philippine Islands for nearly a half century in an attempt to install a democratic form of government a capitalist economy the Protestant religion and a particular value system Sport became a primary means to achieve such goals fostered initially by the military and then widely promoted in the schools and the YMCA Competitive programs including international athletic spectacles channeled Filipino nationalism against Asian rivals rather than the American occupiers as guerrilla warfare ensued in the islands The strategies learned in the Philippines now known as soft power remain prominent factors in current American foreign policy

Fineman is one of our best known and most trusted political journalists. Mixing vivid scenes and figures from the campaign trail with forays into four hundred years of American history, Fineman shows that every debate from our nation's founding to the present day is rooted in one of thirteen arguments that thankfully defy resolution. It is the very process of never-ending argument, Fineman explains, that defines us, inspires us, and keeps us free. At a time when most public disagreement seems shrill and meaningless, Fineman makes a cogent case for nurturing the real American dialogue. Shouting is not arguing, Fineman notes, but often hot-button topics, media cross-fires, and blogs reflect the deepest currents in American life. In an enlightening book that cuts through the din and makes sense of the headlines, Fineman captures the essential issues that have always compelled healthy and heated debate and must continue to do so in order for us to prosper in the twenty-first century. The Thirteen American Arguments run the gamut from issues of individual identity to our country's role in the world, including: Who is a Person? The Declaration of Independence says everyone, but it took a Civil War and the Civil Rights and other movements to make that a reality. Presently, what about human embryos and unlawful enemy combatants? Who is an American? Only a nation of immigrants could argue so much about who should become one. There is currently added urgency when terrorists are at large in the world and twelve million undocumented aliens are in the country. The Role of Faith: No country is more legally secular yet more avowedly prayerful. From Thomas Jefferson to Terri Schiavo, we can never quite decide where God fits in government. Presidential Power: In a democracy, leadership is all the more difficult and paradoxically all the more essential. From George Washington to George W. Bush, we have always asked: How much power should a president have? America in the World: Uniquely, we perpetually ask ourselves whether we have a moral obligation to change the world or alternatively whether we must try to change it to survive in it. Whether it's the environment, international trade, interpreting law, Congress vs. the president, or reformers vs. elites, these are the issues that galvanized the Founding Fathers and should still inspire our leaders, thinkers, and citizens. If we cease to argue about these things, we cease to be. Argument is strength, not weakness, says Fineman. As long as we argue, there is hope, and as long as there is hope, we will argue.

Cables, Crises, and the Press John A. Britton, 2013-12-30 In recent decades, the Internet has played what may seem to be a unique role in international crises. This book reveals an interesting parallel in the late nineteenth century when a new communications system based on advances in submarine cable technology and newspaper printing brought information to an excitable mass audience. A network of insulated copper wires connecting North America, the Caribbean, South America, and Europe delivered telegraphed news to front pages with unprecedented speed. Britton surveys the technological innovations and business operations of newspapers in the United States, the building of the international cable network, and the initial enthusiasm for these electronic means of communication to resolve international conflicts. Focusing on United States rivalries with European nations in Latin America, he examines the Spanish American War in which war correspondents like Richard Harding Davis fed accounts of Spanish atrocities and Cuban heroism into the American press, creating pressure on diplomats.
