Bekey,2014-01-10 Prominent experts from science and the humanities explore issues in robot ethics that range from sex to war Robots today serve in many roles from entertainer to educator to executioner As robotics technology advances ethical concerns become more pressing Should robots be programmed to follow a code of ethics if this is even possible Are there risks in forming emotional bonds with robots How might society and ethics change with robotics This volume is the first book to bring together prominent scholars and experts from both science and the humanities to explore these and other questions in this emerging field Starting with an overview of the issues and relevant ethical theories the topics flow naturally from the possibility of programming robot ethics to the ethical use of military robots in war to legal and policy questions including liability and privacy concerns The contributors then turn to human robot emotional relationships examining the ethical implications of robots as sexual partners caregivers and servants Finally they explore the possibility that robots whether biological computational hybrids or pure machines should be given rights or moral consideration Ethics is often slow to catch up with technological developments This authoritative and accessible volume fills a gap in both scholarly literature and policy discussion offering an impressive collection of expert analyses of the most crucial topics in this increasingly important field **Back in the Spaceship Again** Karen Sands-O'Connor,Marietta Frank,1999-08-30 Much literature for children appears in the form of series in which familiar characters appear in book after book In the late nineteenth and early twentieth century authors began to write science fiction series for children These early series generally had plots that revolved around inventions developed by the protagonist But it was the development and use of rocket and atomic science during World War II that paved the way for interesting and exciting new themes conflicts and plots While much has been written about the early juvenile science fiction

series particularly the Tom Swift books comparatively little has been written about children's science fiction series published since 1945 This book provides a broad overview of this previously neglected topic The volume offers a critical look at the history themes characters settings and construction of post 1945 juvenile science fiction series including the A I Gang the Animorphs Commander Toad Danny Dunn Dragonfall Five the Magic School Bus and Space Cat The book begins with an introductory history of juvenile science fiction since 1945 with chapters then devoted to particular topics Some of these topics include the role of aliens and animals attitudes toward humor the absence and presence of science and the characterization of women A special feature is an appendix listing the various series In addition the volume provides extensive bibliographical information

Gunkel,2023-09-05 Why robots defy our existing moral and legal categories and how to revolutionize the way we think about them Robots are a curious sort of thing On the one hand they are technological artifacts and thus things On the other hand they seem to have social presence because they talk and interact with us and simulate the capabilities commonly associated with personhood In Person Thing Robot David J Gunkel sets out to answer the vexing question What exactly is a robot Rather than try to fit robots into the existing categories by way of arguing for either their reification or personification however Gunkel argues for a revolutionary reformulation of the entire system developing a new moral and legal ontology for the twenty first century and beyond In this book Gunkel investigates how and why efforts to use existing categories to classify robots fail argues that robot designates an irreducible anomaly in the existing ontology and formulates an alternative that restructures the ontological order in both moral philosophy and law Person Thing Robot not only addresses the issues that are relevant to students teachers and researchers working in the fields of moral philosophy philosophy of technology science and technology studies STS and AI robot law and policy but it also speaks to controversies that are important to AI researchers robotics engineers and computer scientists concerned with the social consequences of their work      **Steel**
